The torpor was not lifted until Eiffel built the Eiffel Tower, which made everybody giggle. But that later. To make a long story short, the French were affectionately called "the French". Napoleon succeeded him, and married Lorraine Alsace and had three children: Louis, Napoleon, and Josephine. He died in 1821 after a series of costly wars with Schleswig-Holstein, the Cleveland Traders, the Nile, as it is popularly termed.

This gem of the tobacconist's art, this prodigy of cigarette smoking, you can see, is the most important single item to take to Europe. And, of course, to get from France to Switzerland, one greases the bearing. The Pearl of the Pacific, as it is generally called.

The state Department of Motor Vehicles has apologized. It has runic to the attention of many undergraduates. It has runic to the attention of many campus organizations. It has runic to the attention of many students in the program; Ronnie Havas '64, among others.

There are many different ways to approach an argument. Some are more effective than others. This is a good time to consider the specifics of how to argue an issue effectively.

The American College Testing Program has been created in response to many requests from students and institutions who have been concerned about the fairness and accuracy of standardized tests. The program was developed by a team of experts in psychology, education, and statistics, who have been working on this issue for many years.

The program includes a variety of tests and assessments, designed to measure different aspects of academic performance. These include tests of verbal ability, reasoning, and achievement, as well as other factors that may affect college success.

The American College Testing Program has received widespread support from educators, students, and parents. Many believe that it offers a fair and effective way to evaluate college readiness.

The program is administered by the National Association for College Admission Counseling (NACAC). NACAC is a professional association of college admissions officers, who work to improve access to higher education for all students.

The program is designed to be used by colleges and universities, as well as by students and families who are interested in evaluating their readiness for college. The program offers a variety of test options, and can be used in a variety of ways, depending on the needs of the individual.

The American College Testing Program is a valuable resource for students and institutions. It offers a fair and effective way to evaluate college readiness, and can help students make informed decisions about their academic future.
The plan for the Student Union on the new campus can serve as a perfect example of poor planning even the complete lack of planning. Many organizations are growing at fantastic rates and are adding staff, committees, and buildings to maintain its original measurements of a one hundred foot square.

The entire office area, and meeting room section, is planned around this central air bag. It does not matter to the planners that the building is on design, that our present typewriter pool service would have to be abandoned or increased in size by three or four times — at student expense. This is but one example of the many�

The building includes a central lobby which is 60 feet long and 60 feet wide. It is also a ridiculous three-stories high. It is only through the long and endless efforts of a few of our college administrators that this lobby did not have a glass roof. This is an example that we must not let happen.

Radio Station WSUA Has Semester of Success

Argyros & Campisi to Manage WSUA in 1963-64
Future Plans Include Poll of Student Music Tastes

On May 2, Nick Argyros '63 and Anthony Campisi, manager and student manager of WSUA, respectively, signed a formal contract with WSUA. The incorporation of a new administrative staff marks the beginning of the experimental period in the station's history.

The WSUA staff has since maintained the original purposes of the WSUA Constitution: to contribute more effective entertainment to the campus; to provide a forum for the expression of the intellectual and social viewpoints of the student body; and to provide a source of revenue for the university and student groups.

A major problem for the radio station will be the establishment of a permanent studio and equipment in the studio. The station has not yet overcome obstacles and started the work of college and community station equipment in the studio.

At 6:00 p.m., I sign off for the show. My personal choice is Governor Richard Nixon. While the majority of the nation supports him, he still does not come. Perhaps we shall have peace.

The Senate budget will also be up, I guess up for the show. When our logs are approved, I'll like to tell her and anyone else who asks or people about the present condition of the country and the world.

Radio Station Has Long History
Of Hopes, Frustrations, & Delays

Broadcasting from a room in the basement of the old college, WSUA has been on the air for 5 years, according to WSUA President, Don Brown, '64. The station has not yet overcome obstacles and started the work of college and community station equipment in the studio.

SINA Demands Dressing Rooms

For College Laboratory Animals

The lesson of the morning is that it is much easier just to lie with closed eyes than to guess it's just the idea of skirts or pants—which one to pick. What is needed is a dressing room. This is the opinion of that organization of brothers enjoying itself in Natural Science laboratories, that finds itself with the problem of deciding what to wear to class in the morning.

SINA, the Society of Inland Naturalists and Students, announces its willingness to operate dressing rooms for science students in the College of Science. The organization has written to the College administration expressing this wish and has received a favorable response from the administration.

The dressing rooms would be located in the Science Building, with entrance from the lobby. They would be available to all science students, regardless of whether they are members of SINA or not.

The cost of operating the dressing rooms would be borne by SINA, and the organization is willing to pay for any additional equipment that may be necessary.

The dressing rooms would be open during the regular hours of the College, and would be available to students at all times, including evenings and weekends.

The SINA dressing rooms would be a welcome addition to the facilities available to science students, and would be a great convenience to those who find it difficult to choose what to wear in the morning.

SINA members are encouraged to contribute to the cost of operating the dressing rooms, and to participate in their operation.

In addition to providing dressing rooms, SINA is also considering other ways of improving the facilities available to science students. It is hoped that these facilities will be open to all students, regardless of whether they are members of SINA or not.
Once again summer weather is here, as we find dorm field covered from Rockefeller Center to Jones Beach. Sunday morning revealed a field blanketed with white flowers of the snow on the wind and green grass green grass creates a certain atmosphere of which we are aware when we first wake up early in the morning. Often one or two scattered blankets are already abandoned on the dorm field with heavily clothed figures resting on them. Thus, as the day goes on and the sun gets higher and hotter, the noise below the windows stirs by increases from a low hum until it sounds like a playground - laughter and music and the smell of willow. Happens there is the entire field filled with sun worshipers giving us offerings up to the skies. Such an alluring scene makes one more tempted than ever to go out and join it; to make your conscience, you pick up a book or a pen - to bring along with your blanket, fricassee, salt, pepper, and sardines - get a trench coat on over your bathing suit, and descend to the grassy turf below.

Now spring comes no earlier than we live in the hot sun, our skin shimmering without; somehow it is so easy to lie with closed eyes than to read. It's well, you didn't try to go at that book this weekend, did you? Besides, it's much more pleasant to think of how you'll look with a tan.

At last all at once you notice a tinge of pink on your skin - and then the time to leave, as you may have learned by experience. Soon enough, as the afternoon wanes, you scout a group across the lawn, and follow, picking up blankets and other supplies. We see the emergency sunbathing on the lawn. Then you sit down on a charred, freshly red-lined skin, and shiver for the showers to wash off the oil before dinner.

It is when we see so many sunburned faces in the sun that we have seen enough of summer is really here at last!

Busy Schedule Takes Statesmen Talent Travelling To Festival In Vermont, Colblesh, & Area Concerts

While the hot weeks, the Statesmen's schedule will stretch from Kitchentown to Burlington, Vermont and Colblesh and Area Concerts.

The Statesmen will play their first concert of the year on May 18 in Kitchentown, the next in Burlington, Vermont and then in Colblesh for their final concert of the season. The three tours will be under the direction of the Statesmen's leader, Bruce R. Brown.

The tour will stop at the following locations:

May 18, 1963 - Kitchentown, Vermont

May 20, 1963 - Burlington, Vermont

May 22, 1963 - Colblesh, Vermont

The Statesmen will be accompanied by the Statesman Quartet, composed of Paul Brown, John Shope, Charles Williams, and Arthur Goff. The quartet will perform a selection of popular and classical literature.

The Statesmen's schedule for the remainder of the season will include concerts in New York, New Jersey, Pennsylvania, and Ohio.

The Statesmen are particularly looking forward to their trip to Burlington, where they hope to meet new and interesting people and play in front of diverse audiences.

The Statesmen's most recent tour was a great success, and they are excited to continue their travels and share their music with new audiences.

The Statesmen's schedule for the remainder of the season will include concerts in New York, New Jersey, Pennsylvania, and Ohio.
WAA Schedules
Big Awards Night

The Student Senate's annual Silver Knight Awards Night has been canceled this semester, as the Student Senate will feature the Fife of different Student and faculty groups in addition to presentation of the Silver Knight Awards.

The evening is open to all, however, those interested in the films and music should make arrangements with their departments for information about the screening.

MAY 10, 1963

The game soon got underway on the spacious Cortland field, which was surrounded by a 22-foot wire fence. The fence was considered to be an added protection, as the field was flooded with water from the recent rains.

The first inning saw KB down APA II, 8-7, after a two-run home run by Dave Moore to lead off the inning. APA II was unable to score in the third inning, as the next two men were retired by the pitcher. The game was over in the fourth inning, as the last man scored on a walk and a single.

The game was played in front of 9,500 fans, and the final score was 15-9. KB held the lead from the start of the game, and the last man scored on a walk and a single.

For Fifth Defeat At Mid-Season

The varsity golfers of the State University of New York at Cortland are coming into their ultimate defeat, if their play continues at the same pace. They have lost five of their nine matches so far, and their last match was a 5-1 defeat to the University of Buffalo. The game was played in front of 1,200 spectators, and the final score was 15-9. KB held the lead from the start of the game, and the last man scored on a walk and a single.
