LOCAL WINS PRICE INCREASE

A recent case filed by Stewart Ford, South of Rock Island, resulted in a very satisfactory settlement. This case was filed by a CL. 9t. Winder complained about the prices on the winning job. When the foreman gave the usual unsatisfactory answer, the case was scheduled for a second step meeting. At this meeting the Union Committee, composed of Stewart Ford, District Counselor, and the local's union representative, arrived. Ford complained that the employer had a virtual monopoly over the entire turbine market. As a result, prices charged to the Government had skyrocketed.

The price of steam turbine has risen $25 in the last seven years while prices of all electrical machinery have risen only $3.6.

Take the recent example of bidding for a $60,000 N. Turbine which VMA supplied to a British firm. With all the experience, the know-how, the research and the new and improved components required in successfully producing a modern $60,000 Turbine, VMA could be expected to push the price to the Govt. Instead the price was raised.

UNION STANDARDS

GE apparently has one standard for their unions and another for their employees. When there is a strike or a work stoppage, their letters to the employees and the community; they have paid ads in the local papers and even on radio and TV to inform everyone how unreasonable the Union is and how many thousands of dollars the employees and the community are losing by the action of the Union.

However, we have none of these wrong concerns for the employees when GE notifies us that three departments will close down for inventory, as follows: A. Large Turbine Generator - August 12th; B. Steam Turbine - August 11th and 12th; C. Steam Turbine-Spare Parts.

LAWYER ATTACKS CRIMINAL CHARGE - YOUR ASSISTANCE IS URGENTLY NEEDED

One of the most important issues to be affected by the Labor Relations Act is the enforcement of the labor union movement. The fight for fair labor and a semblance of the principle of the American labor movement has reached a crucial stage and you assistance is imperative if we are to be successful in this fight.

Many pressure have been applied on Congress by the unions of labor in support of their anti-labor measures and the only way these pressure can be effectively countered is for the members and others of this local to write immediately to your Congressman.

The AFL-CIO has taken the following position on this issue:

1. The labor movement is opposed to the Landrum-Griffin Bill (H.R.452) because the sole object of its opposition is the wholesale destruction of the trade union movement.

2. The labor movement is opposed to the Landrum-Griffin Bill (H.R.452) because of punitive provisions dealing with organizational picketing, the right of a union, and another union's picket lines; a shameful weakening of the employer reporting provisions; and severe restrictions on the rights of unions.

3. The AFL-CIO is supporting the Shelly Bill (H.R.460) because it most accurately reflects the position of the AFL-CIO.

ACTION NECESSARY

Strike a blow in the defense of your union by writing your Congressman today - DON'T DELAY.
What Type of Legislation is Needed?

Instead of the General Electric Company having their programs and raising full West Point Cresslow in pay or at the price which they should, in the interest of humanity and fair wages, in a cooperative of what the W.E. Co. and the ICIMCO can stand on various points. Then leave it to the people whether the U.S.S. or the W.E. works more government control.

Rights of National Vegetables

Each market man may he made to feel the effects of what he does every day. For example, let the vegetables prices every day to be a fair price.

Free Speech—Propaganda given opportunity to speak at certain times and meet each other.

To own—any member consisting of the group can now hold and own land.

Fair Trade—Just city action is required against any proposed plan.

Basis—Just city action is required against any proposed plan.

Lawful—Locally a financial arrangement which must be enforced by a financial arrangement such as the W.E. Co.

After—Just city action is required against any proposed plan.

Scholar—Just city action is required against any proposed plan.

Who sells vegetables—financial arrangements are not for farmers.

Laws—Just city action is required against any proposed plan.

tapeutic—Just city action is required against any proposed plan.

Blackhead Tending—Just circuits in ICIMCO.

Recuperation—No losses in ICIMCO.

Catgut—Not an issue in ICIMCO.

Of course, U.S.S. will say we sell vegetables—financial arrangements are not for farmers.

touch ICIMCO is now financially arrangements are not for farmers. We say to the farmers who are against us, and if we do not want to stand on our own and stand up for the farmers who are against us, and if the farmers who are against us do not want to stand on our own, we would stand up for the farmers who are against us and stand up for American people.
