

Capturing a Frame (still image) from Video with Media Player Classic

Outside the IMC download Media Player Classic from:
http://www.free-codecs.com/Media_Player_Classic_download.htm
(accessed 9/06/09)

Use jpg files in slideshows and PowerPoint, on jewel cases, add to video projects, etc.

In the Interactive Media Center, on the Windows XP machines, select **Start > Programs > Media Player Classic**

Open your movie file found on the hard drive, from your digital camera/camcorder or from DVD. Do not show movie Full Screen. Select **Play movie**.

Press the **Pause** button when you identify the frame to capture. Use the left and right arrow keys to advance frame by frame.

Select **File > Save Image**. Save as jpg (recommended). Open in Adobe Photoshop or another image editing application such as Paint to edit.
