GE Refuses to Make Joint Study Of Silicosis Hazards With Union

The issue of occupational health in the workplace has been a long-standing concern. The November 9, 1969 edition of the Electrical News contains an article about General Electric's refusal to make a joint study of silicosis hazards with the union. The article highlights the importance of recognizing and addressing occupational health hazards in the workplace, and calls for continued efforts to improve safety and health standards for workers.

Contract Crisis in Hands of Members

The Contract Crisis in Hands of Members article discusses the challenges faced by union negotiators in the context of a labor dispute. The article emphasizes the importance of strong leadership and effective communication in resolving labor disputes, and highlights the role of union members in supporting their negotiators and ensuring fair wages and working conditions.

Still Laying Off But More Slowly

The article "Still Laying Off But More Slowly" discusses the impact of layoffs in the workplace, particularly in the steel industry. It highlights the challenges faced by workers and families affected by layoffs, and calls for continued efforts to support those affected by economic downturns.

The Electrical News is a valuable source of information on labor disputes, occupational health, and other workplace issues, providing insights into the challenges faced by union members and employers in maintaining fair wages and working conditions.
Civil Liberties Reports Postponed Until August

Reports are to be made in August on new requests for information, under the 1950s Internal Security Act, submitted by the FBI. The reports will be issued by the Attorney General's Office, which has delayed their publication.

Look at the Record

The differences that social science makes in the image of work

The differences that social science makes in the image of work are strikingly shown in a report by Mario Pavesi, a leading sociologist at the University of Milan. The report examines the influence of social science on the image of work, particularly in the context of the work ethic.

80% Profits Are Huge Despite Wilson's Wall

GE's Profits Really Have Its Mind on the Record

The company has been criticized for its profit motives, but a new report suggests that the company's profits are not as high as previously thought. The report, "GE's Profits Really Have Its Mind on the Record," claims that the company's profits are actually lower than previously reported.
