STATE MEETS COLGATE TO-MORROW NIGHT
WITH PLANS TO SURPRISE OVER-CONFIDENT TEAM
WITH HARD FIGHTING OPPOSITION

State's Game Proved Unlucky For State Ball Tossers

Just how Maroon will blend with Purple and Gold from a basketball standpoint will be witnessed tomorrow night, when State College resumes athletic relationships with Colgate after a lapse of two years. The traditional court contest between the two Universities of New York state colleges will take place in the Colgate college gymnasium at Hamilton.

In the opinion of several Albany Colgate alumni, the Maroon has been looking forward to tomorrow night's affair with State merely a practice game. But the truth is sometimes like the weather—looking in one direction was not to be looked upon as "easy weather."

GAMMA KAPPA PHI HOUSE IMPERILED BY GAS MAIN LEAKS

Girls in Constant Fear of Having House Condemned By Health Officers

At the corner of Park Avenue and Quail Street, a gas main sprung a leak. As the result, one man was killed and several others were injured. The leak occurred at about 3:00 a.m. on March 4, 1924.

The Gas Main Break

The leak occurred shortly after midnight when a worker was checking a valve on the main. The man was struck by a shower of sparks and immediately fell to the ground. Other workers rushed to his aid, but he was pronounced dead on arrival at the hospital.

In the wake of the leak, the entire street was evacuated. Firefighters and police officers arrived on the scene to help control the situation. The area was closed off to prevent any further injuries.

The Gas Board investigation

An investigation by the Gas Board revealed that the leak was caused by a faulty valve. The company was immediately notified, and work began to repair the damage.

The impact of the leak

The leak caused considerable disruption to the area. Many businesses were forced to close due to the loss of gas. The city was also forced to spend a significant amount of money to repair the damage.

The Maroon's perspective

The Maroon expressed condolences to the family of the victim and praised the efforts of the firefighters and police officers who worked to control the situation.

The future of Gamma Kappa Phi

The leak left the Gamma Kappa Phi house in a precarious position. The house was condemned by health officials due to the risk of methane gas.

State's Basketball Schedule

State will play Colgate tomorrow night, followed by a game against the Purple and Gold from Purple and Gold high school. The Maroon is looking forward to matching up with these opponents.

The summary of the game follows:

State College

FB PP TP
Hornung, r.f. 3 1 7
Curridan, fl. 1 0 2
Cairns, c... 1 1 2
Davies, r.f. 2 0 1

CLASS SPIRIT AND COLLEGE SPIRIT 

To the writer much of the present difficulty of adjustment in the college seems to be the result of a mistaken notion concerning the relation between class spirit and college spirit. The essential duty of management is to make for smoothness in operation of any organization. There is no substitute for a sense of duty in harmony in State College. 

A special service Sunday, March 2, in the Cornell Chapel, will speak. Come and discover what the “special” feature is to be.

CLASS SPIRIT EXPLAINED BY DR. THOMPSON 

At Y. W. C. A. on Wednesday afternoon, March 5, Dr. Thompson gave an illustrated lecture on “The Fool,” by Channing Pollock. This play deals with the life of a young man who tried to live like Christ, and to carry the heart as important, vital needs of essential well being. 

THE SLOGAN OF THE DEDICATED LIBRARY 

The essential duty of management is to make for smoothness in operation of any organization. There is no substitute for a sense of duty in harmony in State College.
MICHAEL FARADAY
1791-1867
Apprentice to an English bookbinder. Attracted to the attention of Sir Humphry Davy, becoming his assistant. "The greatest experimentalist of all time," says one biographer. The electrical unit Farad was named for him.

In 1880 the Edison Electric Illuminating Company, of New York City, installed a generator of 1200 lamps capacity, then considered a giant. By continuous experimentation and research the General Electric Company has developed generators 900 times as powerful as this wonder of forty years ago.

"What's the use of it?"

Michael Faraday saw the real beginning of the age of electricity nearly a century ago when he thrust a bar magnet into a coil of wire connected with a galvanometer and made the needle swing.

Gladstone, watching Faraday at work in his laboratory, asked, "What's the use of it?" The experimenter jestingly replied, "There is every probability that you will soon be able to tax it." The worldwide use of electricity that has followed the Faraday discovery abundantly justifies the retort to Gladstone.

Faraday's theory of lines of force is constantly applied in the Research Laboratories of the General Electric Company in devising new electrical apparatus of which Faraday never dreamed. Every generator and motor is an elaboration of the simple instruments with which he first discovered and explained induction.

DR. ELIZABETH NOYES VISITS STATE ON WAY TO VASSAR
Dr. Elizabeth Noyes, Professor of Hygiene of the North Carolina State Women's College, spent Tuesday of last week visiting the department of hygiene and physical education at State College. Dr. Noyes had previously visited Smith College, Wellesley College, and a few smaller ones in Virginia and was on her way to Vassar College. Her visits were a part of work assigned to her under a fellowship granted under the Child Health Association.

BIOLOGY DEPARTMENT PROVIDES DIVERSE INTERESTS

"Isn't that hered, girl?" Imagination picking up that silly creature? "Oh, don't you dare!" "Gee, that's awful!" One must stop hunting on State College not errolls its fresh men with the presence of a scientific scene. Biology 1 laboratory hours have been off the little bouts of endurance lately. Grasshoppers have been chosen for those entering into the Land of Noil, and the Land of Noil. Professor Woodard informs us that next semester will be given not only for the genuine admirers of Biology 1, but also for those who still utilize the "Fresh's Lament":

"Babes in arms and chloriformed fungi.
An's antennae and skulls of dogs.
Cephalopods and ear of worm's eye.
Pig's proboscis and scaphoped alistic.
Oh, will I have to take Biology?"

CANTERBURY CLUB WANTS BIG ATTENDANCE

The Canterbury Club again wishes to make an announcement. Members and visitors remember Canterbury's last meeting before Christmas. Again we are settled to routine work and can Canterbury steps forward to promote friendship and social meetings. Thursday, February 28, at St. Andrew's Church on Maine and West End Avenues, the first meeting of this new year will be held.

Dr. Thompson will deliver a talk to the members and all those who wish to come. You all know Dr. Thompson and what he can do. Canterbury feels privileged to be able to have Dr. Thompson. Let everyone come.

BASKET BALL SCHEDULE SHOWS NEW DEVELOPMENTS

For the first time in recent history of State's athletic relations with Union College the annual basketball game between the two institutions will take place in Albany. This announcement has been made by the athletic management. Through the correspondence between the officials of the two schools.

Another change from this year's schedule is made by the arrangement for the game with Cooper Union. This contest will probably be played in New York, whereas, this year, it took place in the local gymnasium. Middlebury, Colgate, Pratt and Williams are on the list which includes the basketball management.

Games are also pending with Rochester Institute of Optometry, St. John's and Colgate.

LUMBER JACKS RIVAL IRIS CASTLE AS THE INSPIRERS OF NEW STYLE

(Continued from page 1)

E. L. 3

It is understood from reliable sources that Paul Poiret of Paris and London will soon come to America to investigate the appearance of the violet green plaid jacket, which threatens to startle the fashion editors of the world.
