Reaching Out for MS Money

Teresa Jones, a volunteer for the Capital District Florist, donated roses, carnations and pom-poms to the Capital District Florist to support the Multiple Sclerosis (MS) community. The MS community is reaching out to SUNYA students through the Campus Chest.

Multiple Sclerosis, often called the great crippler of young adults, results in deterioration of the nervous system. It can affect any part of the system, and it is progressive in nature. Patients with MS may face medical care, counseling, and social activities. The MS community is reaching out to SUNYA students through the Campus Chest.

Ford No Friend of Ecology

NYPIRG Study Reveals

NYPIRG study revealed that Ford is not a friend of ecology in New York State. The study found that Ford did not come forward with a plan to reduce pollution and air pollution.

- Ford was not willing to invest in new technologies to reduce pollution.
- Ford's spokesperson said that the company was not interested in reducing pollution because it was too expensive.
- The study also revealed that Ford was not willing to reduce its carbon footprint.

PROBE-ing Too Far

Central Council made some bold and abortive moves in trying to re-establish some of the authority and respect it has consistently relinquished to the Executive Branch of Student Association over the past three years. Council's claim to have been deprived of more than its fair share of power and prerogatives in the past led members to believe they had to fend for themselves, but the situation in which the student government finds itself is not one of power, but suicide.

The original conception of PROBE as it was planned by Curran allegedly was one of coercion and acquiescence to student demands. The purpose of coercion and acquiescence to student demands is not power, but suicide. The new PROBE bill attempts to allay the fears of some Council members while at the same time it is drawing the ire of some student groups on both sides of the issue. The bill was defeated by a vote of 3-5. The seven abstentions aroused the ire of some Council members who on both sides of the issue, supported by a narrow one-vote margin of 7-6.

We are sure that Curran never had any of these potentially power-aggrandizing ideas in mind when he conceived of PROBE, but the mission of PROBE would live on and continue to wrack the internal workings of Student Association. The establishment of some future investigation into student groups was not categorically ruled out. Information gathered could be used by S A in dealings with these groups. We are sure that Curran never intended for PROBE to be used for the purpose of coercion and acquiescence to student demands.

The potential dangers of a PROBE are obvious. First, any semblance of respect the Administration for students would be ensured as they learn that students are more than just a part of the Organization. Second, the spirit of cooperation and the possibility of some future investigation into student groups would be lost if Council members themselves. Third, the possibility of some future investigation into student groups would be lost if Council members themselves.

We are sure that Curran never had any of these potentially power-aggrandizing ideas in mind when he conceived of PROBE, but the mission of PROBE would live on and continue to wrack the internal workings of Student Association. The establishment of some future investigation into student groups was not categorically ruled out. Information gathered could be used by S A in dealings with these groups.

In light of the "Plumbers," information obtained through covert action, or for the purpose of coercion and acquiescence to student demands, is not power, but suicide.

For the discussion over the highly controversial PROBE, Central Council had originally voted to put a tab into Executive Branch, a process by which student members and non-Council members are required to leave the Executive Branch in order to be present at the meeting. The President refused to allow the PROBE bill to be put into Executive Branch. The bill sought to define PROBE specifically from the start, and made PROBE illegal.

Central Council did not accept the anti-PROBE bill, defeating it by a vote of 5-3. The seven abstentions aroused the ire of some Council members who on both sides of the issue supported by a narrow one-vote margin of 7-6.

The potential dangers of a PROBE are obvious. First, any semblance of respect the Administration for students would be ensured as they learn that students are more than just a part of the Organization. Second, the spirit of cooperation and the possibility of some future investigation into student groups would be lost if Council members themselves.

Wind Ensemble Needs Direction

by Huynh K. Brooks
Two works were highlighted Thursday at the University Wind Ensemble Concert. The UWE performed Vivaldi's Concerto for Two Trumpets and presented a new composition by student trumpetist George Goodwin's Allegro in D Fall. The two programs had a fine tone and a musical impact, an ideal feature for the band ...

Among Friends,

After Meeting Teachers

Who Sponsored His Lecture

That’s the trouble with English teachers, it’s so hard to
find them when you want them, but you always seem to
have them when you don’t.

You think about the English teachers and how
can find them like that, you can’t find a teacher.

You could have found any way you wanted to me
with a sweet taste, so gently,

And revive a hundred more in joy,

So as that of mine,

From the Frog's Mouth:  
On the Pine Bush

By Lorraine M. R. Miller

Over the past ten years the Pine Bush Region has slowly but painfully been drawn and gobbled, industrialized, converted, into what might reallynegligible. No, it's not really fragrant and "本土" minded. The struggle of a region to hold on is a war. The war is not just the development of the Pine Bush but will result in an ecological crime of the highest proportions.

More than unique natural beauty are involved. Through the work of students, private groups, and money-starved publics, the Pine Bush is worthy of preservation for the following reasons: 1) It is a perfect place to study nature. 2) It is a unique paleontological rarity. 3) It is a rare island of facies in an otherwise barren space. 4) The value of this region lies in its unspoiled beauty and its rare flora and fauna.

But the fight is not over. There is a battle for the Pine Bush. We must organize and develop an urgent movement to save the Pine Bush before it is too late. We cannot afford to lose this struggle.

It's merely a matter of time before he decides to grab my arm and, I try to ex-

Harriers Try to Defend SUNY Crown

by Mike Pichkani

Well, we all thought we might hit a bit of a lull in the season, but that didn't happen. The team looked strong and can't be denied. In fact, the fans are now talking about SUNYAC's championship prospects for the season. The team has been consistent and has been able to maintain its momentum throughout.

In truth, the football season is already half over and the Harriers are looking strong for the rest of the season. The fans are hoping that the team can continue its winning streak.

Batmen's Statistics Reflect Season

by Mike Pichkani

Well, we all thought the winter was over, but it looks like it's just getting started. The team is looking strong and can't be denied. In fact, the fans are now talking about SUNYAC's championship prospects for the season. The team has been consistent and has been able to maintain its momentum throughout.

In truth, the football season is already half over and the Harriers are looking strong for the rest of the season. The fans are hoping that the team can continue its winning streak.

Gridders Home Tomorrow Injuries Could Be Factor

by Les Kadner

Albany, N.Y. (AP) - Basketball's role in determining the outcome of a game was played out Tuesday night in a game between the University of Vermont and the University of Connecticut.

Without Brendan Haywood, Vermont lost to Connecticut, 87-77, in a game in which Haywood scored 20 points and had 12 rebounds.

Haywood is the leading scorer for the Catamounts, who are coming off a 77-73 loss to St. John's on Monday night.

Injuries could be a factor as Vermont tries to cross the finish line this season, which has been a tough one for the Catamounts, who have lost six of their last seven games.

"We've got a lot of things going on," said Vermont head coach Jim Magruder. "We've got a lot of injuries and we've got to get healthy."

Haywood has been out with a knee injury most of the season, and his absence has been felt on both ends of the court.

"He's a big loss for us," Magruder said. "He's a leader on and off the court."
