Chem Prof Condemns Patent Policy Revision

Chemistry Professor J.J. Zuckerman calls it a "gag rule" and is spearheading an effort to rescind it.

SUNY Research Foundation attorney Joseph Cairo, however, says the new form merely simplifies the process by which professors agree to protect the patent rights of their research sponsors.

Zuckerman plans to present a resolution condemning the agreement form at this afternoon's faculty meeting.

"It's scandalous, an outrage! It's a gag rule — there isn't a university that operates under a rule like this," Zuckerman said.

"If a professorship at this university is worth about five cents," Zuckerman continued, "then they're just selling out their freedom to discuss their work.

Although there are several points he wants to change, Zuckerman's primary concern is a single clause. This clause states that a professor who agrees to the form "will not disclose any information, knowledge or data relating to such discoveries or inventions to others, without the written approval of the Foundation, until such time as a patent application has been filed." Zuckerman's grievance deals mainly with this clause. He claims that this clause would prevent him from discussing much of his work with students and colleagues.

"Half of my fun is making these things and half of my fun is telling everybody about it," Zuckerman said. "That's why I work for SUNY."
College Computer Chain

It's high time colleges and universities across the country take a second look at their IT infrastructure. Many of the computer systems and facilities that were once cutting-edge are now becoming outdated and inefficient. This situation is not only affecting the performance of the IT department, but also the quality of education and research that is taking place on campus.

While many institutions are recognizing the need for change, the process of transforming outdated computer infrastructure can be complex and expensive. However, the long-term benefits of modernizing IT systems are well worth the investment. By upgrading their technology, colleges and universities can improve the student experience, enhance research capabilities, and stay competitive in the global education market.

Incorporating state-of-the-art equipment and software into the curriculum is essential for preparing the next generation of computer scientists and engineers. It is important for institutions to keep abreast of the latest developments in technology and to offer courses that are relevant to the workforce.

Overall, modernizing computer systems and facilities is a necessary step for colleges and universities to remain competitive and provide the best possible education for their students.

HUMANITIES

Art History

SUNY-Catastrophe: Suspended

--Proposal for a humanities, arts and understanding program. Bring in a good director who will work with the faculty to invent new classes. The faculty must be able to do something more than the old system.

--Chairman or “settle on common values.”

Music

M.A. suspended. Note that there is an area of expertise in Music.

Sociology

The department needs more time to adjust to the new faculty. It should be encouraged to work toward an interdisciplinary program.

OTHER

Emmett Fields, SUNYA’s public relations director, said, referring to “the Third Sun,” that the university was interested in establishing such a program. The university has a great tradition of student leadership and political activism.

Commentary

President Fields Cites Campus Problems

President Fields is concerned primarily about the university's enrollment and financial situation.

System Reformatter For Handing Group Funds

There are many reasons why universities are facing difficult financial situations, and one of the key challenges is managing the funds that come into the university. proper systems for handling these funds are essential to ensure that they are used as intended and to prevent misuse or misappropriation.

The role of the university's accounting department is critical in this regard. They must ensure that all funds are properly recorded and accounted for, and that they are used in accordance with the university's policies and procedures.

In addition to the accounting department, other university officials, such as the president, provost, and other senior administrators, also play a role in ensuring the proper handling of funds. They must be aware of the financial situation and take steps to address any issues that arise.

Overall, the proper handling of university funds is crucial to the university's success. By ensuring that funds are handled properly, universities can maintain their financial stability and continue to provide high-quality education for their students.

University to Offer Short Term Loans for Emergency Financing

by Mary Schley, Students Finance

A new five-year plan is available to students through the Financial Aid Office. University Officials have announced the creation of the "Student Revolving Loan Fund," which will provide low-interest emergency financial assistance.

The plan will be administered by the Financial Student Association (FSA), and will work in conjunction with the Financial Aid Office. Loans can be obtained for tuition, room, board, textbooks, and other expenses.

Students may obtain loans up to $25.00 at any time during the year, and the interest rate will be 2.5% per annum. The loan must be repaid within one year.

The FSA will determine the amount of the loan, based on the student's financial need. The loan will be processed through the Financial Aid Office, and the student will be required to sign a promissory note.

Students who are enrolled in the FSA program will be given priority over those who are not. The program is expected to be popular among students who need financial assistance for unexpected expenses.

Audit Threatens Mohawk

by David Winfield

The SUNY System is facing a major audit of its Mohawk Campus and the Elm House Hotel. The audit was initiated by the State University of New York's State University Financial Audit Board.

The audit, which is expected to take several months, will examine the financial and operating practices of the Mohawk Campus and the Elm House Hotel. The audit board is expected to release its findings in the fall.

The audit is expected to focus on the financial management of the Mohawk Campus and the Elm House Hotel. The audit board is expected to review the financial statements, accounting practices, and internal controls.

The audit is expected to be conducted in a transparent manner, and the results will be made public.

Shark Syndrome Endangers Baby Whales

by Bob Zahn

A new species of shark, which is only found in the Florida Keys, is threatening the survival of baby whales.

The species, known as the "baby shark," has been found to be attacking and killing baby whales. The sharks are known to attack baby whales under the age of one year.

The sharks are known to have a preference for baby whales, and are attracted to them by their smell. The sharks are known to attack baby whales from below, and to bite them on the head or neck.

The sharks are known to be active during the day, and are known to attack baby whales in groups.

The sharks are known to be highly aggressive, and are known to attack baby whales without warning.

Students Occupy Wellington

One hundred ninety-three students have occupied the administration building, known as "Wellington," in downtown Albany. The students are protesting the suspension of three students.

The students are demanding the reinstatement of the three students, who were suspended for alleged violations of university policy.

The students are occupying Wellington in order to draw attention to the suspension of the three students, and to protest the university's actions.

The students are expected to remain on campus for several days, and are demanding that the university rescind the suspension of the three students.

Mohawk Campus

Northway to Exit 8

The Mohawk Campus is located off the Mohawk River, near Exit 8 of the Northway. The campus is easily accessible by car or public transportation.

The campus is open to the public, and is open during the day. The campus is closed on weekends.

The campus is equipped with modern facilities, including classrooms, laboratories, and offices. The campus is also equipped with a library, computer labs, and a cafeteria.

The campus is home to a diverse range of students, including undergraduate and graduate students. The campus is also home to a number of faculty members and staff.

LOOKED AWFUL

The guests who walked into the Krowder house were surprised to find a large plastic and rubber phallus. The Krowder family had displayed it on the table as a prank. The guests, however, were not amused and left the house in a state of discomfort.

GROUND A DANGER

Would you believe that the F.B.I. has already sentenced a man to 6 years in jail for distributing a magazine that was rated X? According to the F.B.I., the magazine contained images of nude children. The man, who claimed he was only trying to make a living, was sentenced to 6 years in prison.

PHALLUS THIEF CAGED

The trial of a man accused of stealing a huge replica of a male sex organ from a book store in Parkersburg, West Virginia, ended in a mistrial this week. The defendant, Edward Clark, was sentenced to serve 6 years in jail after the trial ended in a mistrial.

AGNEW LEFT DRY

The Washington Post reports that former Vice President Spiro Agnew has warned that if he were still in office he would not have abandoned the government

SCANDAL INVENTED

The U.S. Geological survey has come up with a theory that works against volcanoes. The government agency states that many volcanic eruptions were triggered by volcanologists. However, the evidence has not been proven.

POLITICAL SCANDAL

Witnesses, who for 6 months left before the world was supposed to end in 1973, are now telling a new story. The witnesses say that the world was saved by an F.B.I. file on the 87-year-old founder of the Jehovah's Witnesses. The file, which was released last week, contains evidence that the Witnesses had been involved in a scheme to distribute beer in some other state, October of 1973 will have to be returned by the New York telephone office.

ALBANY STUDENT PRESS

AN EYEFULL

A Richfield Township, Ohio, woman opened a brand new jar of Miracle Whip. Her husband was shocked to discover a glass eye in the jar. When the woman opened the jar, she found a large plastic and rubber phallus. The man, who was shocked, said: "What kind of an idiot would do this?"

MIRACLE WHIPS

Both the Kraft Company, the makers of Miracle Whips, and Miracle Whip and F.D.A. say that the first test results on "Gerovital" indicate that it can be used to help treat depression.

YOUTHV

The U.S. Food and Drug Administration in New York is determining whether the F.D.A. will remove from the market a "fountain of youth" qualities, although there have been disputes about the efficacy of the drug. The FDA says that the first test results on "Gerovital" indicate that it can be used to help treat depression.

GEROVITAL

The U.S. Food and Drug Administration in New York is determining whether the F.D.A. will remove from the market a "fountain of youth" qualities, although there have been disputes about the efficacy of the drug. The FDA says that the first test results on "Gerovital" indicate that it can be used to help treat depression.

Joseph E. Krowder says she intends to ask the Jehovah's Witnesses, who for 6 months left before the world was supposed to end in 1973, are now telling a new story. The witnesses say that the world was saved by an F.B.I. file on the 87-year-old founder of the Jehovah's Witnesses. The file, which was released last week, contains evidence that the Witnesses had been involved in a scheme to distribute beer in some other state, October of 1973 will have to be returned by the New York telephone office.
MANDATORY TREASURER'S MEETING

There will be a mandatory meeting for presidents and treasurers of all SA funded groups on Tuesday Sept. 2 in Campus Center Assembly Hall at 8:00 PM

Unless both officers of your group are present, no funds may be expended from the group's budget.
Take Advantage of the Buying Power of Forty-Stores

A Great HiFi Store

Tech Hifi is one of the largest and most respected in the country, with forty-six stores throughout the eastern United States, and over 100,000 customers. We attribute this success to many important services that we offer our customers. More services, in fact, than any other hi-fi dealer in the country.

Selection

Tech Hifi carries over one hundred lines of quality hi-fi components and accessories. You never have to compromise at Tech Hifi because we have exactly what you want.

Knowledgeable Salespeople

Good brands alone don’t assure a good music system. It’s very important that the components you choose are with each other, because we have to compromise at Tech Hifi. If we were shopping for hi-fi, we wouldn’t settle for any less. You shouldn’t either! Our guarantees are spelled out clearly on the back cover of this flyer.

Low Prices

The combined purchasing power of Tech Hifi’s forty-six stores allows us to offer really low prices. We actually guarantee you the lowest prices in writing.

Credit and Financing

Tech Hifi will gladly honor your MasterCharge of BankAmerica, in addition, several liberal financing plans are available. So, even if you’re short on cash right now, you can still save ‘money’ at Tech Hifi.

This high fidelity music system takes up no more space than the average “compact” music system, and yet it sounds better, is far more versatile, and best of all, it costs no more!

The Cambridge Audio 1500 receiver provides a solid foundation for the high fidelity system. Its all-transistorized circuits produces watts minimum RMS per channel at any frequency from 50 hz to 20khz with less than 1% total harmonic distortion. The FM section is both sensitive and selective, so you can pick up distant stations with ease, and with a short reception of local stations in crowded metropolitan areas.

The Carphone Audio 1500 receiver provides more than enough power to produce really loud high fidelity sound through the efficient Studio Design Model 21 loudspeakers. These “two-way” loudspeakers have a six inch woofer and a two inch tweeter for smooth musical reproduction throughout nearly the entire audible range of sounds (except for the really deep bass notes.) These speakers easily fit into small bookshelves, or into odd corners. They are ideal for small apartments or dorm rooms where space is at a premium. Many music systems in this price range offer only “mini-changers” for your records. These mini-changers not only sound terrible, but they wear out the high frequencies on your records after only a few plays. Your records deserve better than that! Tech Hifi includes a full-size Glenburn 2118B automatic turntable with this system. It has a low-friction tone arm that will go easy on your records, a manual tuning device, a high fidelity amplifier, and even an anti-skate device for more precise tracking. An Audio Technica magnetic cartridge, as well as a dustcover, are included.

Regular price: $344
System Discount: $329

For many years, the KLH loudspeakers have been widely regarded as some of the finest brands alone don’t assure a good music system. It’s very important that the components you choose are with each other, because we have to compromise at Tech Hifi. If we were shopping for hi-fi, we wouldn’t settle for any less. You shouldn’t either! Our guarantees are spelled out clearly on the back cover of this flyer.

Tech HiFi Guarantees Your Satisfaction In Writing.

1. Satisfaction guaranteed, or your money back.

If you are dissatisfied, for any reason, with the equipment you purchased from Tech HiFi, you may return it within 7 days of purchase for a full refund.

2. Ninety-day 100% trade-in deal.

Equipment purchased at Tech HiFi may be traded in within ninety days and we will credit you the purchase price of the new equipment. This policy does not apply to anony unit in exchange for the defective, and is returned to Tech HiFi. The returned equipment must be in original condition, with all original accessories intact. Warranty cards must not be filled in or defaced. This policy does not apply to loudspeaker systems that have been damaged or otherwise misused.

3. One-year speaker trial deal.

If a pair of loudspeakers purchased at Tech HiFi are traded in one year of the purchase date, Tech HiFi will meet for up to 90 days of purchase price. The original sales slip must be presented at the time of repair, and the equipment must be properly registered with the manufacturer.

4. Sixty-day defective exchange.

If any product proves to be defective, and is returned to Tech HiFi within 60 days of purchase date, Tech HiFi will credit the amount paid toward the purchase price of new equipment. This policy does not apply to anony unit in exchange for the defective, and is returned to Tech HiFi. The returned equipment must be in original condition, with all original accessories intact. Warranty cards must not be filled in or defaced. This policy does not apply to loudspeaker systems that have been damaged or otherwise misused.

5. Thirty-day price protection.

Within thirty days of purchase, if you find an authorized dealer (including our own), selling the same equipment with the same service for a lower price, we gladly refund the difference. This policy does not apply to the purchase price, and is void when purchased by a previous owner.

If I protection deal.

Any equipment that has been accidentally damaged or otherwise misused. This policy does not apply to anony unit in exchange for the defective, and is returned to Tech HiFi. The original sales slip must be presented at the time of repair, and the equipment must be properly registered with the manufacturer.

6. Raincheck policy.

If Tech HiFi is out of stock at the time of purchase, Tech HiFi will make every effort to provide the item at the price at which it was ordered. If the item is not available, we will credit the purchase price in full. This policy does not apply to anony unit in exchange for the defective, and is returned to Tech HiFi. The returned equipment must be in original condition, with all original accessories intact. Warranty cards must not be filled in or defaced. This policy does not apply to loudspeaker systems that have been damaged or otherwise misused.

7. Eight-year trade-in allowance.

For your convenience, Tech HiFi maintains a trade-in department. For a description of our service Center.

8. You may choose a finance plan.

For your convenience, Tech HiFi offers a finance plan. Several liberal financing plans are also available.

At no extra charge, Tech HiFi provides its own labor guarantee for recommended loudspeaker systems. Three-year labor guarantee for recommended electronics, and one-year labor guarantee for recommended turntables and tape decks. This warranty service also covers all interaction with the manufacturer.

10. Free setup of critical items.

Our trained salespeople will set up critical parts of your system, such as the speakers, at no extra charge. We want you to get the most out of your system and we will help you in any way that we can.

11. Free consultation service.

Tech HiFi salespeople are some of the most knowledgeable you'll find anywhere. So if you ever have a question about your system, or just need some advice, don't hesitate to give the store nearest you a call. We'd be glad to help you order a raincheck, or if Tech HiFi is the "time print," it's a free consultation service.

12. Free lifetime equipment checkout.

Every year, Tech HiFi sponsors a free clinic for our customers. This gives you the opportunity to make sure your equipment is still working properly. We want you to get the most out of your system, and we will help you in any way that we can.

* At Tech HiFi, the "free print," is a free lifetime equipment checkout.

13. Free lifetime equipment checkout!

Every year, Tech HiFi offers an equipment checkout service for your system. Today's prices may be different from what they were last year, or even two years ago. But Tech HiFi is willing to help you in any way that we can.

14. Free In-store tasting!

Thanks to the work of private organizations! have assisted in the identification of railway rights-of-way as natural corridors for hiking and biking trails. These organizations! have assisted in the acquisition of abandoned rail rights-of-way as natural corridors for hiking and biking trails.
Politics? For the ego-minded, the lost and government. You pay taxes. Know where the prospect and move in. That is where it is.

Student participation in the affairs of a campus is a relatively new concept, but one that has proven beneficial to SUNY. Large numbers of faculty and administrators continue to support it, as does the new President, Emmett B. Fields.

The threat of student expulsion from the Senate is, however, greater than this year than ever before. Some faculty members feel that students are a special interest in the consumer of education, and bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate, deciding to bring their bias to the Senate...

**Pro-Programmed Assassin?**

The 255th Philosophy of Mind Seminar at SUNY Albany met to discuss the implications of the recent so-called "programmed assassin" case. The seminar was attended by Professor John Kennedy, who delivered the keynote address.

Kennedy explained that the case was a significant step forward in the study of artificial intelligence and its potential applications in military and political contexts. He emphasized the importance of continued research in this area to ensure that technology is used responsibly.

The seminar was attended by a diverse group of experts, including military strategists, ethicists, and computer scientists. The discussions centered on the ethical implications of using artificial intelligence in decision-making processes, particularly in situations where human lives are at stake.

Kennedy concluded his address by urging the academic community to remain vigilant in the face of emerging technologies and to work collaboratively to develop policies that promote the responsible use of AI.

Texas Instruments

electronic calculators

at Low Discount Prices

Texas Instruments Model SR-11

Model SR-11

Price $38.88

Texas Instruments Model SR-16

Price $55.88

Texas Instruments Model SR-50A

Price $78.88

Texas Instruments Model SR-51

Price $110.88

The Calculators

- Texas Instruments has introduced a new line of electronic calculators, which includes the Model SR-11, SR-16, SR-50A, and SR-51.

- The SR-11 is priced at $38.88, the SR-16 at $55.88, the SR-50A at $78.88, and the SR-51 at $110.88.

- These calculators feature advanced functions, including memory, scientific notation, and inverse trigonometric functions.

- They are designed for students and professionals in mathematics, science, and engineering.

- The calculators are sold at low discount prices, making them a cost-effective choice for those in need of high-quality calculators.

- For more information or to purchase these calculators, please visit your local electronics retailer or online store.

The Calculators in Action

- Equipped with advanced features, these calculators can handle complex calculations with ease.

- They are ideal for students studying advanced mathematics, physics, and engineering courses.

- Professionals in these fields can use them for their work, ensuring accuracy and efficiency in their calculations.

- Whether for personal use or professional purposes, these calculators offer a reliable and convenient solution.

- Texas Instruments continues to lead in the innovation of electronic calculators, providing tools that make complex calculations accessible to everyone.

The Intramural Scene

Intramural sports at Albany State University are sponsored by two loosely-linked groups: the Association of Student Recreational Athletics (ASRA) and the Women's Intramural and Recreational Association (WIRA).

Both groups offer a wide range of recreational activities, and are under the auspices of Student Affairs. Campus Center 136

Sports are governed by a student council, which is responsible for the establishment of rules and eligibility requirements, and any other information of the group's respective season. Each council is composed of a division chairman and three council members, who are elected to office by current council members.

All student tax-payers are automatically eligible to participate in intramural activities, which include team sports (football, soccer, baseball, softball, field hockey, basketball, etc.) and individual competitions (tennis, ping pong, field goal kicking, hurdles, etc.).

Any group of students may form a team for a given sport. It is the duty of a member of that team, who shall act as captain, to attend the pre-season captains' meetings for that sport. As captain, he/she is completely responsible for that team.

Each program collects bond money in the form of entry fees, which is automatically incorporated into the groups' budgets by Student Association. Any money in excess of the budget is kept by the group for purchase of awards, so a forfeit-free season results in an $8 return.

Intramural sports have a three-step process: completion of a written application, interview with members of the council, and election to office by current council members.

Both programs collect bond money in the form of entry fees, which is automatically incorporated into the groups' budgets by Student Association. Any money in excess of the budget is kept by the group for purchase of awards, so a forfeit-free season results in an $8 return.

Intramural also offers an opportunity for interested students to earn money as officials of many sports, with salaries ranging from $1.25 to $5.00 per game, depending on the sport involved, degree of competition, and experience.

The council is Nathan Patroon, president of the AMIA Council. Each team has a captain, who is elected by the team.

The Intramural Advisory Board consists of the AMIA Council, WIRA Council, and the council's captains.

THINK

about working for the Albany Student Press this semester

COME

to the ASP interest meeting

Thursday Aug. 28 7 PM LC 19

investigative reporting ...
reviews of
movies, plays, art exhibits, music ...

columnists ...

opinion ...

production work ...

ad design ...

graphic art ...
sports ...
cartoonists ...

Working for the ASP you can improve your writing, learn new skills, use your imagination, keep the campus informed, and have fun.

The ASP will begin its regular Friday-Tuesday schedule on September 5.
