Environmental Crime

Construction of the campus of Albany State began in 1964. Since that time an industrial area has grown in the Exchange West, east of campus, and offices have been built in the Colonie and Central Avenue area. And all these, while they have brought the area, as well as neighboring communities,新的 trouble because of the lack of noise and traffic restrictions that have been made.

At a recent meeting of the community association, however, it was pointed out that the noise problem was not only due to the construction of the new buildings, but also to the increasing number of students who live in the area. It was recommended that some action be taken to reduce the noise levels and to improve the overall quality of life in the area.

Some of the most pressing issues currently facing the community association are the following:

1. Noise pollution from construction and student parties.
2. Traffic congestion caused by the increased number of students.
3. Safety concerns related to the increased number of students.
4. Loss of privacy and tranquility for residents.

The community association is working closely with the university administration to address these issues and to find solutions that will benefit both the students and the residents of the area.

Educational Excellence?

Once upon a time, there existed a society that ideologically believed in the "straight" path of educational excellence. The students, being relatively "straight," were not only straight, but were also expected to be of a high moral standard. The teachers, being "straight," were expected to uphold the same high standards.

Times, however, have changed. The "straight" path of educational excellence is no longer the norm. Instead, there is a new path that allows for greater tolerance and flexibility. The students are more capable of confronting this new path and are not afraid to express their opinions.

The teachers, too, are not as rigid as they once were. They are more open to new ideas and are willing to discuss them with the students. This new path has brought a new sense of freedom to education, allowing for greater creativity and innovation.

Communications

Easter Hassles

To The Editor:

We would like to bring to the attention of the student body the fact that we are now scheduled to have a holiday on Monday, April 13. This holiday is in honor of Easter Sunday. Considering the great distances that students travel to and from campus, we would like to suggest that this holiday be moved to a later date.

We propose that spring vacation should begin on Tuesday, April 14. This will allow students to have a longer vacation period, while still allowing them to return to campus on Monday, April 13 in time for the start of the academic year.

Thank you.

John N. Anderson
Chairman, Department of Anthropology

Bad News?

To The Editor:

The Thursday, November 10 issue of ASP was the last issue that I received. Although I know that the school has a plan for distributing the newspapers, I have not received one in several weeks. I am beginning to wonder if there is a problem with the distribution system.

I hope that this issue will be distributed soon so that I can read it and stay informed.

Sincerely,

Jane Maddow
Managing Editor

Environmental Crime

The growth of SUNYA has been met with resistance from the local community. SUNYA's growth has been a source of concern for local residents, who are concerned about the impact it will have on the environment.

In a recent interview with the Albany Student Press, SUNYA President Benezet said that the university is committed to sustainability and environmental responsibility.

"We are committed to being a good neighbor and to protecting the environment," said Benezet. "We believe that education and sustainability go hand in hand, and we are dedicated to making SUNYA a model for sustainable practices.

The university has taken several steps to reduce its environmental impact. These include:

1. Using renewable energy sources.
2. Reducing waste and increasing recycling.
3. Implementing conservation measures.
4. Educating students and staff about sustainability.

The university's efforts have been praised by local environmental groups, who commend SUNYA for its commitment to sustainability.

Crimes on Campus

 Petty Theft a Complaint

By Shara Cohen

In the past year, SUNYA has experienced a steady increase in the number of crimes committed on campus. According to the recent issue of the Albany Student Press, the number of crimes has increased by 30%.

The increase in crime has caused concern among students and faculty. Many students feel unsafe and are worried about their personal safety.

The university has taken steps to address the issue. President Benezet said in a recent interview that the university will continue to work with local law enforcement agencies to ensure the safety and security of the campus community.

FIVE CENTS OFF CAMPUS

The Albany Student Press is offering a five-cent discount on all copies of the newspaper. This discount applies to all copies of the newspaper, including those sold on campus and at other locations.

The Budget
Continued from page 1
One of the most controversial new programs has been the Day Care, with such a high cost. This cost will be $2. The whole project is now under way and the City has been informed of the state's intention to use $100,000 for the project. Hopefully, this will be a model of community action and evaluation.

WHO CAUSES PREGNANCY?

Who causes pregnancy? It is a question that has been raised by prostitutes' organizations, women's groups, and medical professionals. It is a question that has been asked by people who are concerned about the future of women and children. It is a question that has been asked by people who are concerned about the future of society.

**A Scent Of Flowers at PAC A SUNYA Theater Triumph**

by Beth Koepke

Although "A Scent of Flowers" by John Thornton is scheduled for November 14th, I procured it on Monday, November 17th. It is a reading in many respects. The performances by Martha Carney in Ray and Muriel Douglas in Kitty have been particularly effective. The audience is left in doubt whether the perfume package and the flower are the same thing. It is clear that Martha Carney manifests the quality of a young woman who is not afraid to explore her surroundings. She is also a most effective performer in the role of Kitty. Her simplicity is remarkable, and it is hard to think of any one else who could have filled that role.

"A Scent of Flowers" is vibrantly and uncomplicated. The perfumes in the play's repertoire are added to or subtracted from, and the characters seem to be the same. They deal with flowers, perfumes, and the sense of smell. The roles of Kitty and Ray are well executed by the two performers.

All seem lost, unhappy people, but the two women's love is real. The play's lightness is offset by the gravity of the situation. "A Scent of Flowers" is now playing at the SUNYA Theater.
Chance and the Draft

Political Tendencies

Recent political happenings indicate a growing anti-draft sentiment and a need for more immediate action by the Board of Trustees and University officials to avert the possibility of violent demonstrations and other campus unrest. The Board of Trustees and University officials have been slow to respond to the situation, and it is clear that more immediate action is necessary if the nation's defense is to be maintained.

It is the position of the Student Press that the Board of Trustees and University officials should take the following measures:

1. The draft should be abolished immediately.
2. The Board of Trustees and University officials should meet immediately with representatives of the anti-draft movement to discuss a peaceful solution to the situation.
3. The Board of Trustees and University officials should take steps to prevent any further violence on the campus.

If these measures are not taken immediately, the nation's defense may be endangered.

Prominent Action May Beat Draft

The following article explains how some lucky men, by virtue of the accident of their date of birth, and their good fortune to be college students at the time, have been able to avoid the draft.

Chance means freedom to wish. Freedom is the decision to live as one would, to conduct one's own business, to weave one's own destiny, to have one's scars on his face may be completely different. .

The following article explains how some lucky men, by virtue of the accident of their date of birth, and their good fortune to be college students at the time, have been able to avoid the draft.

The logic has it: drop the IIS and play "Lottery Bingo" is practically nonexistent. One reason is that students with lottery numbers of 196 or over have never received the I-S(c) before, and are taking at least one year of eligibility in the lottery on December 1, 1970. Also, students with lottery numbers of 195 anywhere in the nation who have never received the I-S(c) before, and are taking at least one year of eligibility in the lottery on December 1, 1970, are not involved in dropping the IIS and playing "Lottery Bingo".

Israel

To the Editor:

I thought your article on "Israel's Right to Live" as an expression of the situation in the Middle East is a little exaggerated. The real issue is that the Israeli government is trying to maintain control over the territories it has taken by force. This is a violation of the Geneva Conventions and international law.

Israel should return the territories it has侵占 over the years, and live in peace with its neighbors. The only way to achieve this is for both sides to sit down and negotiate.

It is true that buses don't run to the Kibbutzim from the city. This is due to a lack of demand, and not because of any political reason.

Service

GFL: ALIENATED AMONG THE OPPRESSED

by Kathy Kelley

Humans are America's largest commodity. On Tuesday, October 20th, 1970, a group of gay liberation fighters arrived at the University of California at Berkeley to deliver a message: 'We are human beings, not commodities. We are alphanumeric, not objects. We are people, not things.' This was the first of many actions by GLF to call attention to the oppression of gay men and women. Through their actions, they hope to create a sense of solidarity among those who are oppressed and to promote social change.

Why doesn't General Electric talk about thermal pollution when they talk about nuclear power plants?

General Electric pioneered the development of nuclear power plants in 1957. Right from the beginning, the company talked about the environmental benefits of nuclear power. Unlike fossil-fueled power plants, nuclear plants don't burn anything to make electricity. And where there's no fire, there's no smoke.

General Electric was one of the first companies to recognize the potential of nuclear power as a clean, reliable energy source. They invested heavily in research and development to make nuclear power a viable option for the future. As a result, General Electric has a long history of promoting nuclear energy as a way to reduce greenhouse gas emissions and combat climate change.

In contrast, General Electric has been criticized for their lack of transparency when it comes to the environmental impacts of their nuclear power plants. Many critics argue that General Electric's emphasis on nuclear power has been driven more by profit motives than a genuine concern for the environment. They believe that General Electric is more concerned with promoting nuclear energy as a way to increase their market share than with actually addressing the underlying causes of climate change.

In conclusion, while General Electric may not explicitly discuss the issue of thermal pollution when they talk about nuclear power, their history and track record suggest that they have a vested interest in promoting nuclear energy as a way to meet growing energy demands while reducing greenhouse gas emissions. However, critics argue that General Electric's approach to nuclear power is more about profit motives than a genuine commitment to environmental sustainability.

RESTRICTED ZONES AHEAD: YIELD TO RAPIDLY MOVING PARKING LOTS

by John Fairhall

Plans for new permanent parking lots have been drawn up by Prof. John Fairhall, and the proposal is set to be approved by the Student Senate next week. The major portion of this proposal involves the construction of a new parking lot in the area of the current junior parking lot. This new lot would be designed with the intent of accommodating the needs of the growing number of students and faculty members who use the campus for academic and social purposes.

The proposal includes the following features:

1. The new parking lot would be located in the area currently occupied by the junior parking lot.
2. The lot would be designed with 500 parking spaces to accommodate the growing number of cars on campus.
3. The lot would be constructed with a concrete surface to ensure durability and a smooth surface for parking.
4. The lot would be equipped with adequate lighting to ensure safety and visibility.
5. The lot would be designed with access to the main campus buildings and facilities.

The proposal aims to alleviate the current parking congestion by providing additional parking spaces that will be available to students, faculty, and staff. The new lot will be constructed in phases to accommodate the growing need for parking spaces.

The proposal is expected to be approved by the Student Senate next week, and the construction of the new parking lot will begin shortly thereafter.

The Albany Student Press will continue to provide updates on the progress of this proposal and any other developments related to campus parking.

Looking north at West Pedestrian site and Colonial Quad.

To the right of the new parking lot, the Albany Student Press will continue to provide updates on the progress of this proposal and any other developments related to campus parking.
