TODAY
As Time Went By . . .

Many years ago when people still believed in people and still trusted their fellow man, a group of students started a paper as an outgrowth of an organization called Student Associates. For a long time they published the Student State College News. On February 28, 1848, the final issue of this paper appeared. (The issues after this were just name changes to the now-famous Putnam County school.)

They had been striving for the right to print, gaining the right to print, fighting for the right to print, and in the end they were able to print what they wanted, when they wanted.

This issue contained articles such as "The Future of the University," "The Importance of the Future," and "The Future of the Future."
