Schulenberg
Still Trying

The fact that there isn't much more than 20 days left in the first term of the new General Schulenberg administration couldn't be more clearly evident when the President Johnnie Van Zandt, in his speech before the Conference, calls the situation "a little bit too much." The President made it clear at the outset that he had no intention of seeking a second term in office. His chief concern is to finish the work of his first term and to leave the country in a better condition than he found it. The President's message, which is expected to be delivered later this month, will include a detailed plan for the future of the United States?

The Legal Corner

(A Column Written by Paul Norell & Dietsch)

Endorsement for a Bank or Credit Union Loan

The worker who endorses a loan from a bank or credit union should consider the advantages offered by the employee-owned credit union, which provides a good loan at a lower rate, and is a more reliable institution. The credit union also offers a lower interest rate, which is a significant advantage for the worker. Furthermore, the credit union offers a wider range of services, including the ability to access their funds at any time of day or night, and to have a say in the management of the institution.
