Liquor Policy

Student opinion about liquor on campus is proving to be wide and varied. We hope that the committee which will discuss this issue will consider some of these opinions of the students since they are not the ones to be affected.

The actual application of this modification will require careful thought on the part of those making decisions and by students on campus. A mature attitude should be displayed by all concerned.

The behavior of students regarding liquor will be watched as carefully as this plan here. Perhaps it will determine the establishment of other more liberal policies.

This is a serious matter and could mean greater freedom for those who wish to drink. We think alcohol in the campus is proving to be wide and varied.

There is a rumour that for every editorial those who have stated their opinions the readers will inform the editorial board and give the opinion.

This is simply not the case. The only way to get a view of the campus is to ask the students to submit their opinions. This would then be the only way to get a view of the campus.

Liquor Draft Requirements

One of the major policies concerning the sale of liquor is the selective service and its "200" classification. The draft board administering the program has been vague in its explanation of their requirements.

Information regarding the selective service is passed on to the University which may result in the student body. We hope that the University has failed on several occasions to fulfill its obligations.

The Albany State Ski Club has for the past several years built up the ski area in order to support the Campus Chest. The club, headed by Al. Pollock, president, and Mr. Stahl, are the driving forces behind this project.

The club, which began its existence in 1930, is now in its fourth year of existence and has been able to contribute $450 to the Campus Chest fund.
