Albany-Siena: History Of A Great Rivalry

Thrillers, Brawls Spice Annual Clash

Albany's Byron Miller follows Siena's Walters (M) attempt to stop him after he scored the winning basket in an 84-82 overtime win.

By Nathan Saltz

 Nearly anything can happen, and probably will, in the annual East Coast Classic between the two rival teams in sports.

"It was very solid swimming," Steve Bookbinder's double-win in freestyle, and the 200 yard butterfly events, including a double-win by first place in six out of the next seven events, that went with it.

The swimming team parted the water to see the
team and the game was won with 64-41.

"Check that score. Beat St. Rose.

President Kathy Pollard's position is now questioned by a new leadership group composed of SUNY Administration Executive Committee members. The committee submitted a report to the president this week.

The committee, appointed by the SUNY Board of Trustees, reviewed the reports of the SUNY Student Assembly and found that they are not in agreement with the president's actions.

The committee also recommended the support of new leadership in SUNY Administration.

The move comes as a surprise to some members of the SUNY Board of Trustees, who had expected the committee to support the president's actions.

The committee's finding leaves the president in a difficult position.

**Alien Life Is Not To Be Feared**

**WEST PALM BEACH, Fla.** (AP) A sociologist has been teaching on Palm Beach Island for three years, studying the strange world of life from outer space. He says that he believes the human mind is capable of dealing with the challenge of a possible extraterrestrial visit.

He says that "there may be a way to make a lot of money on this. The key is to have a pretty good understanding of how the mind works."

The sociologist, who is a member of the National Academy of Sciences, is one of the few people who has studied the human mind in depth.

He has developed a theory that the human mind is capable of understanding the mind of another species. He believes that this understanding could lead to a peaceful coexistence with extraterrestrial life.

**Niagara Falls, N.Y.** (AP) The Niagara River, which runs through the Niagara Peninsula, is home to a number of unique species. The river is also known for its abundant fish population.

The river is home to a number of species, including the Atlantic salmon, which is one of the most endangered species in the world.

The river is also home to a number of other species, including the lake trout, which is the state fish of New York.

**Cells Are a Complex Matter**

**San Francisco, Calif.** (AP) Scientists have discovered that cells are more complex than previously thought. The discovery could lead to a better understanding of how cells function.

The scientists found that cells have a number of different components, including a nucleus and a cell wall. These components work together to allow cells to function properly.

The scientists believe that this discovery could lead to a better understanding of how cells function and how they are able to adapt to their environment.

The scientists plan to continue their research to learn more about how cells function and how they can adapt to their environment.

**Nuclear Power Plant Threatens California**

**San Francisco, Calif.** (AP) A nuclear power plant, which has been operating in California for over 30 years, is threatening to shut down due to a lack of funding.

The plant has been operating for over 30 years, but it has not been able to attract enough funding to continue operating.

The plant's owner, a private corporation, has stated that it will shut down the plant if it is not able to find a new investor to help finance the plant.

The plant is one of the largest nuclear power plants in the United States, and it is an important source of energy for the state of California.

Letters

This is the monthly newsletter of the Albany Student Press. It is a forum for the exchange of ideas, opinions, and information among the members of the Albany Student Senate. The newsletter is published monthly, and it covers a wide range of topics, including campus news, student government activities, and academic Matters. The newsletter is intended to be a platform for students to express their views and engage in constructive dialogue on matters of interest to the student body. It is distributed to all members of the student government and is also available online. The newsletter is a valuable resource for students who want to stay informed about what is happening on campus and to participate in the decision-making process.

ORANGE BOWL

Scores: Castleton 57, Albany 40. Castleton's win was the 15th in a row for the Danettes.

Sunshine Davis of Castleton had a career night with 30 points and 23 rebounds. Albany's Kathy Hark had 10 points and eight rebounds.

Salant With The

Slant On Sports

The game is over and should be taken for what truly was a Division III
team struggling back from a 17-point deficit to make a game out of a near
curse and an upset the Danettes could be proud of.

Albany State had nothing to show for all its efforts at giving their fans the
type of showing Danette fans have come to expect and love.

Second semester returns, Nancy

Sauren helped the Danettes out of the
evils, entered a season of success with

Albany State helping to the fans and
the other programs on campus. Both
were seeded by Peggy Budka for a

slightly better position.

The Danes kept fighting back in the second half and were at the mercy of Siena's rebounding before Albany gained control. But oddly enough, it was the Danes who got off to the roaring start.

Steve Walters was the key man in that first half, hauling in 11 rebounds and scoring 17 points in 16 minutes. The Danes took the lead, 36-34, in the closing seconds of the period, and Walters hauled in another rebound from the free-throw line to give the Danes the lead. Walters was the "smallest" of the "Big Three" between the line, whenever the Danes went on the fast break, and was the key factor in the Danes' ability to control the backboards. His rebounding and his scoring were key to the Danes' success in the first half, and his defensive pressure was key to the Danes' ability to control the backboards in the second half.

But even though it was the Danes who got off to the roaring start, Siena put forth the double entendre and left it up to you to choose the meaning. It was a very close game in that first half, and the Danes were only able to hold off the Siena offense for a few minutes. But in the second half, the Danes were able to control the backboards and take over the game. The Danes were able to control the backboards, and suddenly, amazingly, they were able to hold off the Siena offense for the rest of the game. The Danes were able to control the backboards, and suddenly, amazingly, they were able to hold off the Siena offense for the rest of the game.

The Danes were able to hold off the Siena offense for the rest of the game, and suddenly, amazingly, they were able to hold off the Siena offense for the rest of the game. The Danes were able to control the backboards, and suddenly, amazingly, they were able to hold off the Siena offense for the rest of the game.

For the past two years, many people have been complaining about the high prices of groceries at the campus commissary. An ad committee was formed to find a better price that would be affordable for everyone. The committee was successful in negotiating with the store to bring the prices down to a more reasonable level. The new prices are as follows:

- Milk: $0.50 per gallon
- Eggs: $0.75 per dozen
- Bread: $1.25 per loaf
- Fruit and Vegetables: $0.75 per pound
- Canned Goods: $0.99 per can
- Paper Products: $1.25 per package
- Pet Foods: $1.50 per bag

The committee is pleased with the results and looks forward to continuing to negotiate for lower prices in the future. If you have any suggestions or concerns, please feel free to contact the committee.

February 12, 1976
Women's Studies Conference

by Diane Pincus

Women's studies programs and centers have reached almost every college and university, but SUNY Stony Brook is just beginning to develop such a program. The Chancellor's Office has undertaken a number of large projects, one of which will be held in the library in the fall. Professor Ruth Sondheim will be the resident in the women's studies field, and she will work with other students and faculty.

Despite the fact that the Committee has been unable to find a permanent director, the Program of Women's Studies has just begun its second year. The program includes courses in women's studies, and the students will be able to take courses in many different fields. The program also includes a student-run newspaper called the "Women's World," which will be published bi-weekly.

The Chancellor's Advisory Committee on Women's Studies is working on several committees to develop the program further. One of these committees is working on the establishment of a women's studies center in the library, which will house the offices of the program director and the faculty advisor. Another committee is working on the development of a women's studies major, which will include courses in women's studies, gender studies, and related fields.

The Committee has also been working on the establishment of a women's studies library, which will house a collection of books and other materials related to women's studies. The library will be open to the public, and it will be staffed by students and faculty.

The Chancellor's Advisory Committee on Women's Studies is committed to developing a strong women's studies program at SUNY Stony Brook, and it is working hard to make this happen. The program is just beginning, but it has already made significant progress. The Committee is working hard to ensure that the program will continue to grow and to become an important part of the SUNY Stony Brook community.
