University Library

Hard Hit by Freeze

by Roy Lewis

The construction of the state-wide budget freeze has been hit severely at all departments of the university community. One of the hardest hit areas has been the Library. In an interview with John Ashby, Director of the Library, he explained the situation:

"The Library has only 11,000 books left in stock. We have been trying to get more books from the University of Wisconsin, but unfortunately, they have none left. We have also been try ing to get books from the New York Public Library, but they have no books left."

Ashby went on to say that, "the Library is in a very bad position. We have not been able to get any new books for three months."

When asked if the Library will be able to function, Ashby replied, "I don't know. We are doing our best to get books, but it is very difficult."

For more information and suggestions, you can contact the Directors at the University Library.
**Dope Is Death**

NEW YORK (LNS) - For 17 months after he went underground in April 1970, very little was heard from H. Rap Brown, former chairman of the Student Nonviolent Coordinating Committee (SNCC). The former student activist had been reported missing for months, prompting speculation about his possible whereabouts.

On April 8, 1971, Brown, who had been living in Canada since his release from prison in December 1969, returned to the United States and issued a statement announcing that he was returning to the country to fight for peace in Vietnam. The statement indicated his desire to help end the war and work towards a peaceful resolution.

Brown's return was met with mixed reactions, with some expressing support for his decision and others questioning his motives. The controversy surrounding his actions continued, with many still wondering about his role in the civil rights movement and his future plans.

**Beachwood Ageing could be an "advertising gimmick."**

But it isn't.

(For instance, last year we bought almost 200 pounds of Beachwood strips... enough to last 67 freight cars.)

**Endangered Species**

This newspaper has long been in the forefront of demand for the community at large, large university.

Brought to bear on patient illness, how these disciplines are often work in laboratories, learn about the programs available. We can't see how a hospital functions. The personnel we need. Also, these have been filing, answering the complaints, expected to contribute. During the same period, the K, R. has been half reduced by half.

**Emergency**

Emergency is the most common shared feeling of mankind. It is not lack's paper. The university has been political. The university has a tendency to discuss Environmental Studies program, hard lot. In Mrs. Frost talks about anti-political advisors such as Henry Kissenger. It is a mistake to say that environmental studies are based on a profession of itself. It is a process of what others or else. It presents no problems of ambiguity. It is therefore acceptable to all. The problem of the ambulance services in Albany. Many of these courses are the same as this year. 17 percent will remain approximately the same.

**Frost Wrong**

To The Editor: The ASP of Albany, Nov. 9, 1971. In response to your opinion, as members of the Environmental Studies program, hard lot. In Mrs. Frost talks about anti-political advisors such as Henry Kissenger. It is a mistake to say that environmental studies are based on a profession of itself. It is a process of what others or else. It presents no problems of ambiguity. It is therefore acceptable to all. The problem of the ambulance services in Albany. Many of these courses are the same as this year. 17 percent will remain approximately the same.

**Communications**

**Community Service: Yes**

Dear Sir,

I would like to point out the importance of the Community Service Program. It is the responsibility of the student to be involved in their community, and to contribute to the quality of life in their area. This program provides an opportunity for students to do exactly that.

During my first six weeks at SUNYA, the Slavic Department has offered a Russian course (101) next fall. This course is designed to introduce students to the Russian language and culture. The course will consist of three semesters, as they currently offerer! by the Department in Russian.

Very truly yours,

[Signature]

**Russian Reply**

To the Editor,

As a student of SUNYA, I have been involved in the Community Service Program for the past two years. In my opinion, this program is very important to the community and the student body.

During my first six weeks at SUNYA, the Slavic Department has offered a Russian course (101) next fall. This course is designed to introduce students to the Russian language and culture. The course will consist of three semesters, as they currently offerer! by the Department in Russian.

Very truly yours,

Recycling: "Valuable" Junk Means New Products

A further breakdown of solid waste, produced between 1950 and 1960, is as follows: 30% is from households, 51% from industry and commercial establishments, 18% from mining industries and paper products. If the present rate of solid waste generation is not remedied, what will happen in the future? Solid waste is thrown into landfills and dumps, where it remains to cause environmental pollution. The solid waste is not managed, what will happen to it in the future?

Mineral Waste

The second category, mineral waste, is large, about 1.7 million tons last year. The production of 1 ton of copper is about 500 tons of waste and rock. Additionally, 1 acre of mining produces about 1.5 tons of waste rock. If the copper is isolated, the copper waste is not used, but can be used by mining companies. A large proportion of metal waste is generated from mining and mineral industries. If the waste is not managed, what will happen to it in the future?

Human Waste

Futhermore, over 100,000 solid waste dollars is generated for every human, woman, and child in the country. By 1980, this is expected to increase to 1200 dollars per person. The importance of responsible solid waste management is even more apparent, the environmental day-to-day, the environmental day-to-day.

**Job Bias Revealed:**

**Job Discrimination Fought at SUNYA**

By John F. Bennett

This university is engaging in job discrimination in violation of affirmative action programs, the Equal Employment Opportunity Act, and other legislation. The university has been charged with failing to hire a minority group member, specifically persons of Spanish-American, African-American, and Native American descent, in order to meet affirmative action goals. The university has also been accused of discriminating against these groups in its hiring practices.

**Even cash paper has something else to offer**

Quotations

"Junk" Continued from page 14

Tens of thousands ofмотоы are daily disposed of in some trash, and yet they are not a form of garbage. A ton of scrap automobile is thrown away each year in city dumps. This scrap is not a form of waste, but is a valuable resource. The aluminum, steel, and copper in the cars are valuable materials that can be recycled.

**S/U Hurts Grad Applicants**

By Vicki Adams

S/U grades affect an applicant's chance of admission to State University. The university grades affect an applicant's chance of admission to State University. The university grading system is based on a scale of 0 to 4, with 4 being the highest grade. The system is designed to rank students according to their academic performance. However, the system has been criticized for its unfairness and for excluding minority students.

**Inside the ASP**

**S/U No Good...**

Although SUNYA has improved its study habits and increased its students' academic performance, the university's grading system continues to be discriminatory. The system is based on a scale of 0 to 4, with 4 being the highest grade. The system is designed to rank students according to their academic performance. However, the system has been criticized for its unfairness and for excluding minority students.

**New Registration...**

In the future, students will be required to submit applications for registration. The applications will be reviewed by the registrar's office, and students will be notified of their registration status. The system is designed to ensure that students are registered for the courses they need to complete their degree programs.

**Alumni To Help...**

Students and alumni can help improve the university's grading system by participating in the Alumni Association's study habits program. The program is designed to help students improve their study habits and increase their academic performance. By participating in the program, students can help improve the university's grading system and ensure that it is fair and equitable.
