Labor Criticism Gives Campbell The Squirms

Steve Dale, Thomas T. Campbell has been extended an invitation by the 301-405 workers to attend the next CWA membership meeting if he wants to show off his organization (the "new"") to the major workers in the industry. However, the invitation was extended following the reading of a two-page letter from Campbell in which he expressed his concern that the "301-405" is not interested in his "ideas" and that his organization will not be able to provide the "best" ideas to the workers.

The point is this: Local 301-405, as stated in the letter, is not interested in the "new" organization, it's just interested in improving the conditions of the workers. If the workers are interested in the "new" organization, then it is the workers who should extend the invitation, not Campbell. The letter from Campbell is not a sign of an invitation, but rather an indication of the workers' lack of interest in the "new" organization.

Spreading the word, the "new" organization is not interested in the workers, but rather in promoting its own interests. The letter from Campbell is a clear indication of this.

Wilson Rushes To Bail Out Big Steel Bosses

Charles W. Wilson, former U.S. President, has made an announcement that the workers in the steel industry will be bailed out of their current financial difficulties. This announcement has caused a stir among steel workers and their families, who are concerned about the potential impact on their jobs and livelihoods.

Wilson stated that the government will provide financial assistance to the steel industry in order to help them weather the current economic downturn. This announcement has been met with mixed reactions, with some workers expressing concern about the potential for government intervention in an industry that is already facing significant challenges.

The announcement comes as the steel industry faces ongoing challenges, including increased competition from overseas producers, shifting global markets, and ongoing trade disputes. Wilson has stated that the government's role will be to provide assistance in a way that supports the long-term health of the industry, while also ensuring that the interests of workers and their families are protected.

Comparing UE and CIO Steel

Wages

CIO Steel | UE
---|---
Basic | $18.50
Overtime | $27.75
Holidays | $2.25
Premium Pay | $3.00
Shift Differentials | $0.50
Incentive Pay | $1.00
Vacations | 1 week after 6 months
Seniority | 1 year after 18 months

Wilson's announcement is met with mixed reactions from workers, with some expressing concern about potential government intervention in an industry that is already facing significant challenges. The government's role will be to provide assistance in a way that supports the long-term health of the industry, while also ensuring that the interests of workers and their families are protected.
Tame 'Horsewhip' General Foreman

James C. Caryer, 39, local foreman for the Chicago and North Western Railway, was appointed general foreman for the new C and NW yard in Chicago. He succeeds James A. Wilson, who is now the general foreman for the Chicago and North Western Railway. Caryer is a native of Illinois and has been with the C and NW for 25 years. He has held various positions in the railroad industry, including yard master and assistant superintendent. Caryer is a graduate of the University of Illinois and has been active in the union for many years. He is a member of the Teamsters Local 1000 and has been involved in numerous negotiations with the railroad company. Caryer is married and has two children.

Large Motor & Generator Stoppage Gets Results

The large motor and generator stoppage, which began in December, has resulted in significant savings for the company. The stoppage, which lasted for three months, was implemented to reduce costs and improve efficiency. The company has reported a 15% increase in productivity since the stoppage began. The stoppage was also successful in reducing maintenance costs by 20%. The company has received positive feedback from customers, who have noticed a significant improvement in service quality. The company plans to continue the stoppage and implement similar strategies in the future.
