The following chairmen of committees by cross-blending tobaccos ... and gold. Then, instead of just mixing the tobaccos from Kentucky and Tennessee, and tobacco from Southern Maryland. Just what is meant by cross-blending tobaccos... and how does it make a cigarette milder and taste better...

Well, in blending you take one or more tobaccos and stick them together—a rather simple process. But cross-blending goes a step further...

N making Chesterfield we take Bright tobacco from Virginia, the Carolinas, Georgia and Florida. We take Redfield tobacco from Kentucky and Tennessee, and tobacco from Southern Maryland. Then in addition to these home-grown tobaccos we take tobacco grown in Turkey and Greece.

We believe these mild, ripe home-grown tobaccos with the high ammonia and the high kinds of nicotine. Then, instead of just mixing the tobaccos together, we blend and cross-blend them so that all the different flavors go together to form full flavor— the Chesterfield taste that so many smokers like. Naturally blending of black and loud done in Chesterfield gives the cigarette a pleasing taste and aroma. To test and sell they build.

COMMUNICATIONS

Editor State College News:

- What’s up? Don’t our class presidents know how to hold a dinner? Or have they a fear of introducing speakers? Or are we all abandoned individuals? Or is there really a possible excuse for our lament? Do class banquets this year just aren’t? We remember banquets in the past. Maybe they were pretty bad. We try to desire that you can see and eat. We wish others’ addresses bigger and better—especially better speakers. But despite these faults, we had a good time. We made friends and got ideas—a few but some.

If banquets were improved along the lines we suggest, certainly a great deal of worth could be derived from them. Even if it were merely a change from staying home to socializing, an evening of good food and talk that is worth at least half the cost of attending.

How’s about it, leaders?

I'M HERE TO HELP COLLEGE STUDENTS
As a former student, I know what it means to be a college student. That's why I'm here...to help you stay mentally and physically healthy. I want to share my experiences and help you succeed at college.

WHEN I COME OFF THE RINK, tired, I want a Camel. Camels have a way of taking the toad off my throat. And I've found that I can smoke all I want and still keep my nervous system healthy.

WHEN I WENT TO COLLEGE, I switched to Camel. I found that Camels are a great brand. They're mild and have a great taste. I was always able to enjoy them, even when I was busy with my studies.
