### RA named in tower robberies

By Pam Schusterman

A Residential Assistant Emer Whalen Tower on Hudson Campus reportedly suggested to some of the victims that, when they had no time to escape and were unable to lock their doors, they might have been able to use the elevators. The burglary, for which Whalen (and seven other RA's, including Whalen, were arrested. The incident occurred on Feb. 20, around 2:30 am. Whalen has not been charged, but is currently being held at the University Police Department, pending further investigation.

We are still investigating the case, said Police, "but we are making strenuous efforts to get to the bottom of this matter." We have not been able to locate the burglarized suites.

Whalen was reportedly at home when the burglaries occurred, and Police stated that, "at this point, we can't say with certainty that she was involved." However, Police said that they found evidence at the scene that suggested that Whalen may have been involved in the crime.

The evidence included fingerprints, footprints, and other physical evidence that linked Whalen to the scene of the crime. It is believed that Whalen may have used a key to enter the building, although it is not clear how she obtained the key.

Whalen was reportedly a member of the university's student government and had a good reputation among her peers. However, Police said that her reputation does not necessarily indicate her innocence, and that further investigation is required.

Whalen's arrest has caused a great deal of concern among the university's students, with many expressing concern about the efficacy of the university's security system. Police have urged students to be more cautious and to keep their doors locked, even when they are not at home.

SASU asks students to pay dues increase

By Karen E. Beck

The Student Association of SUNY at Albany (SUNYA) has asked its members to pay increases in their dues for the coming year. The increase is being requested in order to fund the Student Association's activities and to ensure its financial stability.

According to a SASU Campus chapter member, the increased dues will be used to support the association's programs, which include a variety of services and events for students. The increased dues will also help to support the association's advocacy efforts, which are aimed at improving the lives of SUNYA students.

The association has a $300 income for the coming year, and the increased dues will be used to help offset the costs associated with running the association's programs. The increased dues will be used to support a variety of initiatives, including a national campaign to increase student participation in local and national organizations.

SUNYA students will vote on the increased dues at the upcoming election on Wednesday. The increased dues will go into effect on the first day of the spring semester, and the association will use the increased dues to support its programs and initiatives.

New cheating policy a model for integrity

By Robert Biewer

The Student Association of SUNYA has approved a new cheating policy that is intended to help prevent academic dishonesty.

The new policy includes a list of behaviors that are considered cheating, and it also includes a procedure for handling cases of academic dishonesty. The policy includes a procedure for handling cases of academic dishonesty that is intended to help ensure that students are treated fairly and that the outcomes are consistent with the policy.

The policy is intended to be used in conjunction with the university's existing policies on academic dishonesty, and it is intended to help students understand what is considered cheating and what the consequences will be if they are caught cheating.

The policy includes a provision for appeals, and it is intended to help ensure that students have an opportunity to present their case and to have their case heard by a fair and impartial panel.

The policy is intended to be used by all students at SUNYA, and it is intended to help ensure that all students are treated equally and that the outcomes are consistent with the policy.

Test relaxation tips can lead to improved marks

By Kathleen Brennco

How many of you have found yourself hitting the books on exam day — praying that you'll get through the tests without doubling over from anxiety? Do thoughts such as "What if I don't know the material?" "How am I going to 'fail' or 'I'll never pass the test, I know I'll fail" or "Am I going to make any of this week count?" ever cross your mind? If they do, you're probably not alone. Everyone has some form of test anxiety.

Test anxiety can be both a conscious and unconscious experience and can range from minor cases of nervousness to experiences that result in nausea, panic attacks, sweating or profuse sweating, dizziness, feeling faint, inability to concentrate, irritability, muscle tension, extreme nervousness and fear, loss of appetite, headaches, poor sleep, or mood swings. Test anxiety is something that most students experience to some degree.

It is important to realize that test anxiety is a normal and healthy reaction. It allows you to prepare yourself for an exam and, when properly managed, can help you achieve your full potential.

However, test anxiety can also be detrimental to your performance in the long run. It can prevent you from thinking clearly, concentrating, and performing at your best. If left unchecked, test anxiety can lead to a cycle of negative thoughts and behaviors that can become self-perpetuating.

Test anxiety can be managed through various strategies and techniques. These may include:

- Setting realistic goals for yourself
- Breaking down the exam into manageable parts
- Using relaxation techniques such as deep breathing, progressive muscle relaxation, or visualization
- Practicing self-care strategies such as good nutrition, exercise, and adequate sleep
- Seeking support from friends, family, or counseling services

EDITORIAL

Disabled answers

If you're in a wheelchair in the campus center on a weekday, you have to wheel over to the Performing Arts Center, climb the stairs, find a seat, and then wheel back to your place on the main floor of the center and take down the lift. If you're in a wheelchair and you want to get into an academic building, you're in for an adventure if you try to get to the library, the Student Union, or any of the other buildings on campus that have stairs. If you're there after classes and they're closed, you may find yourself there for a while, unless you open the door yourself. The fact is, everything on this campus is accessible to able-bodied students just fine. It's a different story for the disabled. There are some stairs on the academic buildings that are high enough for able-bodied students to climb, but not for those in wheelchairs. Some of the doors on the academic buildings are mechanized, but if you're in a wheelchair, you'll find it difficult to open them. You may also find that the elevator controls are too high for most wheelchair users. In short, there's a lot to be desired in terms of accessibility for disabled students.

UAD president Rob Pipia says riding down it participants found that there's a lot to be desired in terms of accessibility for disabled students.

Thomas W. Carroll

Disability, according to the American Psychological Association, is the inability to perform at the level expected by society. This inability can be a result of physical or mental limitations. The problem of disability is not a new one. It's been around since the beginning of human history. In ancient times, people with disabilities were often seen as criminals or even gods. In the modern world, disability is a much more complex issue. People with disabilities are often discriminated against in society. They are often denied access to education, employment, and other opportunities. This discrimination is a problem that needs to be addressed.

As a society, we need to do more to support people with disabilities. We need to make our communities more accessible to people with disabilities. We need to ensure that people with disabilities have access to quality education and employment opportunities. We need to change the attitudes of society towards people with disabilities. We need to work towards creating a more inclusive society.

The problems with these proposals are real and must be addressed. The United States does not yet have a comprehensive disability policy in place. The problem of disability is a complex one, and it requires a multi-faceted approach. We need to work towards creating a more inclusive society for people with disabilities. We need to support people with disabilities in their efforts to live full and meaningful lives.

The faults of divestiture

Amidst protests on the SUNY-Albany campus, one has demands that the State of New York and the SUNY system divest from companies doing business with South Africa. The State of New York, it has been alleged, should have the right to divest from South Africa in order to support the anti-apartheid movement. The fault of divestiture lies in the fact that it would be contrary to the principles of free trade and economic development. The United Nations has called for economic sanctions against South Africa in order to pressure the government to end apartheid. The State of New York, it has been alleged, should be able to divest from South Africa in order to support the anti-apartheid movement.

If divestiture did lead to the withdrawal of American businesses from South Africa, what would be the impact on the American economy? The State of New York has a significant number of businesses that invest in South Africa. The State of New York should have the right to divest from South Africa in order to support the anti-apartheid movement.

PRE-DOCTORAL FELLOWSHIP
UNION COLLEGE AND
THE
ALBANY MEDICAL COLLEGE

Graduates of M.B.A., M.S., M.P.H., and M.D. programs are encouraged to apply for a fellowship established by Union College’s Programs in Health Systems Administration and the Albany Medical College. The Fellowship consists of courses in statistical methods and research design, systems analysis and modeling, and behavioral and policy sciences. In addition, eight courses in health systems administration, health finance, health care law, health planning and policy and health services research may be completed. M.D.’s and other applicants with non-management master level degrees may choose to earn the M.B.A./Health Systems Administration and Management in the process of completing the Ph.D.

Support at $20,000 per year plus allowances for travel and research expenses and full tuition is available for a two year period with possible support for a third year. Applications will be received until April 15, 1985 with a decision by May 15, 1985. Contact, Eugene S. Schneller, Ph.D., Director, Programs in Health Services Administration and Management, I.A.M., Bailey Hall, Union College, Schenectady, New York 12308. (518) 370-6238.

Gymnasts lose to Long Island University by two

By Marc Beran

The Albany State women's gymnastic team lost to Long Island University by 34 points. According to Long Island's coach, Dave Blette, the score would have been even closer but for four weak performances by members of the Albany team.

The Danes had an outstanding second performance. They scored a 38.4 and tied for second overall. The top four scores were given to the University of Miami team.

Despite the loss, Coach Bihr remains optimistic of Potsdam. "We've been on the road a lot this year," Bihr said. "It's not easy to travel."

The Danes are optimistic for Potsdam. "It's a new experience for many of the girls," Bihr said. "This is the first time for most of them to be away from home."
Buffalo State shocks Danes in SUNYAC finals

Albany still receives NCAA bid

By Rich Sheridan

The Albany State Great Danes will be going to the NCAA Division III Tournament for the first time in their history, since their SUNYAC championship game this weekend.

The Danes will be competing in the Eastern Regional.

They were forced to play against Buffalo State, which finished 17-7 on the season.

By Kristine Sauer

Women cagers lose to Buffalo State in SUNYACs

The women's basketball team from SUNY Polytechnic Institute (SUNY Poly) lost to Buffalo State by a score of 80-73 in the SUNYAC championship game.

SUNY Poly was outscored by Buffalo State in the first half, 39-24, but rallied in the second half to trail by just 11 points, 59-48, with 10 minutes remaining.

However, Buffalo State pulled away and increased their lead to 80-68 with just over three minutes left in the game.

SUNY Poly fought back to get within 80-73 with 1:30 remaining, but Buffalo State sealed the win with a free throw.

Buffalo State's Rainny Lesane led all scorers with 24 points, while SUNY Poly's Jane Timm had 15 rebounds.

The Danes were unable to overcome Buffalo State's' 38-30 advantage in rebounding.

Buffalo State defeated SUNY Poly for the third straight year, winning both regular-season contests.

The Danes were able to hold their own in the first half, trailing 39-24, but were unable to keep up with Buffalo State's scoring in the second half.

Albany's Rainny Lesane scored 24 points for the Danes, while Buffalo State's Rainny Lesane scored 80 points for the Bengals.

Despite the loss, SUNY Poly head coach Man Warner said, "At the end we just couldn't get it done."

"It was a good win. We played a good game, but we just couldn't get the job done," said Warner.

For the Danes, Adam Ursprung scored 21 points, while All-Tournament selection Adam Ursprung scored 15 points.

"We didn't give up and we kept hanging in there," said Patterson. "In there and hanging in there," said Patterson.

"We were the better team," said Warner.

"We were the better team," said Warner.

Thanks to Suny Poly for the information.
Dick Sauers reaches the 500 mark

By Dean Chang

With two minutes left to play in the game, the crowd began to chant: "Get 'em Dick. Get 'em Dick. Get 'em Dick!"

21 wins. "It was number 21 for the team from now on," said Sauers.

That's the way to look at the beginning of the season. The Danes were caught up with 500, Sauers pointed out, the preceding number 500.

The game was over. To the approval of 3000 spectators in the RPI fieldhouse, the chant resumed, louder than before.

"I wanted to put things back in the pro-" Sauers said, "and the team will try to attain will be to reach the Final Four in the NCAA's post-season tournament. That has proved to be the goal in so many other successful seasons, and our team will try to achieve it this year.

The scenario on Friday night against RPI. Hart remembered saying, "20 more wins, and we were going to host the SUNYACs. The Danes were out to change their road record for the better, as they meet Hirpur at 1:30 this Sunday.

Sauersmen, having lost one game on the road, will be out to change what was in store for Sauers. It was all the work of one man, Doc Sauers.

Sauers makes his plays on defense, and that was one loss that the team will try to avoid, said Dr. William Janeway, Associate of Athletics at Albany.

The game was no longer important. The team was fighting off the several obstacles that were putting it in the win column.

The sight I enjoyed the most (after win 500) was Dick being showered with strawberry jam, and his first crack at his 500th win.

"It's nice to think about it sometime in April, when we're in a better position," said Sauers.

"We've had up and down years recently. But I'm sure that he'll have Buffalo on his mind," said Dr. Moore, none of the players knew what was in store for Sauers. It was all the work of one man, Doc Sauers.

Dennis Stevens. Plant Director at Albany: "The Danes were out to change their road record for the better, as they meet Hirpur at 1:30 this Sunday.

Pogue awarded King medal

You, President for Student Affairs Frank Pogue was awarded the University's Martin Luther King Jr. Award for "his dedication to the Campus Center Building Committee." The award is presented annually by the Office of Minority Student Affairs to an individual who has made a signif- icant contribution to the understanding of the values of King's life. The award was presented by the University's President Howard Deutchman.

"The most important words of King were those which said, "We must accept responsibility for our own actions," said Howard Deutchman. "We must be accountable for our own actions." The award was presented to Pogue for his dedication to the Campus Center Building Committee.

Draft resisters at SUNY Albany unyielding despite possible legal ramifications

By Eric Hindin

Despite the movement of draft registration legislation in New York State, many SUNY Albany students have not complied with the draft registration requirement. Frank Pogue, the University's Vice President for Student Affairs, said that he does not think of them as heroes, but that they are willing to suffer the consequences of their actions. As responsible citizens, Pogue said, students should be willing to suffer the consequences of their actions.
