by Mike Pooler

The Danes of Central and the Springfield College men

battled the Brute Slate of Connecticut for the second year in a row

and for the second time in three years.

The Danes had scored the first two goals of the game, but the Brute Slate regrouped and scored the next three goals.

Spencer's men finished with a 1-3 record.

The Danes are currently 3-4-3 overall.

The Danes' next game is scheduled for next Saturday at 2:00 pm at Springfield College.

**State Quad Favors Bottle Return**

By Steven Beanson

The State Quad editorial board favors returning bottles to the campus in order to increase revenue. "The University, as a whole, has the potential to generate significant income through the sale of campus bottled water," the board writes. "We recognize the importance of maintaining a comfortable and clean environment on campus and believe that returning bottles would contribute to this goal." The board notes that the initial cost of setting up a return system would be high, but over time, the benefits would outweigh the expenses.

**Firearm Controversy Continues**

By Jack Peterson

Last Friday a meeting of SUNY officials and students was held to discuss the possibility of bringing background checks for firearm owners to campus. "We want to ensure that all those on campus are responsible with their firearms," said one student advocate. However, the meeting did not yield any concrete solutions. The controversy continues as the debate over firearm access on campus rages on.

Turkey Dinner Hosted by Refer

The researchers said theirs is the first study to show that the birth control method, the IUD, may cause serious health problems. The study found that there were about 15 deaths among women who continued to wear the IUDs after they failed to have their IUDs removed. The researchers said that, because of the danger, patients should have their IUDs removed at the first sign of pregnancy. However, about 2 per cent of the time they fail, and women become pregnant. The study says that if these women fail to have their IUDs removed, they run a risk of dying from infection, or severe complications that may be serious. The study did not include data on other IUD types.

The Society of Physics Students announces a LECTURE SERIES
Scientist in the Physics Department speaking on their research, presented at an undergraduate level to give interested students an understanding of research techniques and what is involved in research.

First Lecture: November 23, 8 P.M. in the Physics Lounge
“Electronic Nuclear Double Resonance of Biomolecules” presented by Dr. Charles Schubels

Future topics will include:
“Super Ionic Conductors”- Dr. H. Story
“A Solid State Theorist Looks at Hemoglobin”- Dr. T.P. Das et al.

Check the ASP for listings of future lectures

IUDs May Cause Difficulties

October 21, 1976

-- groceries in the Tri-City area who, according to the latest survey, have no way of getting to the church, can call at 434-1202 and arrange transportation. The dinner will be held at the First Presbyterian Church at the corner of Main and Washington Streets. The church is located near the Canadian border, near Mon­tana. The dinner will be held from noon to midnight on Sunday, November 21.

ABERDEEN, N.Y. (AP) is an attempt to reduce accidents, the state will soon begin testing various law-enforcement agencies with radar "guns" to help deter drivers from speeding. The so-called "speed guns" can be used on a dashboard or carried by police officers.

The breath-testing equipment used will be distributed to law enforcement agencies in the state. The equipment is accurate to within one mile per hour and can detect speeds of up to 70 miles per hour. Officers said that, because of the danger, patients should have their IUDs removed at the first sign of pregnancy. However, about 2 per cent of the time they fail, and women become pregnant. Earthquakes and Sex Fill Life for New Guinea Tribe

Earthquakes and sex have filled the lives of the Dani, a New Guinea tribe, for centuries. The Dani, who live in a remote valley in the highlands of Papua New Guinea, inhabit a place where the earth's crust is constantly shifting and the cultural practices of their ancestors are deeply intertwined with the land.

Earthquakes are a common occurrence in the Dani's valley, which is located in the rugged mountains of New Guinea. The Dani believe that these earthquakes are a sign of the gods' presence and are a powerful force that shapes their lives. They have developed a number of rituals and practices to appease the gods and prevent further earthquakes.

Sex is also an important part of the Dani's culture. The Dani are known for their unique sexual practices, which include both heterosexual and homosexual activities. The Dani believe that sex is a sacred act that is closely connected to the earth and the gods.

Despite the challenges of their environment, the Dani have managed to maintain their cultural traditions and way of life. They are known for their resilience and resourcefulness, and have adapted to the harsh conditions of their mountainous homeland.

In recent years, the Dani have become the subject of scientific study, as researchers seek to understand their unique way of life. The Dani are a reminder of the importance of preserving cultural diversity and the need for continued protection of the world's endangered cultures.
where does my $66 in student tax money go?

To the Editor:

I think there is a redundancy on the part of those of us who are students to name any problem we may have. I have been a summer student at the Albany Law School and I suspect that the problems we have are not the only ones. I am sure that many of our fellow students feel the same way and would like to know what the problems are so that they can be solved.

Looking ahead! Open up to the centerfold and see how your money is being spent.
The Art of Film: Eisenstein's Art as Collision

By Jon R. Hand

In the late 1920s, Sergei Eisenstein, the Russian filmmaker, revolutionized the cinematic language with his theories of montage and his innovative use of visual and aural elements. Eisenstein's ideas were a product of his Marxist ideology and his belief in the power of cinema to convey complex ideas and emotions.

Eisenstein's montage theory was a radical departure from traditional narrative filmmaking. He believed that cinema could transcend the limitations of language and convey ideas through images and sounds. He developed techniques such as cross-cutting and slow-motion editing to create a sense of time and space.

Eisenstein's most famous works, such as the seminal film " Battleship Potemkin," are characterized by their use of montage. The film's opening sequence, for example, is a montage of events that create a sense of unfolding narrative and emotional rhythm.

Eisenstein's ideas were influential not only in cinema but also in other art forms. His ideas about montage have been applied to areas such as photography, music, and even architecture.

Today, Eisenstein's theories continue to inspire filmmakers and artists around the world. His ideas remain relevant in an era where digital technologies have transformed the way we create and consume media.
A Cacophony Array of Dishes
Courtesy of the Patroon Room

By SCOTT THOMAS

From the corner of the Patroon Room, the cafe at the center of the campus, you could see the cafeteria—U.S.A.'s Poster Room. It was a small room in a large building, but it was the perfect place to relax and enjoy a meal. The menu was simple—burgers, fries, and shakes—but the food was delicious. The waiters were friendly and the atmosphere was relaxed. It was a great place to grab a quick bite during a break or after class.

The Patroon Room, a different type of on-campus eating place.

New English Dictionary Features Modern Words

SPRINGFIELD, Mo. (AP) — The latest edition of the dictionary features words such as "hang ten," "gobsmacked," "alkali," "homophobia," "ergastulating" and "hang in there." The dictionary is the fourth edition of the Springfield dictionary, and it features more than 200,000 words and phrases.

The dictionary was released on Monday, and it includes new words and phrases such as "hang ten," "gobsmacked," "alkali," "homophobia," "ergastulating" and "hang in there." The dictionary is the fourth edition of the Springfield dictionary, and it features more than 200,000 words and phrases.

SA FUNDED GROUPS: 
BUDGETS and APPROPRIATIONS
(or, where does my $66
In student tax money go?)

BUDGETS: SA groups its funded organizations into categories, each category is here, except for the emergency spending line (see text), some groups are separated out of their categories. They are groups that have appropriations greater than 2%. Budgets are total dollar amounts that a group spends.

ON THE CHARTS...

While both of the accompanying bar graphs are useful in comparing them, the budgets diagram the total amount of money a group deals with, the appropriations graph depict how much students can spend. The difference represents a group's income. That income could come from students, that is used by its groups). Telephone, dues list a portion of the tax money SA takes in is not made available, and some of the cultural groups. As the activities of the group grows, the SA will appropriate more than 500,000 dollars to Student Association that inflates the total fund of student tax money ($600,000). Groups with more than 3% of the appropriation total are separated out of their category.

PERSPECTIVE ON THE FACTS...

Thirty-three dollars per semester is charged to every student, and some of the cultural groups. As the activities of the group grows, the SA will appropriate more than 500,000 dollars to Student Association that inflates the total fund of student tax money ($600,000). Groups with more than 3% of the appropriation total are separated out of their category.

SOME EXAMPLES...

Next I would like to illustrate the budget information available above. Some organizations, these groups are, essentially, commercial. It may be helpful to look closely at the budgets of a few groups, to get an idea of what types are available about the Student Association, these graphs are, essentially, graphs. A small group: Entrepreneurial Science Club—$85,000. This group has one (of) a division of the budget mentioned for a particular purpose, SA Services line which permits them to use SA Services such as overtime paying with the money that it has. In this case, it is $25. This group has more than one (of) the budget and appropriations are both $25. Their appropriation is four thousand dollars of one per cent of the total SA fund. The budget is budgeted at two thousand dollars of the total SA fund. That amount is 0.7 per cent of SA groups. This club is classified in the charts as a saurian club. A medium sized group: Viewpoints—$17,200.

A big group: University Concert Board—$92,000. This group joins together the financial handbook. It has four lines in its budget, seeking $2,000, $2,000 in advertising income, $1,000 in its Unco Board surplus which has accumulated over the years to $12,000. The bulk of programming done on campus is done by the Quad. The club is classified in the charts as a medium sized club. The University Concert Board—$92,000. This group is classified in the charts as an academic club. A big group: University Concert Board—$92,000. This group joins together the financial handbook. Dmitri Shostakovich's Music Versus the Communist Party

By Stephen Alman

The performance history of the music of Dmitri Shostakovich (1906-1975) is one of the most remarkable stories of the century. The composer, then only 19 years old, revealed a significant awareness of the openness of the avant-garde nature of his first symphony. In 1926, his first symphonies of the late Dmitri Shostakovich (1906-1976) reads like a Bolshevik diary. In 1926, his first symphonies of the late Dmitri Shostakovich (1906-1976) reads like a Bolshevik diary. The opening movement is atonal, more surprising in view of the avant-garde nature of his first symphony. The Symphony before its first performance was banned by the Communist Party regulars is the most advanced example of Shostakovich's choral music through thick and thin is mounted in a 1926 festival. The opening movement is atonal, more surprising in view of the avant-garde nature of his first symphony. The Symphony before its first performance was banned by the Communist Party regulars is the most advanced example of Shostakovich's choral music through thick and thin is mounted in a 1926 festival.

**Recordings**

**Furry by JEANNE SAINTZ**

Still a Byrd but Furry has new wings to fly. His new record, "Furry," is a blend of folk and rock that is sure to please fans of both genres. Furry's voice is strong and clear, and his melodies are catchy and memorable. The recording is produced by renowned producer, Bob Dylan, who has worked with many of the biggest names in the music industry.

**Cardiff Rose by ED MIESCH**

Cardiff Rose is a folk rock band from New York City, and their latest album, "On theoutside," is a departure from their previous works. The album features elements of country and jazz, and the band's sound is a pleasant mix of these genres. "On theoutside" is a thought-provoking album that is sure to appeal to fans of folk rock music.

**Springsteen Makes Return**

Bruce Springsteen made a triumphant return to Oakland, California, on Monday night, with a set of old favorites and some new material. Springsteen's show was a sell-out, and the crowd was electric. He opened the show with "Born to Run," a classic track that has been a staple of his live shows for decades. The audience sang along as Springsteen played his hits, and the energy was infectious. The show was a testament to Springsteen's enduring popularity and his ability to connect with audiences around the world.

**WHO THE HELL IS GEORGE BENSON?**

$55 General Public

On sale at: SA Contact Office

**Catalogue/Review**

George Benson has been considered a jazz-rock artist for more than a decade. Recently, he is noted for his "Breezin," one of the largest selling jazz albums in history. If you've heard his hit single "This Masquerade," then you know Benson has a light, tasteful approach that's hard to resist. However, his albums show that he can really rock on guitar, without losing his light touch. Not surprisingly, Benson's achievements have won him the Playboys All-Star Poll, a Grammy nomination, and the loving support of a loyal following. This review is encouraging for fans of Benson's music.

Lloyd Hollings

and girlfriend . . . and the ethics

To the Editor:

We are writing in response to the article in the paper that is the ASP of Tuesday, Nov. 16. We understand why the article was important to be printed, but we feel that the information that the Albany Police are stating about the student who was arrested is not a large portion of the SUNYA population. However, we also understand why the names of the arrested student were included in the article. The impact of the article would not have been enough had their names not been included, but we feel that the article was not necessarily needed to show the severity of the situation. Nothing could be done to stop the students from being charged with felonies, but the names needed to be included in the article.

We want the students who were arrested to be treated with dignity, but we also want the students who were not arrested to be treated with dignity. The students who were not arrested should not be threatened or humiliated because of the actions of the students who were arrested. We believe that the ASP should have considered the implications of the article before deciding to print it.

To the Editor:

As co-writers of the Basketball Trip, there are a few points that we would like to address to the readers of the ASP. We believe that the article that was written about us was not accurate. We understand that the article was written in response to the suspension of the basketball team, but we feel that the article was not necessary. We believe that the basketball team should have been given a chance to defend themselves before being suspended. The article was written in a way that was not respectful of our team, and we believe that it was unfair to both our team and the readers of the ASP.

Where Have All The Revolutionaries Gone?

"Where Have All The
Revolutionaries Gone?"

by Thomas Murrail

This year, the SUNY campus has been "hijacked" by student demonstration, demonstrations on the campus and across the nation. These phenomena may make angry, disengaged children claim about the student, not too long. The scene, the age of Johnson's and youth and "White" and "Black" picketing, are now considered a bygone era. They have yet to be explained by the student riots, the age of consciousness, the fact that it was finally happening. We have yet to see the historical era of student protest. This year, there have been more protests, but they are more subtle and more difficult to define. It's a new generation, not a new generation.

For example, throughout the entire Colonial Quad Parking Lot, the students have gathered in groups. They do not seem to support the same goals or share the same leaders. Some are here to express their dissent, some are here to demonstrate, some are here to change the system, some are here to make a change, some are here to change the world, some are here to start a revolution, some are here to change the system.

Another thing to watch this year is the SUNY student protest. In the past, the student demonstrations have been more violent, more confrontational, more disruptive. This year, the demonstrations have been more subtle, more indirect, more covert. The student demonstrations have been more subtle, more indirect, more covert. The student demonstrations have been more subtle, more indirect, more covert.

Women Gymnasts Will Open December 3

by Christine Bedford

The Albany State Women's Gymnastics squad will test their skills this weekend before the season's real action begins. With the university's new competition gym being constructed here this fall, the team will be able to enjoy a home court advantage in the future.

The Colonials will open their season Thursday, December 3 against New Paltz. The Colonials return after last season's first place finish in the Empire 8 Conference.

According to Cohane, this year's Colonials are a different team from last season. "We have a strong team and a stronger team," said Cohane.

This year's team includes two freshmen, two sophomores, two juniors and a senior. Cohane said, "We have a strong team and a stronger team."

The Colonials will open their season Thursday, December 3 against New Paltz. The Colonials return after last season's first place finish in the Empire 8 Conference.

Expecting a "real contribution" from the freshmen recruits, Cohane said, "They are also expected to significant contributions." When u two-person team entered this year, "we have a stronger team and a stronger team," Cohane added.

The Colonials are favored to repeat as the Empire 8 champions. "We have a strong team and a stronger team," Cohane said.

Also of promise are the consistent routines of Hillary Kaufman on the unevens and Debbie Lobin. The latter displays some "very good basic skills," Cohane said.

The Colonials have stepped up also. "I think we have a stronger team this year," Cohane said.

The Colonials have stepped up also. "I think we have a stronger team this year," Cohane said. Cohane said, "We have a strong team and a stronger team." When u two-person team entered this year, "we have a stronger team and a stronger team," Cohane added.

Dollar Bill Playing On Long Bench

(AP) "I don't feel my age," says Bill Bradley with a smile. At 20, the Providence and Rhode Island junior is setting down in the New York Knicks' backcourt as one of the nation's top free throw shooters.

After three years in college, the 6-6 center Bradley was drafted by the Knicks in the first round this past June. He arrived in New York in time for the Knicks' exhibition games in Europe. Bradley indicated he is not concerned with his age.

"I've made that decision, and I hope I can carry it on," he said. "I'm still trying to find out what I need to do to be ready. I don't know what those other things are.

"It's a rhythm thing," he explained. "The only thing you have to know is that you need to do the right thing when you're in there. It's a matter of getting into it and everything else will follow.

Bradley has known about the free throw game for a long time. When he was 13, he started working on it and he has been setting a goal of shooting 90 percent for a long time.

"I think it's important that the younger players see what the Knicks' veterans do," he said. "They're hard workers, and they're hard players. They're all the way from the bottom to the top.

"I think they're working hard, and they believe in one another," said Coach Pat Riley.

"I'm very pleased with the team," he said. "I think we've got a good team.

"It's off and churning tomorrow as the season begins. A Foley spike attempt then landed the ball out of bounds. The visitors were behind by one at that point. The visitors were on the court for the last five minutes of the game and were ahead by two in the final seconds.

Swimmers Host Relays Tomorrow

Albany's Mitch Rubin shows his form in the butterfly. Rubin, a co-captain on this year's swimming team, is beginning his fourth season of collegiate swimming. Mitch, a three year varsity veteran, holds quite a number of school records. He also do much of the distance swimming.

The swimming program was funded by student association contributions and has hopes that "this will be a winning season." Coach White has had two consecutive 5-5 seasons and has hopes that "this will be a winning season."
**Harriers End So-So Season**

by Mike Colao

In the NCAA's, the prestigious New York City meet that sets the stage for a track season, the Harvard University track and field team had a mixed showing. Notably, the team had been successful in previous years, but this season proved to be a disappointment. The team's performance was lackluster compared to their expectations, leading to mixed feelings among the team members.

**A Piece of Pie**

The Season That Wasn't

by Mike Colao

It was the last day of the winter season and the team was gearing up for the next game. The coach had set up a special practice session to work on their weaknesses and prepare for the upcoming competitions. The players were eager to improve andace their previous performances.

**Psych Dept Promotion Criteria Questioned**

by Bill Gidley

The promotion criteria for the psychology department at SUNY has been under scrutiny. The criteria for promotion were questioned, and some faculty members have expressed concerns about the fairness and transparency of the process. The questions raised include the need for a more comprehensive evaluation of the candidates' work and the ways in which they are assessed.

**City Neglect Cited In Recent Fire**

by Brian Holden

The city of Albany has faced criticism for its neglect in recent fires. The latest incident involved a fire at a warehouse that resulted in significant damage. The community has called for better fire safety measures and improved response times from the city's fire department.

**Spikettes Finish With Flourish**

by Mike Colao

With a strong showing in the final meet, the Spikettes concluded their season on a high note. The team's efforts were rewarded with a well-deserved victory, cementing their place among the top teams.

**Spikeless**

Spikeless Matt Weilberg makes on easy-the-shoulder return in third game of Collegetown match, Wednesday. The harriers lost the but game won the second with a 15-4 win in the match before defecting.

**Investigating Committee To Visit SUNYA Campus**

by Stephen Dominick

As an ACC committee investigating cross-country running, the committee will visit SUNYA to examine the program and its practices. The visit is expected to provide valuable insights into the program's operations and any potential issues.

**Tenure Committee Evaluates Nelson**

by Richard Dower

The tenure committee evaluated Dr. Nelson, who has been a faculty member at SUNYA for several years. The committee discussed Nelson's contributions to the university and his potential for continued growth and excellence in his role.

**Albany Fire Department and Laboratory**

An Albany Fire Department and Laboratory study found that the fire was caused by a spark igniting a flammable material. The findings were based on a thorough investigation of the scene and evidence collected at the site.

**Resigning Program Director William Stearns**

by Richard Dower

Program Director William Stearns announced his resignation from his position. Stearns cited a desire to pursue other opportunities and contribute to the college in a different capacity. The news was met with mixed reactions among the faculty and students, with some expressing support and others seeking a clearer explanation of his reasons for leaving.
