Donovan Reinterprets  
Classic Works in Novel  

A new attempt to reinterpret classic works of literature, "Donovan: A Captain's Heritage," by Dr. Forrester M. T. Donovan, has recently been published by the University of Illinois Press and is currently in distribution.

The novel is a re-imagining of the life of a fictional British admiral, Captain Thomas Donovan, who served in the Royal Navy during World War II. Donovan's experiences are depicted through the eyes of his daughter, Emily, who writes a series of letters to her soldier father, detailing his travels and adventures.

Collins Says Lines 'Unfortunate'  
Announces Plan for Registration  

Dr. Collins, the new president of the university, has announced that the lines "unfortunate" will be removed from the start of the registration process.

The lines, which were previously used to manage the influx of students during registration periods, have been causing confusion and frustration for students and faculty alike.

Collins also announced a plan for registration that will take place in the Dutch Quadrangle on May 12. The plan will involve the use of computerized systems to handle the process, making it more efficient and less stressful for all involved.

Famed New York Ensemble Provides Superb Evening  
By John Press  

Without a doubt, this reviewer can say that the evening of April sixteenth Albany heard the finest brass ensemble in the United States. The performance of the New York Brass Quintet was thoroughly enjoyed by an enthusiastic audience, and rightly so.

The New York Brass Quintet has been a popular fixture on the American music scene for many years, and this performance only served to confirm their status as one of the foremost brass quintets in the country.

Here are 7 knotty problems facing the Air Force: can you help us solve one?  

1. In the prone, if something goes wrong, the Airmen are exposed to a nuclear blast.  
2. The Airmen are exposed to extreme heat and cold.  
3. The Airmen are exposed to high levels of radiation.  
4. The Airmen are exposed to high levels of noise.  
5. The Airmen are exposed to long periods of confinement.  
7. Space propulsion.
