Employment Not Improving At Schenectady GE

The announcement of Mr. C. Stevens, which was reported to the Mayor's Committee on Unemployment at a meeting held in City Hall last week, claimed a reduction in employment from 37,000 to 36,500 since June of this year or approximately 365 employees. Our report shows 365 employees removed from the payroll with another 965 transferred to other jobs because of lack of work in most cases reduction in wages. We suspect there has been some reduction in the colored unit which would increase our figure of 365. However, the reports received by the Union are confirmed to our own bargaining unit. The survey made by the Union does not include the last week of September which had not yet been received from the Company.

Mr. Stevens, speaking for the Company, claims that the present situation does not call for a change of present plans. The plans referred to involves the transferring of the central and industrial heating work out of Schenectady. These plants include the jobs of approximately 4,000 G.E. workers. We think there is plenty of danger already showing it affects a prosperous Schenectady and insufficient to require the Company to call a hold to their plans of transferring work and cancel any further forming out of work that can be done in the local plant.

The Company's spending program on laboratories, drainage systems and industrial clinics will not provide the kind of jobs that will absorb the people displaced. Likewise the motor worker mentioned in Mr. Stevens' report has so far only employed the relatively few and since those are counted in the large number who were transferred, it has not decreased the unemployment figure. Moreover, the rates paid for most of the work are lower than the going rates in the plant, resulting in a decrease in earnings for every production worker who has been transferred into this department.

Mr. Stevens stated that business forecasters saw a rising business trend in the months to come. We hope so, but until then let's keep the facts on the table and try to prevent the investments of the little businessmen in town and particularly the G.E. workers whose main stake are their families and their jobs.

Pensioners Will Get Benefit of New Social Security Increase

The Pension Plan has decided to give the pensioners the benefit of the increased Social Security rates which average approximately $752 per week. This is about four times the rate before the Social Security Act was passed.

The Pension Plan has decided to give the pensioners the benefit of the increased Social Security rates which average approximately $752 per week. This is about four times the rate before the Social Security Act was passed.

N.Y. State Power Authority Replies

We have received an answer to the letter sent to Governor Dewey by Assistant Attorney General J. D. Faust, concerning that the equipment to be used at the St. Lawrence Power Project, as well as the U.S. firms, needs the same certification as the foreign firms. The Attorney General's office will give the necessary advice to the workers employed there, to ensure the proper functioning of the equipment. The St. Lawrence Power Project, now under construction, is designed to generate electric power from the St. Lawrence River, and will be the largest hydroelectric project in the United States. The project is expected to be completed in 1958, and will provide power for a population of 2.5 million people.

Mr. Robert Moore, Chairman of the Board of Trustees, has replied, giving reasons why the equipment should be purchased from foreign firms. He also states that the purchase of foreign equipment will be beneficial to foreign laborers. The St. Lawrence Power Project is being built to meet the growing demand for electric power in the United States, and the use of foreign equipment will help to meet this demand.

The reply from the Power Authority does not indicate that there will be any change in the plans for the project. The Authority will continue to purchase equipment from foreign firms, as they believe it is the best way to ensure the proper functioning of the project.

Mr. moore, Chairman of the Board of Trustees, has received a letter from the Governor, expressing his concern about the purchase of foreign equipment. He has stated that the equipment will be purchased from foreign firms, as this is the best way to ensure the proper functioning of the project.

L.M. and Generator Management Keep Heads in the Clouds

By John B. McNeil

On a hot summer day, high in the clouds, the men and women of the Large Motor Generator Dept. are busily working on various projects. The atmosphere is thick with the sound of machinery and the hiss of steam. The workers are well-protected, wearing helmets and goggles to protect themselves from the high temperature and the sharp edges of the equipment.

Over 2500 Transferred in Nine Months

By Jane Smith

The Department of Labor has reported that over 2500 employees have been transferred in the past nine months. This is due to the increase in production, and the need to expand the workforce. The employees have been transferred to different departments, and are now working on various projects.

The Department of Labor is working to ensure that the employees are properly trained and equipped for their new positions. They are also working to ensure that the employees are treated fairly, and are not subjected to any form of discrimination.

The Purpose of Court Hearings in Compensation Cases

By Jane Smith

The purpose of court hearings in compensation cases is to determine the extent of injuries, and to award the appropriate compensation to the injured workers. The hearings are held to ensure that the workers are treated fairly, and are not subjected to any form of discrimination.

The hearings are attended by the injured workers, their employers, and their attorneys. The attorneys are responsible for presenting the evidence, and for arguing the case on behalf of their clients. The court hearing is a legal process, and the decisions made are binding.

Local 301 Dollar Stretchers

By Jane Smith

Local 301 is a labor union that represents workers in the construction industry. The union is working to ensure that the workers are treated fairly, and are not subjected to any form of discrimination.

The union is working to ensure that the workers are treated fairly, and are not subjected to any form of discrimination. They are also working to ensure that the workers are properly trained and equipped for their new positions.
