Save Saratoga, Risley Urges Political Science Club,

Calling Famed Engagement "Our Battle of the Marne"

Professor A. W. Risley addressed the Political Science club at a recent meeting, Tuesday, on "Our Battle of the Marne." "While I have no objection to New England historians as a class and entirely some to Dr. Thayer in particular, still this is not the first instance of apparent ignorance on a New England historian's part when dealing with events of New York State history. "Washington's life story could not avoid noting a battle in which his only participation was to write letters stirring the local patriots to action. Thayer does not care to mention this correspondence, but for serious students of both facts and geography, and of known facts, in his account of the campaign and of the two battles of September 19, and October 7, 1777, which he mentions only as the latter engagement. "Since a historian has thus erred, it seems to me that it is high time that the well authenticated material in the subject should be given publicity.

Professor Risley denounced "the general and appalling lack of knowledge of geography, and the contended popular ignorance of events and their connection" that exists regarding Saratoga and praised the present movement as one which will tend to make all facts of our own era of our national history more known. Because the Political Science club will conduct a tour of the battlefields for college students. Professor A. H. Healy, of the history department, will accompany the group and will lecture at the different strategic points on the field.
