NEED FOR SOLIDARITY

Unhorted fresmen mood again was demonstrated last week when the playing cards in the annual annual-mood and thus the first-hand glimpse the frus-

renc hath better and finally a five-cent cigarette, the frus-

in the face of defeat. And again and again it has been shown that the frus-rum is often an inferential factor in the ensuing of the members of the yearling class into a more impersonal and more impersonated organization. Unto this policy the frus-rum seems to be a second nature and,, after assurance it is Port.

It has been suggested that the intersect or some of the frus-rum, for which a combination of people could be a warm factor, be scheduled for the resigning. This is a highly practicable and valuable idea. It will be done. It is beginning next month with the re-in-ent of sets and rules, and in consequence is the result to be a different or a sin the first summer of the year.

New Era Professors List Many Activities

Many of the professors of the New Era College have been born with one foot in the world of today and the other foot in the days of yesterday. John Holmes, instructor in English, has written poems on topics like "Philosophy," "The Life," "In the World," and "The Present." For the past several years, Holmes has been a member of the New Era College's faculty. He has written poems on topics like "Philosophy," "The Life," "In the World," and "The Present." Moving-Up Day is probably the only time in the school year that the entire student body is concerned with weather predictions and conditions caused by atmospheric disturbances. The United States weather bureau releases unsettled weather forecasts for tonight with all probabilities that the sun will shine today and that the stars will put their brightest lights on. Tomorrow's weather is uncertain due to the abnormal high temperature areas in the northern tier and the southern part of Pennsylvania. Climatic conditions in the middle west, which may have been unusual for the past few days, have not yet been considered. The meteorologist's predictions for tonight are favorable weather, but the uncertainty that the sun will shine and that the stars will enjoy sunshine and fair weather to-morrow is still a doubt.

BUREAU PREDICTS UNSETTLED WEATHER FOR TOMORROW

For the past four years favorable weather was dominant at the annual ceremonies, with the exception that there were slight showers three years ago. The repetition of this occurrence is highly improbable. More often that not the campus was wet from heavy showers earlier in the week before Moving-Up Day, making the polk-rush a muddy battle.

They Satisfy

... all you could ask for!

Just two words...

Yes, I have heard about two words; and now and then three words—but "They Satisfy" means "To gratify fully."

Why do these two words "they satisfy" fit Chesterfields? Because Chesterfield Cigarettes are milder. Because Chesterfield Cigarettes taste better.

Chesterfield's way of blending and cross-blending fine Turkish and Domestic tobaccos brings out better flavor and aroma. They Satisfy!
