What’s The Purpose?
When a committee of the faculty of State College recommends that the Board of Trustees increase the student-fee by so much, does that mean they are seeking to increase revenue? What is the purpose of the Student Board of Finance in recommending a fee increase? Is it to support student activities and facilities? Or is it to maintain a certain level of funding?

What’s The Policy?
According to the State College News, the Board of Trustees has approved the increase in student fees. However, the article does not provide details on the reasoning behind the decision or how the funds will be used. Is there a policy that guides the decision-making process of the Board of Trustees regarding student fees?
