Board Approves Memorial College and Institute

The SUNY Board of Trustees approved the establishment of the Nelson A. Rockefeller College of Public Affairs and Policy at SUNY Albany. The college is named in honor of the late Governor Nelson A. Rockefeller, who made significant contributions to the university and the state.

The college will be located on the campus of SUNY Albany, and its activities will attract students from throughout the SUNY system. It will provide opportunities for students to pursue interdisciplinary studies in the fields of public policy and public administration.

The college's mission is to "prepare leaders in public service, and to promote excellence in scholarship and research." It will offer undergraduate and graduate programs in public policy, and its faculty will be drawn from across the SUNY system.

Elections Marked by Problems, Low Turnout

The elections were marked by technical problems and low turnout. Voting machines malfunctioned in several locations, causing delays and confusion. In addition, many students were unable to vote due to technical difficulties.

Despite these challenges, the election results were ultimately announced. The winners were announced, and the new student leaders will take office.

Grant for Affirmative Action

The SUNY Board of Trustees approved a grant for the advancement of affirmative action and equal opportunity policies. The grant will support programs designed to increase diversity and inclusion on the SUNY campuses.

The grant will support initiatives such as diversity training, mentorship programs, and scholarships for underrepresented students. The goal is to create a more inclusive and equitable campus environment for all students.

formula for Malnutrition

By Scott M. Sommer

Malnourishment, from its causes, such as poverty and disease, to its effects on human health and development, is a pressing issue in the world today. The problems of malnutrition are not only physical, but also social and economic, and require comprehensive solutions.

Research has shown that an undernourished mother can have negative consequences on her infant's health. Inadequate nutrition during pregnancy can lead to poor growth and development of the fetus, which may result in low birth weight and increased risk of mortality.

Breastfeeding is considered the most vital source of nourishment for infants. Breast milk is unique in its composition and provides essential nutrients to the infant. It is important to understand the benefits of breastfeeding and to promote it as a priority in public health policies.

The Nestle Corporation, a multinational company, has been involved in controversy over its marketing practices of infant formula. The company has been accused of misinforming mothers about breastfeeding and promoting formula as an alternative.

Recently, the United Nations World Health Assembly adopted a resolution to promote breastfeeding and protect against the commercial exploitation of infants.

In summary, addressing the issue of malnutrition requires a multifaceted approach, involving policies and practices that support breastfeeding, provide adequate nutrition, and combat poverty and disease. Only through collaborative efforts can we hope to overcome the challenges of malnutrition and ensure a healthy future for all.

Bringham’s Hill

The problem wasn’t clear to Bringham.
but he walked. (You can’t help but
agree that Bringham is the kind of
soul who would find it easy to walk.
What does the saying go? ‘Don’t
sit, just walk’? It’s a saying that
sounds good, but it’s a lie, in a few
words. But Bringham walked.

Bend down and put a good-sized rock
with a perfect curve in the wagon and
you’ve got yourself a good walking
tool. But Bringham didn’t do that.
He just walked.

He thought to himself, drew gently, creating a small glow and thick
deep layers of ash and pulled out his pouch of

The evening walk was Bringham’s stretch
of self-indulgence. It was a time to think,
to dream, to forget about the world.

Bringham walked back to his own place
and sat down in his favorite stool.

He knew what he needed to do.
He knew what he had to say.
He knew what was needed.

Utopia Hits A New Stage

Misses former hit act of 1969 and 1970, The Brains, is touring the United States with a new look and a new sound. The band consists of lead singer and guitarist George Thorogood, bassist John Willie Wilcox, and drummer James "Wise" Donegan. The new lineup has been described as "a cross between The Rolling Stones and The Who." The Brains' first single, "One Of My Friends," has charted in several countries and is currently enjoying success in the United States.

Hollywood Knights

John Boorman And The Holy Grail

John Boorman's latest film, "Excalibur," is a retelling of the legend of King Arthur. The film is set against the backdrop of the Arthurian romances of the late 5th century, with its roots in the Middle Ages and its styles resembling that of Hugo Burnham, from "Brainstorm." The film features impressive special effects and a captivating score.

Low Demand For Brains In Albany

The Brains, led by singer-songwriter Ian Hunter, performed to a packed house at the Palace Theatre in Albany, New York. The crowd of over 2,000 people was enthusiastic and responsive, with many fans waving signs and singing along to the band's hits.

Stallone Plays Cops And Robbers

Sylvester Stallone, known for his role as John Rambo in the "First Blood" series, takes on a new role in "Rocky 3." Stallone plays the character of "Brock," a cop on the run from the law. The film is a action-packed thriller that combines elements of the "Rambo" franchise with a new cast of characters.

Thoroughgood Puts On The Ritz

George Thorogood and the Destroyers are back with a new album, "The First Barefoot Press Conference." The album features the band's signature blend of blues and rock, with tracks that are both edgy and accessible. The band's tour, "The First Barefoot Press Conference," is set to kick off in early May and will feature performances in cities across the United States.

The First Barefoot Press Conference

The film "The Heretic: The Exorcist," directed by Stallone, is set in the 1970s and follows the story of a young man who is taken under the guidance of a mysterious figure known as "The Heretic." The film is a supernatural thriller that explores themes of faith, doubt, and redemption.

Brainstorm

Low Demand For Brains In Albany

The Heretic: The Exorcist

The Brains' sorry state of affairs continued when they played a small club in Albany, New York. It's been a while since they've played such a small venue. The crowd was sparse, and the atmosphere was lackluster. The band's performance was lackluster as well, with the musicians struggling to keep up with the band's usual energy and enthusiasm.

The Brains didn't just stand up and play—"What's going on here?" asked the lead guitarist, Price. "We're supposed to be the best band in the world!"

The best audience reaction they received was a collective yawn. The Brains seemed to be struggling with their repertoire, with several songs being played poorly. The audience seemed unimpressed, and the band's performance was lackluster.

"It's not fair," complained singer-songwriter Ian Hunter. "We're supposed to be the best band in the world!"

Less than 100 people bothered to show up for the Brains' show in Albany. It was a sad sight, with the band shining through. Even Kasim Sulton, who seemed to be pretty tired, was unable to save the day.

So, next time around, use your promotional campaign. The Brains will knock your socks off!"
Finally, after four disappointing years of inept student government, there is now something for seniors to write home about.

On a cold, dark, lonely night in the campus center, Crazy Gary, Crazy Bob, Crazy Brad and the rest of the Crazy Class Council slashed your senior week ticket prices by an incredible 50 percent over last year's prices.

But that wasn't good enough! We defied inflation and stayed well past building hours and slashed those prices to such incredibly low levels that even government economists winced at our fanatic disregard for the laws of finance.
