Dr. Lanford, Former "Rat," Continues Chemical Research

Continued from Page 3

Dr. Lanford's work in chemistry may be regarded as pure research. His recent work involves a study of the effect of various metals on bacterial growth. He has found that silver and copper are the most effective metals in inhibiting bacterial growth, while zinc and lead have little or no effect.

The results of this research have implications for the development of new antibiotics and other antimicrobial agents. Dr. Lanford is also working on the synthesis of new antimicrobial compounds, which he hopes may prove useful in the treatment of bacterial infections.

College Sunday Service To Introduce Dr. Stokes

Rev. M. E. Stokes, pastor of the First United Methodist Church of Albany, will conduct the College Sunday Service at 2 p.m. on Sunday. The service will be held in the college chapel and will be open to all students and faculty members.

In his sermon, Dr. Stokes will discuss the role of faith in the life of the college community and will encourage students to develop a deeper understanding of their faith through participation in religious activities.

Business Seeks Trained Employees

Conning the Campus

The most pleasing and amusing item of the day was the "Conning the Campus" game. Both Mr. Miller and Miss Miller, the president of the Student Association, have been given a chance to "Con" the campus. The game consists of having the president of the Student Association "Con" the campus on a given day. The "Conning" is to be done in a manner that is not too obvious, so that the president of the Student Association will not be noticed. The game is to be played on the campus on a given day, and the president of the Student Association will be given a chance to "Con" the campus. The game is to be played on the campus on a given day, and the president of the Student Association will be given a chance to "Con" the campus. Explanations Are in Order

By the Editors of the Statesman

The Statesman is a weekly newspaper published at the State College of Washington. It is the official organ of the State College of Washington and is supported by the students. The newspaper is published every Thursday and is distributed free to all students. The Statesman is financed by advertisements and subscriptions. The Statesman is run by a board of editors, composed of students, and is published by the Statesman Press, a nonprofit corporation.

No excuse for not attending today's assembly. The only thing that mattered was that the Statesman Press was there to represent the Statesman.

Attention Men—Typical State Coed Proves Existent; She Prefers Individualism, Dating, Early Marriage

At Meeting of State Men

By Hale, Bulger, Semanek

Those in Draft—Sidney Leary, 42, charged with the college's draft work last year, said the list of men being listed for the Selective Service was published this week. Leary was given the title of acting president last year, because of the high employee turnover, and the list was made up by the Student Employment Bureau. It was compiled by the State College student council.

Leary asked that candidates for the early marriage consider the possibility of the marriage in the future. She stated that she was interested in the marriage and that she had something to say about it. She stated that the marriage was a matter of the future, but that it was not something that could be handled out of the marriage. The marriage would be recommended by the Student Employment Bureau.

Leary explained further that the marriage was a matter of the future, but that it was not something that could be handled out of the marriage. The marriage would be recommended by the Student Employment Bureau.

The meeting disclosed the fact that Mr. Leary was the first member of the Class of 1941 to obtain a teaching position. He went on to explain the requirements for admittance to the teaching position. He explained that the drafted men would be recommended by the Student Employment Bureau.
