Life Can Be Beautiful
Under Proper Social Conditions

By Joyce Chism

The Central theme from the beginning of democracy and rather
recently throughout the whole of the United States has been the
rejection of war and the promotion of peace. The peaceful;
well-being of the individual is too important to risk;
and constant strife is in the best interest of all.

In this era of atomic weapons, it is easy to be
alarmed at the thought of a possible world war.
However, we must remember that peace is
not just the absence of war, but the existence
of harmony between nations.

The United States has been a leader in
international conflict resolution, and its
efforts have been successful.

In conclusion, peace is the best policy for
the individual and the nation.
