Three to Get Ready

Today the world is in a state of flux. The air is filled with the atmosphere of the unknown. It seems that the only constant is change. But what kind of change? Is it for the better? Or is it a sign of the end of the world?

We have seen the world change before. It has been a long time since we were at peace. But we have always come out on top. We have always been able to adapt and survive.

Now a new factor appears, a fifth element. It is a force that we cannot control, but we can learn to live with. This is the element of change. It is a force that we must learn to understand.

We are not at all sure we will succeed. We wonder if we will succeed without being burned.

We need to be known for something. We need to have a name for ourselves. We need to be remembered.

We here at State know we are in a teacher training system. We are preparing ourselves for the future. We are teaching the next generation. But what kind of future do we want? What kind of world do we want to leave behind?

We are not sure. We are not sure we will succeed. We are not sure we will not be burned.

We need to be known for something. We need to have a name for ourselves. We need to be remembered.

We are not at all sure we will succeed. We wonder if we will succeed without being burned.

We need to be known for something. We need to have a name for ourselves. We need to be remembered.

We are not sure. We are not sure we will succeed. We are not sure we will not be burned.
