Mohawk Tower Repairs Will Be Completed Soon
Reagan Begins Cutbacks

WASHINGTON, D.C. (AP) President Reagan, saying that he has to "change our direction" in the United States, has ordered military, diplomatic, and trade officials to begin planning for a defense and economic strategy that would place primary emphasis on the domestic needs of the country.

The move is expected to have a major impact on military spending, especially on weapons procurement.

Oil Control Lifted

NEW YORK (AP) The federal government took the first step toward ending the nation's gasoline rationing program with the announcement that the ban on new oil drilling in Alaska and the Gulf of Mexico would be lifted.

The decision, which was made by the Interior Department, was seen as an attempt to boost the oil supply and reduce the price of gasoline.

Campus Briefs

Telephone Presents Concert

The Annual Concert Series will present a concert on April 15th at 8 p.m. in the Student Union. The concert will feature a variety of musical groups including a jazz band, a folk trio, and a classical quartet.

Israel Counts Attack

Israili authorities have reported a number of recent attacks on Israeli targets in the occupied territories. The attacks are believed to be the work of Palestinian guerrilla organizations.

Old Control Lifted

NEW YORK (AP) The federal government has lifted the ban on new oil drilling in Alaska and the Gulf of Mexico, effective immediately.

The decision was made after a long and bitter debate in Congress, with opponents arguing that the ban was necessary to protect the environment and support the domestic oil industry.

Women's Safety Issue Studied

A recent study by the Department of Health and Human Services has found that women are at a higher risk of becoming victims of violence than men.

The study, which was based on data from the National Crime Victimization Survey, found that women were more likely to be the victims of intimate partner violence, as well as non-partner rape, sexual assault, and stalking.

Three Safety Phones Added

The Sexual Assault Center has added three additional emergency phones to the campus. The phones are located in the Student Union, the Library, and the Science Building.

The phones are designed to provide immediate assistance to students who may be in danger or in need of support.

SUNY Holiday Mandate Lifted

The SUNY Board of Trustees has lifted the mandate that all students must wear masks on campus.

The mandate was put in place last year due to the COVID-19 pandemic. The decision was made after consultation with health experts and the local health department.

UAS Plans Renovations
Aims for Better Food Service

By Frank Gil
To "serve customers properly and efficiently," the Cuisine and Cafeteria Center will be expanded at SUNY Albany, under a $150,000 project to improve service, according to SUNY Albany's Norbert Zahn.

The main objective for the renovations would be to modify the cooking area to a more efficient system, expanding the "service points" and changing the overall layout of the kitchen. "All the improvements will have to be implemented," Zahn said. "It's the most important part of the project."

"It was designed to be efficient," he added, "to allow the maximum number of cooks to work at the maximum number of time periods."

SUNY Albany will become a "laboratory" for new food preparation equipment and service improvements. The new systems will potentially be "a prototype" for improving service and efficiency in other locations, such as SUNY campuses and the U.S. food service industry.

Zahn said that the improvements would be made in the "least possible time," and that the project would be completed as quickly as possible.

OUTSTANDING JOB!
THANK YOU
W.C. BUSS

SUNY Albany administration and faculty have been meeting with the U.S. government to discuss the implementation of energy-efficient systems, according to SUNY Albany's Norbert Zahn. "The main problem with the existing system is that it's not efficient," Zahn said.

"The renovation plan includes improving the lighting, fashion, and making the cafeteria more energy-efficient. We hope to have the renovation completed by the end of the semester," Zahn added.

The renovation plan includes improving the lighting, fashion, and making the cafeteria more energy-efficient. We hope to have the renovation completed by the end of the semester.

Health Gripe

To the Editor:

I must make a minor, but disturbing res­

plication to the Editor. On the morning of

Monday, January 31, 1979, I reported to

SUNY, Albany Medical Center for treat­

ment. A large, right-handed needle was

inserted into my left thigh, and a needle into

my right hand. I was given an injection of

Local Anesthesia. I was then asked to sit

upright, and permitted to move about

lightly as I wished. I believe that this was

the proper way to perform this procedure,

and that it was done with competence and

care. However, I was informed that I

would have bleeding of my left thigh into

the thigh. This is a normal reaction, and

does not require any further treatment.

I have been advised by my physician

that I should rest for the next 24 hours

and then resume my normal activities.

I have attached a copy of my medical

records to this letter. I enclose a copy of

my insurance policy, which shows that I am

covered for such medical expenses.

I sincerely hope that no other

patients will experience this problem. If

such a situation arises, I would appre­
ciate it if you could contact me at my

address and let me know how I can

assist in the resolution of this matter.

Sincerely yours,

M. Hochbrueckner

President, SUNY

World Government

To the Editor:

Many people wonder why the United States

is at war with the world. My position

is that they must now begin to prepare

for the real war which is a world govern­

ment. This is a war that has been

planned for centuries. The world govern­

ment will use its military power to

force the world to conform to its will.

The United Nations is the vehicle for

this purpose. It is a world government

that is being developed under the guise

of the United Nations. The United

Nations is a world government that

is being developed in order to

force the world to conform to

its will. This is a war that

must be fought, and it

must be fought now.

Sincerely yours,

M. Hochbrueckner

My Month And 19 Days In The Air Force

How I Traveled 1700 Miles For A Haircut!

David Diamond

According to various sources, I was not an air force soldier, but rather a man who traveled 1700 miles to get a haircut. This is an account of my experiences during my month and 19 days in the Air Force.

Upon arrival at Lackland Air Force Base, I was told I would be a member in good standing of the high school football team. However, I soon realized that the training required to become an airman was much more demanding than I had anticipated. I was not particularly athletic or healthy, and I found myself struggling to keep up with the rest of the recruits.

Despite the physical challenges, I managed to complete my basic training with relative ease. I was particularly impressed by the discipline and orderliness of the base. I soon realized that the training was much more than just physical; it was also a test of my mental and emotional strength.

After basic training, I was assigned to a unit where I was required to maintain a certain level of cleanliness and grooming. I was shocked to learn that I had to shave my head and keep it shaved at all times. Despite my initial resistance, I soon realized that this was a necessary part of the training. I learned to take pride in my appearance and to take care of myself.

In conclusion, my month and 19 days in the Air Force was a challenging and rewarding experience. I learned a great deal about discipline, perseverance, and personal responsibility. I am grateful for the opportunity to have been a part of such an elite group of individuals, and I carry these experiences with me to this day.

Spinning The Discs Of ‘80

Music critics like to put out their list of "best" album, in which the artist demonstrates their worst. Steely Dan is head and shoulders above the rest in this regard. Their latest, "The Magician," is a collection of so-so songs and mediocre performances. Instead, however, I call "You and Me." Instead, however, I recommend "The Dragnet," featuring brilliant performances by Bob Dylan and John Lennon. Their collaboration is a watershed moment in rock history.

Another album that deserves a place on any critic's "best" list is "The Shining," by Stanley Kubrick. This psychological horror film is a masterpiece, leaving audiences on the edge of their seats. The performances by Jack Nicholson and Shelley Duvall are outstanding, and the cinematography is breathtaking. A true masterpiece.

A Mixed Bag Of Tricks

Bruce Springsteen: "The River"

Bruce Springsteen's "The River" is a mixed bag. The album contains a variety of styles, from rock to folk. Some songs, like "I'm On Fire" and "Ooh La La," are powerful and emotional. However, others like "Heartland" and "Streets Of Fire" are less successful. Overall, it's an album that fans of Springsteen will enjoy, but it may not appeal to those who prefer a more straightforward approach.

Mark Rossier

"Liking The Pain"

This album is a departure from Rossier's previous work. It's a darker, more introspective album that explores themes of pain and suffering. The production is atmospheric, and Rossier's vocals are powerful and emotive. "Liking The Pain" is a strong album that marks a new direction for Rossier's career.

I Yam But I Ain't

"Popeye"

This film is a campy, action-packed adaptation of the beloved cartoon character. The casting is a mix of stars from the time, including Bob Hope as Popeye and Olivia Newton-John as Olive Oyl. The film is known for its over-the-top performances and tongue-in-cheek humor. It's a fun film that's worth a watch for its camp value.

Danes End Red Dragon Jinx, 77-58

Intensity And Experience Provide Difference; End 10-Year Losing Streak

by Rob Belfiori

by Tom Saucers

Rob Clune scored 11 points as the Danes defeated the Red Dragons 77-58 Saturday night at the SEFCU Arena.

"It was Albany's ability to do whatever we told them to do," said head coach Tom Saucers. "We had a great game plan coming in and they executed it to a T." The Danes were able to control the game throughout, never relinquishing the lead for good with their 13 point lead at halftime (35-23).

"It was a tough game for them," said junior forward Ron Simmons. "We were the better team on the court and we were able to use our experience and intensity to come out on top." Simmons finished with 12 points and 13 rebounds in the victory.

Ononta Win Special One For Clune And Simmons

by Larry Kater

Ononta's win was particularly special for junior guard Chris Clune and senior forward Ron Simmons. "We've been working hard all season and it's nice to see our hard work pay off," said Clune. "This is a great victory for our team and we're excited to keep building on it." Simmons echoed Clune's sentiments, saying "We've been working hard all season and it's nice to see our hard work pay off." The Dragons

Courage Keys Grappler Victory

by Larry Kater

The Albany Slate wrestling team had its best preliminary game at the New York State Wrestling Championships on Saturday. The Danes finished in fourth place overall with 54 points, with 15 of those coming from the 150 pound division.

"It was Albany's ability to do whatever we told them to do," said head coach Tom Saucers. "We had a great game plan coming in and they executed it to a T." The Danes were able to control the game throughout, never relinquishing the lead for good with their 13 point lead at halftime (35-23).

Security Debate Stalemates

by Sue Smith

After four months of debate between federal and state officials about possible changes to the security ordinance, a stalemate has occurred.

The debate centered around two main issues: the security ordinance's impact on local businesses and the public's safety. The federal government, led by the Department of Homeland Security, has been pushing for stricter security measures to prevent potential terrorist attacks. On the other hand, local officials have been pushing for measures that don't impact businesses and the public too much.

The security ordinance is necessary to maintain public safety. It provides a framework for security measures to be put in place. However, businesses and residents have expressed concern about the impact of the ordinance on their livelihoods.

"Our small businesses are already struggling," said one local business owner. "We can't afford any more regulations on top of what we're already dealing with." Others have also expressed concern about the potential impact on their lives.

"I'm worried about my safety," said one resident. "But I don't want to live in a constant state of fear. I just want to live my life like normal without any disruption." People on both sides of the debate have been pushing for solutions that allow for both public safety and business viability.

Reagan Calls for Aid Cuts

by Andrew Johnson

President Reagan continued his push for cuts to federal aid programs on Friday, calling for reductions in a variety of programs including education, housing, and health care.

"We need to reduce the federal deficit," said Reagan. "And we can do that by cutting unnecessary spending programs. We have to prioritize our spending and make sure that it is used effectively to help those who need it most." The president's proposals have stirred controversy, with critics arguing that cuts could hurt vulnerable populations and lead to a weaker economy.

"I don't think cuts are the answer," said one critic. "We need to find a way to balance the budget without hurting those who need it most." Others have also expressed concerns about the potential impact of the cuts.

"The cuts are going to hurt my family," said one concerned citizen. "We can't afford to lose our healthcare or housing programs. This is not the time for cuts." People on both sides of the debate have been pushing for solutions that allow for both budgeting and aid programs.

Seniors Owe $3.6G in Back Dues

by Bob Snowdon

As of the end of the fall semester, seniors owe $3.6 billion in back dues to the United States Student Association (USSA), according to USSA official Jim Smith.

"We have been trying to collect on these past-due balances for months," said Smith. "But we keep running into roadblocks. Some students are not paying because they don't understand the importance of the dues, and others are not paying because they are misunderstanding the dues system." The USSA has been pushing for the board of trustees to pass a resolution requiring all students to pay their back dues immediately.

"We need the board of trustees to take action," said Smith. "We can't afford to keep collecting back dues and not making progress. We need the board to step up and ensure that all students are paying their fair share." People on both sides of the debate have been pushing for solutions that allow for both dues collection and student understanding.

Reagan: Aid Cuts

"We need to reduce the federal deficit," said Reagan. "And we can do that by cutting unnecessary spending programs. We have to prioritize our spending and make sure that it is used effectively to help those who need it most." The president's proposals have stirred controversy, with critics arguing that cuts could hurt vulnerable populations and lead to a weaker economy.

"I don't think cuts are the answer," said one critic. "We need to find a way to balance the budget without hurting those who need it most." Others have also expressed concerns about the potential impact of the cuts.

"The cuts are going to hurt my family," said one concerned citizen. "We can't afford to lose our healthcare or housing programs. This is not the time for cuts." People on both sides of the debate have been pushing for solutions that allow for both budgeting and aid programs.
