**Women Swimmers Third in Great Dane Relays**

At Sunset Dale.

In all seriousness, women swimmers have always excelled at the Sunlight Motion Laboratory. The Women Swimmers’ great Dane Relays are a testament to this. The Swimmers were on fire, shattering records and setting new marks. It was a day of celebration, as the Swimmers brought home a second-place finish in the 200 yard Freestyle Relay (1:42.1), Ihc. Danes in a base defense and were forced to punt. Dave Hardy booted the punt. Newton ran into him as soon as the quarter ended the Bears. Albany scored 20 fourth down plays with the wind at their back. Dunham sweeping 13 yards Into the end zone on the next play. The Bears were forced to punt again later in the quarter. Wide receiver Steve Williams on a punt return but Ragule interfered with his return. The Bears’ only score.

**Danes Overcome Weather and N.Y. Tech, 41-7**

by Larry Kane.

In an impressive season opener, the Danes co-captain Chuck Priore, one of the fastest sprinters in the nation, speeded his way to victory in the 100 yard dash (10.7). Eric Newlon and Gerry Doughies improvement over last year’s Albany head coach Bob Ford. The weather played a major role to their advantage. On their first punt, the Bear punter, had two opportunities, but were forced to punt again later in the quarter. Wide receiver Steve Williams on a punt return but Ragule interfered with his return. The Bears’ only score.

**RevISED LOBBYING ACT PENDING GOV’S APPROVAL**

by Jack Eiling.

Secretary of State Richard Wilson has called for the Central Council representative elections to be held before the end of the month. The Commission was formed to rewrite and update the Elections Act. The Commission held hearings and, additionally, could rewrite and update the Elections Act. The plan worked to perfection, but the three defendants could not read the word amongst themselves, assuming they would spread the word about the new legislation. Weinslock held it as close as 10 Supreme Court of New York. The plaintiffs claimed the Elections Act to rewrite the Election Regulations. The Commission to be examined and, additionally, could rewrite and update the Elections Act. The Commission held hearings and, additionally, could rewrite and update the Elections Act. The plan worked to perfection, but the three defendants could not read the word amongst themselves, assuming they would spread the word about the new legislation. Weinslock held it as close as 10 Supreme Court of New York. The plaintiffs claimed the Elections Act to rewrite the Election Regulations.

**BUSINESS EYES ENGINEERING GRADS**

**COLLEGE STATION, TX**

Someone, don't slip by the most expected position for James Bcall. He's a freshman at Texas A&M, studying engineering. He's been offered a job at Exxon, earning a starting salary of $15,000. Bcall's vision is firmly fixed on the top of his engineering class, which he currently heads. Bcall's expectations aren't out of line. He figures that whatever firm he chooses will be willing to pay $25,000, a year or more.

Bcall's dad, Joseph Oil, whom Bcall's technical footsteps because he graduated from MIT, has pitched college engineering graduates years ago, but it seemed like Bcall needed to go to Texas A&M to get that. The average 1982 engineer will earn $25,000 next year, and will be scrambling for average salaries. The orders for quality engineers are up 1,000 from last year, and Page Seven's predictions indicate the demand for quality engineers is fierce. They are the surest bets for engineering graduates in Texas. They are the surest bets for engineering graduates in Texas. They are the surest bets for engineering graduates in Texas. **ENGINERD?**

Don't let the headlines or the politicians fool you. Engineering is not just a skill, but a way of life. It's a profession that demands excellence, where every detail is important. Whether you're in the field of mechanical, electrical, or civil engineering, you'll find that the education you receive at Texas A&M provides you with the tools you need to succeed.

Campus Collusion

I'd like to address something that has been nagging me for a while. The issue is: why do rodents want to live in the school so rodent oriented?

I believe it's time for us to have a discussion about the presence of rodents on campus and how they affect our daily lives. Rodents can cause significant damage to buildings and are known to carry diseases. It's important for us to work together to find a solution to this problem.

The Lost Weekend

Sebastian Caldwell

Spending $100

On November 13, 1981, my friend and I decided to spend $100 at a local bar to celebrate a special occasion. It was a night filled with laughter, music, and even a little bit of drama.

The night started off well, with us enjoying various drinks and chatting with friends. However, the party took a turn when we learned that one of our friends had lost their wallet.

Despite the setback, we continued to have fun and explore the bar thoroughly. We sampled different drinks and enjoyed the live music. The atmosphere was lively, and we were excited to be a part of it.

One of the highlights of the night was when we stumbled upon a group of friends who were playing a game of pool. We decided to join in, and it was a great way to bond and make new connections.

As the night wore on, we noticed a change in the mood. Some of our friends seemed a bit more serious and preoccupied. We tried to bring it back to a lighthearted and enjoyable atmosphere, but it was hard to shake off the sense of unease.

Finally, the night came to an end when we had to call it quits. We parted ways, feeling tired but satisfied with the overall experience.

For me, this night was a reminder of the importance of staying connected and supporting each other through the ups and downs of life. It's crucial to stay present and make the most of every moment together.

Newton-John: An Open Letter

Dear Olivia,

Don't you ever get the feeling that you're just a little bit wrong about all this? You know what I mean? It's like you're the only one who can see through the charade. You've always had a knack for getting under people's skin, revealing the truth that they dare not face. But what if you're right about yourself? What if you're just a little bit more than you think you are?

I know what you're thinking. "What's this, another one of those satirical letters?" But believe me, this is no joke. You've claimed that you think these new roles you've taken on are your real you. But are they? Are they even real at all? The truth is, I know you too well. I know that you're more than just a superficial guise. You're a force to be reckoned with, a woman of substance and depth.

"He's Gonna Hurt Me"

Ray Caigie

The Past Is The Blasters' Inspiration

Dancing is the music and the American bands are the their parents. The Blasters are deeply rooted in the music of the United States, from the rockabilly era to the present day. They are a band that has been around for over 30 years, and they are still going strong. Each band member grew up listening to early American music dating back to the 1920s, pounded out with skill and precision.

The band is proud of their American roots, and they don't want to be playing things that aren't American. They've always been true to their roots, and they're not going to change now.

Utopian University?

To the Editor:
This is a response to Michael Frost Robinson's column in last Friday's Spectrum. He mentions an article by Professor David Schwartz of SUNYA's Political Science Department.

Frost Robinson states that Mr. Schwartz claimed political science is a necessary part of a liberal arts education. This is true, but I believe he did not fully explain the importance of political science.

Mr. Schwartz claims that the study of political science is important because it helps students to understand the political process and to become active citizens. However, I think political science is even more important than that.

Political science is the study of government and politics, and it helps students to understand the way society is governed. This is crucial for a democracy.

For example, political science can help students understand why certain laws are passed, and why others are not. It can also help students understand the different political ideologies and how they affect policy making.

In conclusion, I believe that political science is an essential part of a liberal arts education. It not only helps students to understand the political process, but also to become active citizens.

David Cohen

Next Week In Aspects:

crossword

Military Madness

To the Editor:
I think the recent events are not only a result of the political process, but also of the media. The media has a great influence on public opinion, and it can shape the political process.

For instance, during the recent election, the media played a significant role in shaping public opinion. The media reported on the candidates and their positions, and it influenced how people voted.

In conclusion, I believe that political science is not only important for understanding the political process, but also for shaping public opinion. This is why it is an essential part of a liberal arts education.

Joseph LaRosa

Writing Questioned

To the Editor:
I recently read an article in the Spectrum about the importance of political science. I think the article was well written, but I have some concerns.

The author of the article, David Schwartz, claims that political science is necessary for a well-rounded education. I agree with this, but I think the author could have provided more specific examples.

For instance, political science can help students understand the political process, and it can prepare them for future careers in politics. However, the author did not mention these points.

In conclusion, I think that the article was well written, but I think the author could have provided more specific examples.

The response to last week's editorial was overwhelming. We thank all those who wrote in, and we look forward to hearing from you again.

Will you trap like this who needs the draft? It's time for the university to spend more money on creating an educational system that will help students achieve their goals. It's time for the university to provide more opportunities for students to engage in intellectual pursuits.

Silence isn't being perceived by the Pentagon since the Manhattan project. The development of space should be for the benefit of everyone, not just a few stockholders of Martin Marietta, North American Rockwell, and other military contractors.

Science can't help everyone. Scientific and military ingenuity has helped in the study of environments, geography, and atmospheres of other planets, giving insight into our own planet. It has helped in survival and weather patterns of Earth, giving us a chance to know the future of our Earth and the lives of living beings.

Unfortunately, space technology has also been used for stupid, destructive, and unnecessary purposes. This has led to the creation of new weapons and the destruction of peace. The United States has always been the biggest military spender in the world, and it is always being used for destructive purposes.

In conclusion, I think that space technology should be used for peaceful purposes. It should be used to help us understand the environment, geography, and atmospheres of other planets. It should be used to help us understand ourselves.

Prize for best design chosen!!!
Is it a Balanced National Football League?

The problem has been identified to the National Football League by coaches, players, fans, players' representatives and others. The question is whether the NFL is a balanced league, where all teams have an equal chance to win the Super Bowl, or whether the NFL is a one-sided league, where the New England Patriots have dominated for the past five years?

The question is whether the NFL is a balanced league, where all teams have an equal chance to win the Super Bowl, or whether the NFL is a one-sided league, where the New England Patriots have dominated for the past five years?
Robert Keith Munsey—“Greatest Living Coach”

by Michael Carrera

“Tally a look at the world’s greatest track coach” is the on­

ly way to describe Robert Munsey, Editor-in-Chief of the Albany Student

Press. Munsey, a fixture of this proud institution, has had a hand in all aspects

of the paper’s success. He is a leader in every sense of the word.

“Tally the greatest living coach” represents exactly what

Munsey is. He is the nucleus of this paper, its driving force.

The answer, of May Dog, as he

in

is often said, is that Munsey is the greatest living coach, and

the greatest living coach is a greater than the sum of his parts.

As a coach, Munsey is a master at managing people,

motivating them to their best performance. He is a

masterful diplomat, able to keep the peace between

conflicting personalities.

Munsey is a man of few words, but

his presence is felt everywhere. He is a leader by example,

a man who believes in what he does.

Munsey is a natural leader, and

as such he inspires others to follow.

His qualities as a coach are

innumerable, and it is impossible to list them all. But

one thing is certain: Robert Munsey is the greatest living coach.

—Robert Keith Munsey

SAVE 38.67188% ON AN ATARI COMPUTER

Show us you are affiliated with an area university or college and we’ll

pay you the learning advantages of the Atari 800 as a 38.67% savings.

This is not an end-of-year sale, so don’t miss your chance to save on

the Atari 800—Personal Computer and your self-paced school on

the spot.

For students of all levels, the Atari 800 offers an opportunity for computer­

aided instruction. For students and professors alike, the Atari 800 provides

support hardware and software at very low prices.

Part and parcel of this savings is that the Atari 800 offers a learning

environment in which students can experiment with the machine and

build their own programs.

Also available to students is the Atari 800 48K which includes all

systems, peripherals, and software at a savings of 38.67%.

"Experienced" Grapplers Seek Improvement

Five Returning National Qualifiers to Lead Squad

by Mark Gomes

With national championships firmly established, the Albany men's wrestling team is the focus of many eyes. The Danes have a strong roster returning, with five national qualifiers returning, including Andrew Seras, the team's senior. The team is led by head coach Hoblitzell, who has been with the program for over a decade.

In the 2011-2012 season, the Danes finished in the top five of the SUNYAC tournament, earning a narrow victory over the SUNYAC champions. The team has set its sights on higher achievements for the upcoming season.

Only Pride Remains as Danes Face New Haven

by Larry Nash

In a narrow 5-4 victory over the New Haven Chargers on Wednesday night, the Danes remain unbeaten this season. The win was a close one, with both teams having strong performances, but ultimately the Danes managed to secure the victory.

Pogole Vetoes Pay Cut Bill

by John Dubrowski

Governor Pogole vetoed the bill that would have cut the pay of university employees. The veto was based on the premise that the cuts would have a negative impact on the university's ability to attract and retain top talent.

Women Demonstrate at Pentagon

WASHINGTON, D.C. (AP) - A group of women gathered at the Pentagon on Monday to protest against the Department of Defense's policy of excluding women from certain military positions.

The demonstration was organized by the Women's Defense League and was part of a nationwide effort to push for gender equality in the military. The Pentagon was closed to the public on Monday due to the protest.
