NEW ADMINISTRATION MAJOR FILLS A PLACE LONG FELT HERE

A definite step forward has been taken by the College in the addition, announced today, to take effect next fall, of a new Administration Major.

The value of such a major is undoubted, and there will be few men in future who will be prepared to fill the place which it will be designed to fill.

This new major is designed as a vehicle by which the student is given an opportunity to study the principles and practices of administration in a manner which will enable him to enter successfully the field of public service.

In the words "service to society through opportunity for leadership," the major is designed to prepare the student for leadership in the professions and to provide him with the knowledge and skill necessary for effective participation in the management of public affairs.

Although the major is designed to be taken by students who have completed the general education requirements, it is also open to those who have not.

The major consists of a minimum of 124 semester hours, to be taken in the following areas:

1. Economics
2. Political Science
3. Business Administration
4. Social Science
5. Psychology

The major requires the completion of a thesis, to be submitted for consideration by the department.

The addition of the Administration Major is a significant step forward in the educational program of the College, and it is expected that it will add greatly to the effectiveness of the College in preparing students for leadership in the professions.

Dean2 Pierce Visit3 Washington
Convention To Investigate
College Standards

Dean Anna E. Pierce has returned
from Washington, D. C., where she
attended the biennial convention of
the American Association of
University Women last weekend.
What is being done by educational
institutions to equip women for
their larger obligations to
public activities was one of the
most interesting topics of
discussion.

Women presidents of colleges,
universities, and professors from
more than a score of colleges and
universities and about 50 delegates
representing 20,000 universi-
ty women in the 400 branches
of the association were present.

Speakers dealt with the mainte-
nance of collegiate standards from
the women’s viewpoint, the
improvement of conditions
for women students, equality of
women students with men on
the scholarship basis, and
members of college faculties and
the progress which women are
making in scholarship and
research.

A survey has been made to deter-
mine what university women are
accomplishing in the various
fields in which they are working.

It has been discovered, according
to members of the association,
that 75 per cent and above.
