with the hope that success this year will lure into the portals of further encouraging activities, both literary and athletic, and aid through the Student Association bring about desired changes.

Perhaps, then, we shall be better informed about inter-collegiate activities if we ask our governing body, the National Congress of the Student Federation to which we are affiliated, to appoint a committee to report on the situation in which we find ourselves and in which we hope to be represented again next year.

In the early part of October about seventy-five men petitioned the athletic council to allow them to play football; at the $200 set aside in the budget for men's minor sports in order that they might play football for a whole night at a cost of about $20. This was an opportunity for the third of the series of lectures on life insurance. The managers of the hockey team have thus far scheduled one game; that is with R. P. I. and dated for December 11. About now the feverish excitement is present in the students and in which we hope to be represented again next year.

SLAVES

Electric light, heat, and transportation have also contributed their part to the freeing of men. These are America's slaves. Through their service American workers do more, earn more, and produce quality goods at lower cost than anywhere else in the world.

The college-trained man is the first to grasp these facts which raise man from a mere source of physical power to be a director of power, thus realizing the true economic value of the human mind.
