Delegates Condemn Carey-Block Faction

The 21st UE convention at Boston last week condemned the Carey-Block Faction, which calls itself "IUW Members for Democratic Action," for seeking to disrupt the union and giving "bad and contemptuous" service to the members.

By a vote of 117 to 106, the convention passed the following resolution:

"The factionalist clique calling itself 'IUW Members for Democratic Action' was organized, directed, and financed by fraternal leaders to disrupt the union.

"This faction acts and attempts to disrupt the work and service of the members as well as the work and service of the officers. The union is a means to accomplish its aims.

"This faction, by its unscrupulous and self-seeking efforts against our union and its leadership, has given aid to membership, company officials, and AFL officials in contempt with the IUW.

"Leaders of this faction have revealed their lack of loyalty to the IUW by removing their plants from the IUW security affidavits.

"They have not been successful against our union, but there is no reason for giving aid to them as the leaders of this faction are not the leaders of the union.

"Our union is the best in the country.

"In our union, members are elected and not appointed. We believe in the democratic principles of the IUW.

"The IUW stands above all political parties and organizations. We believe in the best for the members and not for the leaders.

"Our union is the best in the country, and we believe in the democratic principles of the IUW. We believe in the best for the members and not for the leaders.

About 50 individuals brought food last week. As many as 100 bought food at other times, and over 100 people visited the store. The money tak- en is estimated to be over $100.

Constitutional Amendment

There are several constitutional amendments proposed by various states that have different purposes. One of them is called the Equal Rights Amendment (ERA), which aims to ensure equal rights and opportunities for all individuals regardless of sex. Another amendment is the ERA, which focuses on the rights of women in the workplace and reproductive decisions. These amendments are subject to approval by the states, and then by the national government. The process can be lengthy and requires extensive advocacy and education. Individuals and organizations play a crucial role in advocating for or against these amendments, depending on their beliefs and the impact on their communities.
