EXPERIENCED GLASS BLOWERS WANTED (Cont'd)

Recently, something went wrong somehow along the line and the rate of production dropped. A great deal of pressure was then put on the girls who were forced to take a lesser rate. In desperation, the unit Manager, Van Fochtvannes, called in some engineers to find the cause behind the drop in production there. Naturally, engineers were expensive and must find a solution at all costs.

After an exhaustive study, with no concrete results, they turned once again to the poor girls. They started checking on the type of soap used; one was using and began analyzing the soap itself. They haven't gotten down to some other measurements yet, but it could come to that. The situation couldn't be more ridiculous. The next thing you know the whole plant may be put on restricted diet to double productivity.

These women work in individual sealed off rooms where the temperature is maintained from 80 to 90 degrees. The window on the door is covered with aluminum foil. A glass rod is then placed over a fire and a bubble is blown against a light. The reflection of light on the bubbles tells the texture of the bubble which must be down to 0.002 of an inch. At this time they take a small cutting torch, select an area and cut this piece out with a small gas torch and drop it in a furnace. The furnace is then placed in an oven to bake. And for all this, they get 80 cents an hour. The union protest's the action taken and demands the girls be placed back on their original jobs at their proper rate.

EDUCATIONAL CLASSES TO CONTINUE

Two educational programs will be conducted by Roy Segal, IUE International Educational Director at local XOL headquarters Sept. 14 to 17, inclusive. The classes will be divided into two groups, the advanced group who participated in the sessions last June and the Shop Stewards class which will be held on Sept. 14th, 15th and 16th.

Roy Segal, in cooperation with Local XOL, will provide a program for those who attended classes last June covering "Techniques of Speaking", "Preparing a Talk", "Composing Ideas", etc. The Shop Stewards group will study "Democracy", "The Union's Program" and "O.R. Publications". For the schedule for the session see below:

September 14, 15 & 16
(2nd Shift) 1700 - 2100 - Advance Group
(2nd Shift) 12:00 - 16:30 - Stewards

September 15 & 16
(1st & 3rd) 08:00 - 12:00 - Advance Group
(1st & 3rd) 13:30 - 17:00 - Stewards

September 17
(2nd Shift) 18:00 - 21:30 - Advance Group
(1st & 3rd) 08:00 - 12:00 - Stewards

We urge every Shop Steward to attend the three sessions on September 14, 15 and 16. Likewise, we are counting on those who attended the June sessions to continue with the more advanced programs.

Local 301 membership drive starts Oct. 1

Trenton Strikers Foil GE Efforts

At Bringing In Strikebreakers

Trenton, New Jersey — Members of Local 301, IUE, United Electrical, Radio and Machine Workers of America, have been trying to bring in strikebreakers from outside the area to work on the GE works due to the strike.

Local 301 is now working on the strikebreakers and has been trying to keep the price of the work low. The workers have been working for free in order to keep the GE works running.

In Trenton, the members of Local 301, have been working with the GE workers to keep the price of the work down. The GE workers have been very cooperative and have been working hard to keep the price of the work down.

EDITORIAL:

The Steel Strike . . .
A Real Challenge

The strike of the United Steelworkers union against the steel industry is entering its fifth week. It is one of the most important labor disputes in the history of American labor.

The REAL ISSUE OF THE STRIKE is whether or not steel workers will have the right to negotiate their contracts and other agreements in their own behalf. The steel industry, like other industries, should be able to negotiate their contracts in a cooperative spirit.

Ironically, the steel industry is the one industry that is most dependent on the steel workers. The steel industry cannot continue to operate without the steel workers. The steel workers cannot continue to live without the steel industry.

The strike is a battle for the steel workers' right to negotiate their own contracts. The steel industry, like other industries, should be able to negotiate their contracts in a cooperative spirit.

TRENTON STRIKE

(Continued from Page 1)

The Trenton Strike is the latest in a series of labor disputes that have taken place in the steel industry. The strike began on April 12, 1935, when the United Steelworkers of America (USWA) went on strike against the United States Steel Corporation.

The strike was a response to the company's refusal to recognize the union. The USWA had been negotiating with the company for several months, but the talks had reached an impasse.

The strike was a major event in the history of the steel industry. It lasted for four weeks and involved thousands of workers. The strike was eventually settled, but it had a major impact on the steel industry and on the USWA.

Organization Drive

(Continued from Page 1)

The United Steelworkers of America (USWA) is one of the largest labor unions in the United States. It represents steel workers in the steel industry.

The USWA has been a vocal advocate for the rights of steel workers. It has fought for better wages, better working conditions, and better benefits for its members.

The USWA has also been involved in political activities. It has supported candidates for political office who have promised to support the interests of steel workers.

The USWA has a long history of fighting for the rights of steel workers. It has been a major force in the labor movement in the United States.

Local 301 Golf League

(Continued from Page 1)

The Local 301 Golf League is a popular activity among the members of the USWA. It is an excellent way to socialize and enjoy the outdoors.

The league meets once a month and is open to all members of Local 301. The league is sponsored by the USWA and is free to join.

The league is a great way to meet new people and to enjoy the outdoors. It is a great way to relax and unwind after a long day at work.

Students Graduate Union Classes

(Continued from Page 1)

The union classes are an important part of the USWA's commitment to education. The classes are open to all members of the union and are free to join.

The classes are taught by experienced teachers who have a wealth of knowledge about the labor movement. The classes cover a wide range of topics, including history, economics, and politics.

The union classes are an excellent way to learn about the labor movement and to develop critical thinking skills. They are a great way to meet new people and to enjoy the outdoors.

The union classes are a great way to relax and unwind after a long day at work. They are a great way to meet new people and to enjoy the outdoors.

Pensioners Club Resumes Meetings

(Continued from Page 1)

The Pensioners Club is an important part of the USWA's commitment to its members. The club is open to all members of the Union who are retired.

The club meets once a month and is free to join. The club provides a place for retired members to socialize and enjoy the outdoors.

The club is a great way to meet new people and to enjoy the outdoors. It is a great way to relax and unwind after a long day at work.
