Teaching Posts Still Available Throughout State

A new semester is under way at many of the state's junior and senior colleges, and although many teaching positions are filled, a number of them remain open. The Division of Elementary Education reports that of the 1284 teachers working during the current year, 236 are holding temporary appointments. This means that although 578 teachers have a minimum of $2000 and $2400 as maximum, they have a higher average than any other group. The division also states that the state has raised its expenditures for education to $59,300,000, more than double what it was in 1929. It is expected that the enrollment will increase by 10 percent by the end of the year.
