On the Job

While G.E.'s representatives are understanding the
publicly in 1956 that it is working successfully to attract new
business to Schenectady, the company is planning to transfer
from Schenectady, which employs more people than the
committees of which he is a member would attract to Schenectady.

**Doctor's Reports Important to Injured Worker in Compensation Claim**

It is surprising how few doctors realize the importance of their medical reports when a worker is treated as an injured worker. They are of little value if they are not detailed and specific about the treatment given and the injury sustained. Often, a poorly written report will not be accepted as valid evidence in a compensation claim. The doctor should be aware of the importance of his report in the worker's compensation claim.

**Memorandum to Injured Worker**

The importance of a doctor's report in a compensation claim cannot be overstated. It is crucial that every detail of the treatment given and the injury sustained is recorded accurately in the report. This will help to ensure that the claim is processed correctly and that the worker receives the compensation they are entitled to.

**State Adm. Renews Members of Local 301**

Perry Tomlins, a member of Local 301, formerly associated with the Motor Department, was appointed to a job in the Labor Department (Assembly Operations) as a member of the union representing the Motor Department workers. He has been occupied in the job, establishing the Department's operations as an independent company, for 11 years.

Tomlins is a member of the union representing the Motor Department workers, and he believes that the company's operations are improving. The union represents the Motor Department workers, who have repeatedly expressed their dissatisfaction with the company's operations. Tomlins is optimistic that the company's operations will improve under his leadership.

**Grass Root Strike Issues**

In a memo from the officers of Local 2654, United Steelworkers of America, the present issues causing the strike at the American Locomotive Company are outlined to the effect that ALCO management has adopted the G.E. program to cut piece work prices and proposals to the ALCO workers that they must speed up if they expect the same earnings.

**The memo reads as follows:**

1. *Increase in the current contract, which is a deliberate misrepresentation, and fraudulent in its intent and purpose.*
2. *The ALCO Strike committee has been instructed to stop work at the present time, and to propose an increase in wages of $2 per hour.*

**Activities Comm. Plans Raffle**

The Local 301 Activities Committee is planning to hold a special raffle to raise funds for the union. The committee is also planning to have a special meeting to discuss the need for additional funds. The committee is eager to raise as much money as possible to help the union.
