The decision of the Student Union to designate all campus buildings as smoke-free zones has prompted me to write this editorial.

I understand the concerns about second-hand smoke, and I do believe that creating a smoke-free environment is a positive step towards improving the health and well-being of our campus community. However, it is important to consider all perspectives and to approach this decision thoughtfully.

Firstly, let us acknowledge that tobacco use is a complex issue. It involves individual choices, social norms, and personal health. While the health risks associated with second-hand smoke are well-documented, it is crucial to recognize that tobacco use is a multifaceted issue that affects individuals differently.

Secondly, it is essential to consider the implications of this decision. While the Student Union's intention may be to promote a healthier environment, the impact on those who use tobacco products cannot be overlooked. Tobacco use, whether it be for smoking or vaping, is a personal choice that should be respected and supported as a way for individuals to cope with stress, anxiety, or other challenges.

Lastly, it is important to engage in open and inclusive discussions about tobacco use and the decision to implement smoke-free zones. This will allow for a comprehensive understanding of the perspectives and concerns within our community.

In conclusion, while the Student Union's decision to designate all campus buildings as smoke-free zones is a step towards creating a healthier environment, it is vital to approach this decision with sensitivity and thoughtfulness. Let us continue to engage in meaningful conversations that promote the well-being of all members of our community.

Mediocrity in Teaching

In an recent issue of a local paper, we were shocked and dismayed to read an article about the high percentage of mediocrity in the teaching profession. The article stated that only 20% of the teachers being hired were of high talent. This goes against our expectations of a profession that is supposed to be dedicated to the cultivation of young minds.

The problem of attracting over one million highly talented individuals to the teaching profession is a significant one. Our society relies on these educators to guide and inspire the next generation. The issue of mediocrity in teaching is a serious concern that needs to be addressed.

Fortunately, our college has some of the most talented faculty members. Our students are fortunate to have such an enriching learning environment. We should appreciate the work of our teachers and support their constant efforts to improve themselves.

The solution to this problem lies in the hands of our college administration. They should make every effort to attract and retain the best teaching faculty. This includes providing competitive salaries, professional development opportunities, and a supportive work environment.

In conclusion, mediocrity in teaching is a concern that affects the entire educational system. Our college, with its talented faculty, exemplifies the potential for excellence in the teaching profession. Let us work together to ensure that our educational system continues to flourish with the efforts of these dedicated educators.

By JOHNNY HOBBS

The Cardinals from Plattsburgh ripped the Peds when it counts. The most (scoring points) and went on to win, 81-76. They put the game on ice in the first two minutes so they needed it to be 10 lead. Motion opened up scoring with a driving layup. Coughlin scored the first point of the game and the Cardinals proved to be the decided edge at the end of the second half as they did the half 38, they could have bagged themselves a victory.

GAME STANDOUTS

The player award of the game has to go to Jack Potter of Plattsburg as he played in the lead in the first two minutes of play and kept them there with a splendid playmaking. He assisted the Cardinals in making a 12 point deluge in the first half. Cutting 13 points to bring the score to 15 in the first half and Fiber in the second half, who took over the scoring punch to enable his team to maintain the lead. Both of these proved the most effective in their roles.

There was no outstanding player for State as the team played a good dual game but just didn't have the fire power to get the job done. The Cardinals won the first 12-15 points in the first half but got 14 in the second half to give them their narrow win. The Cardinals used 15 references in the second half and did not lead by more than one point. Only four players scored for the Cardinals in the second half. The second half was a different story.

Mike Stuart had 24 points. Mike Stuart had 14 points, 13 rebounds, 10 assists, 8 steals and 2 blocks for the Cardinals. He was paced by Bob Sands with 12 points. KB was paced by Bob Sands with 12 points, 9 rebounds, 8 assists, 7 steals and 4 blocks for the Cardinals.

If you want a high scoring attack, this is the school of the first half. KB could have scored more than 49 points in the first half but only got 14 points in the second half. KB's defense was not up to par. The Cardinals could have scored more than 49 points in the second half but only got 14 points in the second half. KB's defense was not up to par.

In the second half, the Cardinals had 13 points. Mike Stuart had 13 points, 10 rebounds, 8 assists, 6 steals and 3 blocks for the Cardinals. He was paced by Bob Sands with 12 points. KB was paced by Bob Sands with 12 points, 9 rebounds, 8 assists, 7 steals and 4 blocks for the Cardinals.

Forum Sponsors 'Great Discussions-'60'

The Forum Sponsors, the debating honor society of the College, will present a debate on Tuesday, February 10, in the Forum. The topic of the debate is: "Resolved: that the United States should withdraw from its membership in the United Nations." This will be the first debate of the year, and the audience is invited to participate by sending their opinions to the Debate Chair, Mr. J. Goodwin, before Friday. All students, faculty, and alumni are encouraged to attend.

Dual Filter Does It!

Filters as no single filter can... for mild, full flavor!

Here's how the Dual Filter does it:

In dual filters, a unique new kind of Activated Charcoal, also called "ion exchange resin," is used. This adsorbs and traps any organic material before it ever makes contact with the coffee or tea. Then, in the second filter, a unique new type of paper removes all the down to the last trace of impurity. This makes it unnecessary to use water filters or water softeners to get the very best taste from your favorite coffee or tea.
