Union's Message to Schenectady

We are the GE Ammunition Division, a division of the General Electric Company. We have been working for 1888 fighting our Country's battles in war and peace. We have been working to make our Country strong and free. We have been working for peace, but not just the surface peace, and their fame. We have been working for the wellbeing of all the workers of the world. We have been working to make life better for everyone. We have been working for peace, but not just the surface peace.

We call your attention to the fact that the great number of American workers are recognizing their dignity and are working to achieve it. They are working for a better life for all, not just for themselves. They are working for peace, but not just the surface peace.
