That Tax Cut Finally Arrives

Your income tax went down Jan. 1. If you are married, have two children and an income of $2,500, your income tax dropped from 1% to 30%, but your annual social security has increased by 10% of its income from $10 to $20. If you are married, with five children, and earn $5,000, your income tax has dropped from $100 to $200, and your annual social security has cut down from $100 to $200. These $300 to $400 more is not just for advertising costs, but is a real increase in taxes, reducing both present and social security, if your income was $10,000 or $20,000.

Some workers have been given a tax cut, but not all workers are affected. It is not a tax cut for the rich, but a tax cut for the poor.

FREEDOM FROM FEAR

They remember when... you had to sneak a smoke... eat your meals... be aware of the police... stand in the dark... not talk to the neighbors... not do the work... no pay for overtime... no retirement... no vacation... no holiday pay... no sick leave... no holidays... no union steward... no contact with the outside world...

All that has changed. What a difference! Today, you no longer have to worry about any of these things. You are freed from fear. You can look forward to a better future. And that's why we say, "We speak from experience!"

It's hard to imagine what it felt like before we had UE. You had to look over your shoulder all the time. You had to be careful about anything you said. You had no say in anything. You had no one to turn to. You had no one to fight for you. You had no one to look up to. You had no one to trust.

Then came UE. Everything changed. You had someone to look up to. You had someone to fight for you. You had someone to trust. You had someone to talk to. You had someone to depend on.
