COMMUNICATIONS

A FALL DRINK CLEANING

At regular intervals it becomes necessary to clean the insides of drinking glasses. The glass should be washed in hot soapy water, then rinsed with cold water and dried. The handle should be turned toward the top. This prevents spilling and makes it easier to clean. The stem should be washed first, then the base. The base should be dried before the glass is set to dry.

ANIMALS: The most famous of all animals is the horse, which is also the most popular pet in the world. The horse is a member of the family Equidae, which includes the wild ass, the kiang, and the onager. In addition, there are many domesticated breeds of horses, such as the Arab, the Shire, and the Morgan. The horse is a hardy animal, capable of living in a wide range of climates, and is well adapted to a variety of uses, including riding, racing, and draft work.

Students To Do Junior Teaching

English Methods Group to Teach

BY MILDRED DIBBETTS

Junior instruction in English will be a part of the teaching program for the next year. This is the first time that such work will be included in the regular summer teaching program.

Activities of the group will be in the form of a teaching program, conducted by the group members, for middle and high school students. The program will be designed to help students improve their reading and writing skills.

Special Projects

Projects are being developed for the group to work on. These projects will be based on the needs of the group members and will be designed to help them improve their teaching skills.

Censures

The group has received censures from various members of the faculty. These censures have been based on the group's lack of progress in the teaching program. The group is working on improving its teaching skills in order to meet the expectations of the faculty.

Mild and yet they satisfy
—how do you do that?

Well, to start with, we take tobacco from our own Southland—mild ripe tobacco with lots of natural flavor but no harshness or bitterness.

THEN AS A SECOND STEP—We blend this home-grown tobacco with spicy, aromatic Turkish tobaccos from across the seas. These Turkish tobaccos, you may know, have a flavor and fragrance entirely different from our own.

AS A THIRD STEP—These tobaccos are cross-blended—welded together—the best way we've found to get a more pleasing flavor and a better taste in a cigarette.
