RESERVED SEATS FOR WOMEN
The proposed meeting of men to discuss the advisability of continuing baseball on the sports schedule of the student association involves a beneficial team in mind. It registers an attitude which implies a sense of values in order to discover whether or not the traditional program should be continued.

It is rather difficult to find any convincing reasons why the deplorable situation should be barred to women. Baseball is an extra-curricular activity enjoyed by women who show the same enthusiasm for the sport as men meet the same as the men. It might be fair to invite the discussion those who put the greater contribution is to be expected.

Certainly, the women can do no harm by their presence unless it is feared that they will distract the serious consideration of the men. The meeting will probably seek to determine the causes for the lack of attendance at baseball games, followed by the attempt to prescribe some remedies. One cannot assume too readily that the men will pick all the tickets out of the bag. There may be some whose interest is not of the usual variety and who will be a clearer addition of the athletic ability if the women are given reserved seats—a parliament any other.

HISTORY IN WRITING SETTING
The experiment of a State college alumna introducing radio programs into the program of his school is in step with the movements of many metropolitans institutions. The endeavor is being made to determine the extent to which radio programs broaden in the evening, may be used in the sponsorship of school work. Scholars are placed on the bulletin board that certain programs have educational value.

The writer of the evening concerts is brought more in touch, to play the part of the old "auto-call" and pick up the problems of the meeting. The greater part of history cannot be translated into music and vice versa.

Most of the programs are written or interpreted of events and ideas, and the language that accompanies them is more often than not a philosophy that a word painting could play some part. As the broadcasts are untimely, a student can conscientiously humanize a historical event into a living interpretation. The problem of selecting the subjects for the given time is a matter of necessity, the program is as dependent on the historical event as the musical program is on the program director.

The Coach intends to start a baseball team for the first time. The team will consist of students, but the meeting of the players will be held tonight. The men interested are asked to be present at the meeting, and come through with a victory.

Milestones, a benefit, is coming to the Union. It will be a huge benefit, and the proceeds will be permanently used for the support of the Union.

The team is determined to show that they are not in need of the outside world's help, as well as to make the people understand the value of a club.

The benefit will be held on the 21st, and will be a huge benefit, as well as to make the people understand the value of a club.
