OLD RIVALS TO MEET

Game with St. Lawrence

The annual St. Lawrence game will be played on Saturday night, February 11. The St. Lawrence quintet has the reputation of being one of the finest teams in northern New York, and State is putting in a strenuous bit of training preparatory to this game. The game with St. Lawrence last year was lost by a very close margin, and everything points to a victory for State this year.

The game will be played in Albany High School gymnasium, and dancing will follow the contest. Everyone will be required to show their student tax tickets at the door before being allowed admission. Be sure you bring your tax ticket.

BASKETBALL BANQUET

Girls' Get-together

The annual girl's basketball banquet will take place in the cafeteria Thursday, February 9, at 6 o'clock. The aim of the banquet is to bring together all of those girls who have come out for basketball practice at any time during the year, even though they are not on the team. This banquet will not be the kind you read about, with eleven courses or et cetera, but ten times better, because it will be peppy and funny.

Helen Washbrough, maids mistress and Miss Bennett, Dr. Crossdale, Dr. Evans, and the captains of the four teams will speak. It is expected that Miss Card, who taught Physiology at John Boyd Thacher Park, will be present to speak at the banquet.

After the banquet the girls will have a theater party at Proctor's Hall as a fitting climax to the evening's event for Junior Week End.

INIRMARY RULES

Infirmary Rules

There has been some misunderstanding about admission to the Infirmary. As a fitting climax to the hospital authorities must have proof that the person entering the hospital is cared for by the infirmary fund. The slip is the proof, and it is also evidence to Dr. Crossdale of treatment received, for it is returned to her with the physician's report on it. If anyone is ill, he should notify Dr. Crossdale before entering the hospital. A copy of the slip follows:

NEW YORK STATE COLLEGE FOR TEACHERS
Albany, N. Y.
DEPARTMENT OF HYGIENE

Date: ___________________ 19 ___________________

This is to certify that __________________________
has been admitted to seek hospital care.

Condition __________________________

Signed __________________________ M. D.

College Physician

Infirmary Rules

INFIRMARY RULES

In the Infirmary, all patients are required to fill out the following form for admission:

Date of entrance __________________________

Date of discharge __________________________

Diagnosis __________________________

Signed __________________________ M. D.

FACULTY NOTES

State College congratulates its president, Dr. A. R. Brumbaugh, on his excellent literary contribution to the January issue of Scribner's, a periodical. The subject is The Mother Tongue in School, and it is handled in a most clever and fascinating manner. Its style and thought are highly progressive and interesting.

Dean Pierce attended the annual meeting of the Women's Foundation for Health in New York City on February 3. She represented the Health Committee of the National Association of Deans of Women, of which committee she is the secretary.

The bill for the purchase of the land between Washington Avenue and Western Avenue for the use of State College has been read twice and referred to the Finance Committee, of which Senator Charles H. Hewitt is chairman. Two of the leading real estate men of Albany have agreed upon $70,000 as a reasonable and just price. Let all of the students who know Senators and Assemblymen urge upon them the necessity for the immediate passage of this bill.

STUDENTS' CONCERT AT CHANCELLOR'S HALL

One of the largest and best concerts ever given by the State College Music Department will be held at 8 o'clock, Friday, February 10, at Chancellor's Hall.

Since the concert is given for the benefit of the college students and faculty, practically every member of them will attend. Undoubtedly, there will be also a large number of outsiders present. We hope that the students will cooperate in advertising this concert. Don't forget that you are admitted on your student tax ticket and that for outsiders there will be an admission of fifty cents.

The concert will be one of the best of its kind because of the very good program and because of the musical talent exhibited. The college chorus, which exceeds all in most other colleges, will appear in their first real concert this year on Friday evening. From their number several good soloists have been chosen.

Miss Tompkins, one of the best, if not the best, sopranos in the city, will sing in the cantata.

The orchestra, which at all its performances has been extremely high, will play several numbers. The program follows:

I. (a) Marche Militaire... (b) Hungarian Dance No. V...
II. (a) Preludes... (b) Strauss College Orchestra
III. (a) College of the Empire State... (b) Wakes, Miss Lindy, Warner... (c) Lullaby... (d) Woman's Club Orchestra

Mr. John H. Cook, superintendent of the Albany Public Schools, is to receive a personal notice of the concert by mail.

GOOD EATS, GOOD MUSIC

The New York Alumni Branch will hold its annual reunion at the Aldine Club, 70th Avenue, New York, on February 23. The dinner at 6:30 will be followed by a dance till twelve. Bring a friend. Good eats, good music, and a good time. Tickets are fifty cents, including dues. If you do not receive a personal notice of this meeting and should like to attend it, please notify Ethel M. Rooney, Sayville, Long Island.

COLOR IN LIFE

Mr. John H. Cook, superintendent of the John Boyd Thacher Park, at Indian Ladder, will give an illustrated talk on the above subject, Color in Life, Wednesday evening, February 8, at 8:00 o'clock, in Room 250. An invitation is extended to all by the Chemistry Club, under whose auspices the lecture will be given.

The New York Alumni Branch will hold its annual reunion at the Aldine Club, 70th Avenue, New York, on February 23. The dinner at 6:30 will be followed by a dance till twelve. Bring a friend. A FABLE BY AESOP, JR.

Once upon a time, in the land of a long ago, the king had a mighty
 councillor among his advisors. Now this councillor was stricken
 with a very bad cold, whereby he
mourned much. And he searched
his new counsellors, but none could
pose to the king that he
a house, and few men from
 whom he would choose his chief
counsellor and test their wisdom.
So the king brought together cer-
tain men and questioned them con-
cerning their wisdom in the affairs
of the kingdom. And each man chipped his answers on a stone tab-
et. And as they were together in the
room, the king gazed at all the men
and favored. But as he was gazing,
he spied his eyes on the one that he
had seen. For the favored one
a large extent, is the college
lege is interested in the promotion
of our oyster-type associates, men
and women of the ears-open, mouth-

The Donkey and the Oyster

Among the various types of our
associates there are two which are readily
decipherable — the donkey and the oyster.
From A Faint Blue Glow
To Modern Miracles

THOMSON saw it first—a mere shadow of blue light streaking across the terminals inside an imperfect electric lamp. This “leak” of electric current, an obstacle to lamp perfection, was soon banished by removing more air from the bulbs.

But the ghostly light, and its mysterious disappearance in a high vacuum remained unexplained for years.

Then J. J. Thomson established the electron theory on the transmission of electricity in a partial vacuum—and the blue light was understood. In a very high vacuum, however, the light and apparently the currents that caused it disappeared.

One day, however, a scientist in the Research Laboratories of the General Electric Company proved that a current could be made to pass through the highest possible vacuum, and could be varied according to fixed laws. But the phantom light had vanished.

Here was a new and definite phenomenon—a basis for further research.

Immediately, scientists began a series of experiments with far reaching practical results. A new type of X-ray tube, known as the Coolidge tube, soon gave a great impetus to the art of surgery. The Kenotron and Pliotron, followed in quick succession by the Dynatron and Magnetron, made possible long distance radio telephony and revolutionized radio telegraphy. And the usefulness of the “tron” family has only begun.

The troublesome little blue glow was banished nearly forty years ago. But for scientific research, it would have been forgotten. Yet there is hardly a man, woman or child in the country today whose life has not been benefited, directly or indirectly, by the results of the scientific investigations that followed.

Thus it is that persistent organized research gives man new tools, makes available forces that otherwise might remain unknown for centuries.

Jane Scallen—Joseph Murphy
Twylla Jan—Herald Lynn
Marion Miller—Parker Decker

**NATIONAL STUDENT MOVEMENT**

Continued from page 3

will be welcomed. The Press has shown interest in the movement and many prominent people have endorsed it. The Secretary to the Advisory Committee of the American Delegation to the Disarmament Conference, Mrs. Eleanor Franklin Egan, has said, "Your work is of paramount importance to us, who are now engaged in perfecting the instruments of peace. We shall soon be gone and the future of our labors is now in the hands of your generation."

Col. William Boyce Thompson, of the American Delegation to the Conference on Limitation of Armaments has said that editors in college papers in connection with the student conferences and the armament would be excluded and sent to him for the permanent records of the Delegation.
