It is not in every era that we learn to study the past day and night. The historical news always goes on without our knowing it. In our current era, we are often absorbed in our own little world. The more I think about this, the more I am amazed to learn what we are leaving behind. The future is often seen through the eyes of the past. We often analyze our own actions and decisions, but what about the past? It is often left behind as we move forward. It is important to understand the past in order to understand the present and future. I believe that we should always strive to learn from the past in order to make better decisions in the future.

The Critic

The history of the world is the sum of the actions of everyone who has lived in it. We are often so focused on our own lives that we forget to look to the past and learn from it. We should always strive to learn from the actions of others, both in the past and present, in order to make better decisions in the future.

In any era, we are often absorbed in our own little world. It is important to understand the past in order to understand the present and future. I believe that we should always strive to learn from the past in order to make better decisions in the future.
