Toolroom Workers Disgusted at G. E. Company's Reprehensible Attitude

Toolroom workers employed at the Edison Electric plant of the General Electric Company are disgruntled over the company's representation at the second hour wage for 1944 negotiations. The Labor Department has ordered the company to offer a wage increase of one hour for 1944. The company has refused to offer the increase, saying that it is not financially feasible. The workers have threatened to strike if the company does not agree to the wage increase.

The union has presented a demand for the increase, and the company has rejected it. The workers have expressed their dissatisfaction with the company's attitude. They feel that the company is not being fair to them and that they should not have to work for less money.

The workers have also expressed their dissatisfaction with the company's stance on other issues. They feel that the company is not being fair to them and that they should not have to work for less money.

WILL THE MEMBERSHIP IN THE UNION
CONTINUE TO GROW?

* * *

ANON. EDITORIAL

Any discussion on strikes at this time is out of the question. The NYSL 296 has come out with the CIO's demand that they should have their membership back in the industry and it is working with the IBEW and the IATSE and other unions. The CIO should be very careful not to say strike or stoppage of work for the duration of the war. The recent National Conference in Philadelphia has been confirmed by issuing the following resolution:

"The CIO hereby reaffirms its position without reservations or conditions that the membership of the NYSL 296 in the industry shall be restored to it, and that it will continue to work in the industry so long as it is possible. The CIO has a responsibility to work in the industry so long as it is possible. We are not working to stop the war. We are not working to upset the war. We are working to win the war."

WILL THE MEMBERSHIP IN THE UNION CONTINUE TO GROW?

* * *

ANON. EDITORIAL

We believe the membership of the NYSL 296 in the industry will continue to grow as long as it is possible. The CIO has a responsibility to work in the industry so long as it is possible. We are not working to stop the war. We are not working to upset the war. We are working to win the war. The NYSL 296 has made a significant contribution to the war effort and will continue to do so as long as it is possible.

NAM's Anti-Labor Million-Dollar Propaganda Drive

The National Association of Manufacturers (NAM) has launched a million-dollar propaganda campaign to oppose the labor movement. The campaign, which is being conducted through the National Association of Manufacturers, is designed to undermine the strength of the labor movement by spreading false allegations and misinformation.

The campaign focuses on attacking the labor movement, accusing it of being a threat to national security and the economy. It also seeks to discourage workers from joining unions by painting a negative picture of their rights and benefits.

The NAM claims that the labor movement is trying to sabotage the war effort and that it is a threat to national security. It argues that the labor movement is trying to undermine the economy and that it is causing economic hardship for workers.

The NAM's propaganda campaign is designed to undermine the strength of the labor movement by spreading false allegations and misinformation. It seeks to discourage workers from joining unions by painting a negative picture of their rights and benefits.

ANON. EDITORIAL

We believe that the NAM's propaganda campaign is intended to undermine the strength of the labor movement and to discourage workers from joining unions. We believe that the NAM is trying to undermine the economy and that it is causing economic hardship for workers.

BLOOD FOR THE ARMED FORCES

In this issue, we will take a look at the situation of the armed forces and their need for blood. We will discuss the importance of blood donation and the efforts being made to ensure a steady supply of blood for the armed forces.

We believe that it is important to donate blood for the armed forces. It is a small act that can make a big difference in the lives of our service members. We encourage our readers to consider donating blood and to support the efforts being made to ensure a steady supply of blood for the armed forces.

BUILDING 64—Franklin Bank

Why I think there's a general strike on the way.

* * *

ANON. EDITORIAL

There are powerful forces within the community that are opposed to a general strike. These forces include the business community, the government, and the labor movement itself. The business community is opposed to a general strike because it would disrupt the economy and cause economic hardship for workers. The government is opposed to a general strike because it would undermine national security and the war effort. The labor movement is opposed to a general strike because it would undermine its position and its ability to negotiate.

We believe that the forces opposed to a general strike are powerful and that they are well-funded. We believe that the forces opposed to a general strike are well-organized and that they have a clear strategy for undermining a general strike. We believe that the forces opposed to a general strike are well-funded and that they have a clear strategy for undermining a general strike.

THE END OF THE BEGINNING

In this issue, we will take a look at the end of the beginning of the Second World War. We will discuss the events that led to the end of the war and the impact of the war on the world.

We believe that the end of the war was a turning point in history. It marked the end of the Second World War and the beginning of a new era. We believe that the end of the war was a turning point in history. It marked the end of the Second World War and the beginning of a new era.
