Legislative Committee Reports on Vital Topics

Price Control

The last war was fought as a dramatic issue. We learned that war is followed by price fixations and price controls. There is danger that this will be repeated. Private individuals cannot start the same class of events in a defense program, and people will have large sums to spend. But the government cannot continue to collude for an inadequate supply of equipment and raw materials. Special interests and hoarding will intensify difficulties. Without effective enforcement, the system would produce a spiral of price and profit, which would result in a spiral of price and profit.

A rapidly rising price level inevitably intensifies social conflicts as well as individual suffering. The need for upward adjustment of wages, prices, and taxes is now a matter of popular concern. This situation was recognized by Mr. E. S. Adams, who in his address to the New York Conference on Industrial Relations and Social Service, World War Veterans Committee of Congress of the United States, House of Representatives, Washington, D.C.

Dear Friends:

I have just learned through the press that you are the biggest party of all the rest. How sad it is to think of our country without a party. The only way to make it safe is to have a party. It is very hard to think of our country without a party. The only way to make it safe is to have a party.

The Children's Home has a fine record in the field of social work. It has a fine record in the field of social work. It has a fine record in the field of social work. It has a fine record in the field of social work.

And Decreased White Income

Beginning January 1, 1946, the Federal Works Administration, under the direction of the Works Progress Administration, has reduced wages for certain workers in the fields of construction and railroad construction.

The new wage rates are as follows: $1.50 per hour for skilled laborers and $1.25 per hour for unskilled laborers. The reductions are expected to result in a savings of $500,000 per month for the Works Administration.

The reduction in wages will have an immediate effect on the construction industry, and the new rates will apply to all future projects.
