Starting Off the Series of 301 Section Nights

The ninth series section in a series which started last week is scheduled for 7:00 p.m., tonight (Friday) when members represent- ed by Board Member Hector Corona will get together at 321 Sail. On the previous night of Buildings 30, 200 of the members gathered for a short business meeting.

T-H Board Bans Mass Picketing

The next section of the T-H Board dealt with the question of mass picketing. The Board adjourned the meeting in order to consider the matter of a complaint against a member of the T-H Board.

Section Nine Series Now in Full Swing

The tenth series section in a series which started last week is scheduled for 7:00 p.m., tonight (Friday) when members represent- ed by Board Member Hector Corona will get together at 321 Sail. On the previous night of Buildings 30, 200 of the members gathered for a short business meeting.

T-H Board Bans Mass Picketing

The next section of the T-H Board dealt with the question of mass picketing. The Board adjourned the meeting in order to consider the matter of a complaint against a member of the T-H Board.
Jandneco Citys

Record of Clark

Jandneco Citys new power plant, the Jandneco Electric Company, is under construction in the city of Jandneco, a small town in the state of New Mexico. The plant is being built to meet the growing demand for electric power in the area.

Jandneco Citys Mayor, John A. Clark, has announced that the new plant will be completed by the end of the year. The plant is expected to generate enough power to meet the needs of 10,000 homes.

The plant will be fueled by coal, and the city has signed a long-term contract with a nearby coal mine.

Jandneco Citys City Council has approved the construction of the plant, and the city has obtained the necessary permits from the state and federal agencies.

The city has invested $5 million in the project, and the city council has approved a loan from the state to help finance the construction.

Jandneco Citys power plant is expected to be operational by the end of next year.

The plant will be the first in the state to be fueled by coal, and it is expected to be a major source of employment in the area.
