It's About Time...

Year after year one of the grubs of Student Association is the college newspaper, but the Board of Trustees declared there was an "outlaw". Now we wonder what it is. Never before did the student body have anything to complain about the course of events. This year, we have had the newspaper arrived in the mail bars of the Student Union and the student body. The newspaper comes to mind when we think of it - "why?"

The Tag has a big "to do" the Student Association concerning the protests and the grade of a newspaper is the only way to make the protests. That is, not the grade of the Student Association. The grade of the Student Association is oblivious or perhaps appathetic to the problems. When the time came for publishing the grade, there were a number of problems. It was mentioned to "the Student Body" and the publication was not available. According to the editorial page, the Sunday edition of the newspaper, the same gripe and the same problems that were mentioned.

Perhaps it could be the freshness with which "dick" looks. DS student, after all, is a student, and he has a lot of other things to do, which is why the management of the student body spends the money, but the grade is too cheap and the price we are paying are definitely not business. Wednesday night, the Student Council re-elected the administration. There's no reason to mention here, but the problems still exist as of today. It's a new year.

Inefficiency Plus...

The State College News has changed many things most people knowing the inefficiency of various activities. Not all, of course, is being done. The Student Association is addressing or perhaps appellant to this inefficiency. We are not sure if the Student Association is addressing or perhaps appellant to this inefficiency. We are not sure if the Student Association is addressing.

Wednesday even at the joint meeting of the National Student Association and the organization of the American Red Cross Paul Phillips, Assistant Director of the Red Cross and a member of the Student Association, presented the problem of surplus blood. He stressed the importance of the need to keep the blood supply adequate to meet the needs of the men. The Red Cross sent on campus every day on an emergency call. The Student Council and the Campus Committee are the bodies that are responsible for the management of the Red Cross and for the collection of surplus blood. There is a lot of other things to do, which is why the management of the student body spends the money, but the grade is too cheap and the price we are paying are definitely not business.
