Tips for Users: Go Pro Hero3

- The GoPro is complicated to use and it takes time to figure it out. Borrow it before you need it to learn how to use it.
- We do not adjust the settings. The settings may be selected from the last user.
- Lots of YouTube how-to's available;
- **WIFI network name:** Albanygopro  **Password:** goprohero3
- Available software is listed on the GoPro Hero website
- Confirm that the patron is aware of all pieces he/she borrowed [It is OK to give a copy of the PowerPoint and contract]
- Anti fog inserts are available
- We will purchase additional pieces. Send suggestions to Regina
- We have adhesive mounts to give away: curved and flat. If give away tell Regina to order more.

- **For shoots over 40 minutes:**
  - The user should borrow extra battery and be sure both are fully charged.
  - Try not to use the Wi-Fi remote and confirm it is powered off.
  - Battery must be charged while in GoPro
GO PRO HERO3

Skeleton Housing
Press knobs to power on/off, apply settings, record, etc.

Confirm thumb screw & Mounts are included
See next slide. The Vertical Surface J-Hook buckle and/or Horizontal Surface Quick-Release Buckle Should be included; one may be attached. Picture shows Horizontal Surface Quick-Release Buckle attached.

This flier will help you identify pieces. It does not include everything that a person may be borrowing. Refer to the contract to see all pieces.
Waterproof backdoor. Also, use when wind > 100mph

Skeleton backdoor NOT waterproof

To open back door, push up on the front of the black latch top of the housing
GO PRO HERO3

Check for:
- Battery inserted in back
- Cover to battery attached
- 32 micro SD card inserted
- Black plastic cover on side is attached

Battery cover
This should be attached

This plastic cover should be attached after housing is attached
Vertical Surface J-Hook

Horizontal Surface Quick-Release Buckle

3-way Pivot arm
SanDisk 32GB microSDHC
Extreme Class 10 UHS-1 Memory Card

notes below are for what’s included in kit;
If borrowing an extra card, BOTH PIECES SHOULD BE IN one separate barcoded container

Use this to transfer recording to computer. It should be in a separate plastic container.

User may need to borrow a card reader if not transferring directly from the GoPro Hero

Card should be in GoPro. Must be formatted when returned.

Formatting the SD Card
SEE NEXT SLIDE
FORMAT THE SD CARD:

1. Power ON the GoPro with the SD card inserted by pressing the front (Mode) button.
2. Press the front (Mode) button repeatedly until you see the wrench icon on the camera’s screen.
3. Press the top (Shutter) button one time.
4. Press the Mode button repeatedly until you see a trashcan icon.
5. Press the Shutter button one time to select the trashcan icon.
6. Press the Mode button until “ALL/Format” is highlighted.
7. Press the Shutter button one time to select “ALL/Format”.
8. Press the Mode button until “Yes” is highlighted.
9. Press the Shutter button one time to select “Yes”. Your camera’s LED and the trashcan icon will blink to indicate that your SD card is being reformatted.
Wi-Fi Remote

- Check for the removable silver clip; use release slide on back to remove clip.
- Clip must be removed to charge remote; reattach when remote is charged.
- Confirm that the flier for connecting HERO3+ WI-FI Remote is included

**NOTE TO USER:**
Be sure Wi-Fi is turned off when not using. Don’t use the remote if you don’t need to. The battery drains down fast if the Wi-Fi is kept on.
Using the Remote or GoPro App

When your Wi-Fi is On, it will use the most recently used Wi-Fi mode and will attempt to connect to that device.

- Wi-Fi RC (Remote)
- GoPro App (Smart Device)

You can switch the mode by:

- Turning your GoPro On
- Double Click on the Wi-Fi Button to access the Wi-Fi Settings Menu
- Cycle through the settings to pick preferred setting

**NOTE TO USER:**
More Detailed Instructions found in Wi-Fi Wireless Controls Flier (or pg. 49-51 or manual)
Checking if Wi-Fi is Working

If a Blue Light is Flashing from the LED, that means that the Wi-Fi is On

To Turn Wi-Fi Off
• Have the GoPro On
• Press Wi-Fi On/Off Button until you hear a sound and the Blue light stops flashing

To Turn Wi-Fi On
• Same instructions as above, but Blue Light must be flashing

NOTE TO USER:
When Wi-Fi is On, the GoPro will use the most recently used Wi-Fi mode and will attempt to connect to that device. See next page for Details

Battery Will Drain Faster When Wi-Fi is On
Wi-Fi Wireless Controls Flier

Wi-Fi Remote

**WIRELESS CONTROLS**

The built-in Wi-Fi allows your HERO3 camera to connect to the Wi-Fi Remote and smartphone/tablet via the GoPro App.

**To turn Wi-Fi ON/OFF via the Wi-Fi button:**

Press and hold until blue lights flash. When turning Wi-Fi ON the Wi-Fi mode will be set to the most recently used mode.

**PAIRING YOUR HERO3 WITH THE WI-FI REMOTE**

Before you can use the Wi-Fi Remote to control your HERO3 for the first time, you must pair the two devices.

First, ensure both camera and remote are powered OFF.

**On the camera:**

1. Press to power ON your HERO3.
2. Press to turn ON the Wi-Fi, then press again to access the menu.
3. Press to enter the menu.
4. Press to cycle to Wi-Fi RC, then press to select it.
5. Press to cycle to NEW, then press to select it.
6. You will see.

**WIRELESS CONTROLS (CONTINUED)**

**On the Wi-Fi Remote:**

1. While holding down , press and release once to power the remote ON into pairing mode.
2. When you see on the remote’s screen, you can release .
3. will appear on both screens once the devices have paired.
4. The remote will now ask if you want to CONNECT ANOTHER? camera.
   a. If yes, press to select YES, then repeat the pairing process from the beginning.
   b. If no, press to cycle to NO, then press to select it.

The remote’s LCD screen will mirror the camera’s LCD screen. You can now use the remote to control your camera.

**USING YOUR HERO3 WITH THE WI-FI REMOTE**

Once you have paired your camera with the Wi-Fi Remote, follow these steps the next time you want to use the remote to control your camera. (You only need to pair the camera and remote once).

**On the camera:**

1. Press to power ON your HERO3.
2. Press to turn ON the Wi-Fi, then press again to access the menu.
3. Press to enter the menu.
4. Press to cycle to Wi-Fi RC, then press to select it.
Wi-Fi Wireless Controls Flier

Wi-Fi Remote

5. Press 5 to select CURRENT.
6. You will see .

On the remote:
1. Press to power ON the remote.
2. You will see on the remote’s screen.
3. will appear once camera and remote are connected.

The remote’s LCD screen will mirror the camera’s LCD screen. You can now use the remote to control your camera.

GOPRO APP (FREE)
The GoPro App lets you control your camera remotely using a smartphone or tablet. Features include full control of camera and settings, live video preview on your smartphone or tablet for easy shot framing and more. Download the GoPro App for free at the Apple App Store and Google Play.

PRO TIP: Before you hit 5, see what your HERO3 camera sees by viewing it on your smartphone or tablet’s screen.

passwords: goprohero3

See gopro.com for more information.

See Next Page on How to Connect to GoPro App
Wi-Fi Wireless Controls Flier

GoPro App
Username:   Albanygopro
Password:   goprohero3

1. On your smartphone/tablet, complete these steps:
   a. Download the GoPro App to your smartphone/tablet from the Apple® App Store, Google Play, or Windows® Phone marketplace.
   b. Open the app and tap "Connect Your Camera."
   c. Tap "Add New Device." Android - Click on "Choose A Device" and then "Add New Device."
   d. Tap "HERO3+/HERO3/HERO2."

2. Press the Power/Mode button to power ON your camera.

3. On your smartphone/tablet, tap "Continue."

4. On your camera, complete these steps:
   a. Press the Wi-Fi button on the left of the camera as the lens is facing you.
   b. Press the Wi-Fi button again and look at the camera’s LCD screen to see the Wi-Fi option. Now press the Shutter button.
   c. Press the camera’s front Power button to highlight "GoPro App", and then press the Shutter button to select it. Your camera will display a Wi-Fi signal indicating it is producing a network.

5. On your smartphone/tablet, tap "Continue."

6. In your smart phone or tablet’s Wi-Fi Network settings menu, connect to the camera’s Wi-Fi network. You should find the name of your camera listed in your available Wi-Fi networks.

7. Once connected to your camera’s Wi-Fi network, go back to the GoPro App on your phone or tablet.

8. You will be prompted to create a new camera name and password and click "Apply Settings."

9. For iOS users: Go back to Settings > Wi-Fi on your phone and select your new camera name, enter the password, then return to the app.

10. Once connected go back to the app and you should be all set!

   If your HERO3 has never been paired with any smartphone/tablet, follow the instructions to pair the two devices.

Note – if you don’t see “GoPro App” in the menu along with “Wi-Fi RC”, then you need to update your camera’s software before you can use the GoPro App. You can update your HERO3 software here: http://gopro.com/update.

GoPro App Troubleshooting

Username: Albanygopro
Password: goprohero3

If your device cannot connect to the GoPro, follow these instructions:

• Reinstall App on Device

• Check if GoPro has at least 2 Bars of Battery

• Check on GoPro Website for Options

• Final Option, Reset Device Password

FINAL OPTION- Reset Device Password

1. To reset the password, we need to re-update your camera's network name and password by visiting our webpage here: HERO3 or HERO3+. From the HERO3 update page click "Start Update" to begin. From the HERO3+ update page click "Update your camera manually" below "Other Ways to Update" to begin.

2. On the first page, enter your serial number and registration information and then click "Next Step."

3. On the next page, select 'Wi-Fi Update Only' with the blue check mark and click "Next Step."

4. On the next page, enter your new camera name and password.

5. Follow the rest of the on-screen prompts to complete the rest of the update process.
