WHAT’S YOUR JOB

The choice of a vocation is a serious problem. It should be approached with much careful thought and planning. If we are unfit for the job we choose we are usually failures. If our job should be dull and uninteresting, we would soon tire of it. If we get no return whatever from the work we put into the job, it certainly will not be very valuable to us. So it is important that we find out whether we are to be doctors, lawyers, merchants, or chiefs, and spend some time in preparation for our job.

Everyone has something which he can do best. That is the pointer he should follow in choosing his vocation. Square pegs need square holes, so we should begin making our holes now.

BOOKS EXPLAIN GREEK PICTURES

The art bulletin board offers an interesting exhibit this week. It displays pictures of the Acropolis and other ruins of Athens. Some books which explain these pictures in an interesting manner are: Greek and Roman Mythology by K. P. Harrington, Tharsis and His Town by C. C. Snedeker, The Perilous Seat by C. B. Snedeker.
