ETRSRAMO APPROVES $6 BILLION (cont’d)

Will he be required to live in a trailer with no roots of his own in order to be able to make a living?

Will he be just a tool of industry?

Will this be another type of commune system which is being exported to Red China where the worker has no permanent home, no family life, no social life, and in the end "no freedom of choice"?

This and many other questions pose a very complex problem, which demands just and acceptable answers.

A simple solution to the entire problem would be to enact a "Tax-deductible Area Bill" which would set up a program to increase our national growth to create jobs for the 2% who are now listed on the unemployment rolls adopting a policy of full employment everywhere and one of "live and let live".

JOB SECURITY AND INCOME SECURITY rank first in the collective bargaining desires of the GE employees according to a preliminary tabulation of preference ballots cast by members of our union in recent months.

Caryi stated, "We seek only one thing: a job and that is to negotiate peacefully, fairly and equitably a contract which will be of benefit to all concerned. We do not ask for anything more than that to which we are justifiably entitled."

"LET US HERE AND NOW pose a challenge to those corporation officials," he continued, "let us tell them that we will put forward our needs as we see them and as the employees have indicated on their ballots.
