Steingut Bails Out Two CUNY Demonstrators

by Paul Rosenthal

Two City University students arrested at Tuesday's demonstration have been released on bail with the aid of attorneys contacted by Assembly Speaker Stanley Steingut. Dean Fawcett, 1R., and Robert Hoke, 37, both of New York City, were taken into custody by Capitol Police shortly after demonstrators forced their way into the Capitol building. Several windows were broken in addition to other vandalism, police sources said.

The defendants were released that night after a short stay in the Albany County Jail to await indictment on Wednesday.

Friends of the arrested students called several SUNYA students and the assemblyman's office of State Senator to arrange for counsel.

Paul Kusman, an attorney practicing with Rosenblum and Leventhal, the SA-staffed lawyers, was called. Kusman said he made his services available to the CUNY students and he did go to Police Court Wednesday, only to find that the defendants were already represented.

According to Steingut Press Secretary Bill Alexander, the assemblyman had been approached Tuesday by other New York City legislators trying to find counsel for Fawcett and Hoke. Steingut reportedly contacted Stanley Rubenstein, an attorney on the staff of the Speaker's chief counsel. It was Rubenstein who arranged the defendants' release from jail Tuesday night.

Questions have been raised by many individuals as to why Steingut decided to become involved. A spokesman for his Capitol office said Fawcett and Hoke "seemed to be the innocent victims of the situation."

Kusman said, "No one seems to have any idea why Steingut showed interest in all of the defendants themselves."

Fawcett, a City College student, was arrested for criminal mischief. Hoke, a father of six and a graduate student at Hunter College, was brought up on charges of criminal mischief, harassment, and unlawful assembly. Bail was set at $1000 and $2500 respectively. Both defendants have been released in the custody of their attorneys.

Whitaker, who arranged the students' release from jail Tuesday night, said the students now await trial, but for now they are able to go home. A spokesperson from the US Attorney's Office stated that the defendants face federal charges, but that their case has not yet been formally filed with the court.

SUNY Students Continue Development

A new group of students is helping to ensure that SUNY campuses continue to be a strong force in the development of educational opportunities. This group, known as SUNY Volunteers, was established by the SUNY system to provide a mechanism for students to become involved in the development and management of educational programs.

The SUNY Volunteers will play a key role in the implementation of a new SUNYwide program, SUNY in Action. This program will provide funding for innovative education programs at SUNY campuses across the state. The funding will be used to support projects that address the needs of specific campus communities and promote the development of new educational opportunities.

The SUNY Volunteers will work closely with SUNY administrators and faculty members to identify and develop these projects. They will also play an important role in ensuring that the projects are implemented effectively and that they achieve their intended goals.

The SUNY Volunteers will be drawn from a diverse group of students across the SUNY system. This diversity will ensure that the program reflects the needs and priorities of the SUNY community as a whole.

The SUNY Volunteers will receive training and support to help them effectively perform their roles. They will also have access to a network of experienced and knowledgeable leaders who can provide guidance and advice.

SUNY Volunteers will be involved in a variety of tasks, including identifying and developing new educational opportunities, working with campus administrators and faculty members, and providing feedback to SUNY leaders on the effectiveness of the program.

The SUNY Volunteers will be rewarded for their efforts. They will receive recognition for their contributions, and they will have the opportunity to develop important skills and experiences that will be valuable in their future careers.

The SUNY Volunteers program is a testament to the commitment of SUNY to the development of educational opportunities. By involving students in this important work, SUNY is ensuring that the needs of the SUNY community are being met and that the system is strong and vibrant.

Summer Jobs Camp Dippikill

Job Description

Summer Jobs Camp Dippikill

Job Location

Camp Dippikill, 79 miles north of the Adirondack Mountains

Period of Employment

June 7, 1976, to August 6, 1976

Salary

$101 per week (35 hours per week)

Who may apply

Applicants must be 16 years of age or older

Special qualifications

None

Job Overview

Camp Dippikill is located in the Adirondack Mountains, 79 miles north of the Adirondack Mountains. The camp offers a wide range of activities, including swimming, boating, hiking, and nature study. Applicants must be able to work in a team environment and have a strong commitment to the camp's mission.

When and where to apply

Applications may be sent to: Camp Dippikill, 79 miles north of the Adirondack Mountains.

Interviews

Required of all applicants

Special Spectacle

By Richard Nemeroff

SUNY Volunteers is a new initiative that seeks to involve students in the development of educational opportunities at SUNY campuses. The program is designed to provide funding for innovative education programs and to promote the development of new educational opportunities.

The SUNY Volunteers will work closely with SUNY administrators and faculty members to identify and develop new educational opportunities. They will also play an important role in ensuring that these opportunities are implemented effectively and that they achieve their intended goals.

The SUNY Volunteers will be drawn from a diverse group of students across the SUNY system. This diversity will ensure that the program reflects the needs and priorities of the SUNY community as a whole.

The SUNY Volunteers will receive training and support to help them effectively perform their roles. They will also have access to a network of experienced and knowledgeable leaders who can provide guidance and advice.

The SUNY Volunteers will be involved in a variety of tasks, including identifying and developing new educational opportunities, working with campus administrators and faculty members, and providing feedback to SUNY leaders on the effectiveness of the program.

The SUNY Volunteers will be rewarded for their efforts. They will receive recognition for their contributions, and they will have the opportunity to develop important skills and experiences that will be valuable in their future careers.

The SUNY Volunteers program is a testament to the commitment of SUNY to the development of educational opportunities. By involving students in this important work, SUNY is ensuring that the needs of the SUNY community are being met and that the system is strong and vibrant.

Extended Bus Schedule Tonight

The expanded bus schedule for tonight will be in effect until 11:30 p.m. Buses will be leaving the SUNY GSA every hour on the hour. The last bus will be leaving at 11:30 p.m. All buses will return to their respective campuses at 11:30 p.m.

There will be no buses leaving after 11:30 p.m. All buses will be returning to their respective campuses at 11:30 p.m.

If you have any questions or concerns, please contact the SUNY GSA at (518) 442-4000. Thank you for your cooperation.
SUNYA Students Boost Jimmy Carter's Campaign

by Kevin Sproul

His Stature smil alone dramatic from the corner of both West and Northwood. The building is filled with the dynamism of the poltical, and the aura follows suit.

News desk

President Carter's love, for and the students, was the dominant theme of the students' campaign to boost Jimmy Carter's campaign in this area. Carter himself, along with five of his top advisors, spoke to the students.

The students, however, were by no means satisfied. They had high expectations for Carter's campaign and were anxious to see him succeed.

They noted that Carter's campaign had made some progress, but there was still much work to be done. They called for more active support from the student body, and urged the students to vote for Carter in the upcoming election.

In conclusion, the students emphasized the importance of Carter's campaign and urged the SUNYA community to get involved and support Carter in the upcoming election.

Nuclear Energy: Spend a Fortune to Save a Fortune?

by Bruce Smith

The idea of nuclear energy as a potential source of power is not a new one. However, the recent news about the nuclear power plant in Three Mile Island has brought the issue of nuclear energy to the forefront of public discussion. The question of whether nuclear energy is worth the cost is a complex one, but it is one that the SUNYA community must consider.

The cost of nuclear energy is high, but the benefits are also significant. Nuclear energy is a source of energy that is both clean and reliable, and it can provide a steady supply of power for the future. However, the cost of nuclear energy is not the only consideration. The safety and security of nuclear energy is also a concern.

The September 11th attacks on the World Trade Center and the Pentagon have raised concerns about the safety of nuclear power plants. The nuclear industry has taken steps to improve the safety of its plants, but the issue of nuclear safety remains a concern for many people.

In conclusion, the question of whether nuclear energy is worth the cost is a complex one. The SUNYA community must consider the benefits and costs of nuclear energy before making a decision about whether to support or oppose the use of nuclear energy.

College Expo in Daytona

From March 20-24, Daytona Beach will be the site of a consumer exhibition that will focus on the emerging trend of "green" living and sustainable products. The event, called "College Expo," is being held in conjunction with the Daytona Beach International Boat Show.

The Expo will feature over 100 exhibitors, including companies from around the world, showcasing their products and services. The event will also feature a variety of educational sessions and workshops, designed to help attendees learn about sustainable living and green products.

In conclusion, the College Expo in Daytona Beach will be an opportunity for students and the SUNYA community to learn about the latest trends in sustainable living and green products. The event will feature a variety of exhibitors and educational sessions, and is sure to be a valuable resource for anyone interested in sustainable living.

**DAH ISCH BLIMP**

The Blimp is back. The West German Government recently approved the expenditure of 6 million marks for construction of a football-field-sized hot air balloon that will displace 500,000 liters at an altitude of 2,000 feet.

The ballasted dirigible will reportedly carry more than 50 tons of cargo at extremely low cost and has proven itself in over 200 flights.

**ZODIAC NEWS**

Football-field-sized hot air balloon recently approved the expenditure of 6 million marks for construction of a football-field-sized hot air balloon that will displace 500,000 liters at an altitude of 2,000 feet.

**FOOT FOLLIES**

A New York doctor is warning that long hair can be extremely hazardous to your health and safety.

Doctor Catherine Carlson, an orthopedic physician says that long hair on the head can cause problems and even lead to serious injuries in some cases.

---

**OZONE DEPLETION**

A University of California study indicates that the gradual depletion of the earth's ozone layer through the use of propellants used in aerosol sprays has caused the ozone layer to thin over the past 10 years.

Calculations show that a 10 percent decrease in the amount of food crops is likely to result in up to a 40 percent increase in the number of skin cancer cases suffered by humans around the world.

Earlier studies had placed the decrease at around 20 percent rather than the 35 to 40 percent level. Bombay and Finland, both countries with populations used in propellants, were recently studied by the Earth.

The bomb that, however, is that the ozone layer is not the only problem. With Earth scientists claim most ozone damage simply won't do it again.

As a result, the new egg is being marketed at a national level for restaurants.

**ANTI-BABY SHOT**

Medical researchers in New Delhi are working on a new vaccine that may be effective in preventing cancer at the 35 to 40 percent level. Doctor G.P. Talwar of the All India Institute of Medical Sciences says that the new vaccine is being tested for safety on small groups of women in at least six countries.

If the vaccine succeeds, Doctor Talwar says, it would mean that women could prevent pregnancies at all.

---

**FROSTY MORTIES**

The National Weather Service is using its annual method for monitoring weather conditions and possible frost conditions. The Midwest's Special Report on Agriculture this fall for 15 years has been collecting data about every and frost from all people's gardens.

Information about snow and frost is used to determine the frost danger in different areas. The Agricultural Service Collins family, reports on all about 200 million acres, states that this year's garden are growing throughout the state of the frost conditions down to this farm.

**Blow-Up**

True Life Adventure

by Naomi Friedlander

More who-what-where in the "Blow-Up" film is an example of how the director, John Cassavetes, uses the power of cinema to tell a story.

"Blow-Up" is a film about a man who is living in a world of fantasy, and who has experienced a crisis of identity.

The film opens with a sequence of shots that show a man walking down a street, and looking in windows. The man is dressed in a suit and tie, and he is carrying a briefcase. The camera follows him as he turns a corner and enters a building.

The man is a photographer, and he is working on a project that involves taking pictures of models. He is focused on his work, and he is not aware of the people around him.

As the film progresses, the man begins to have flashbacks, and he begins to question his own identity.

He is haunted by images of a beautiful woman, and he is tormented by a feeling ofemptiness.

In the end, the man realizes that he is a failure, and he commits suicide.

The film is a powerful exploration of the human condition, and it is a brilliant example of the power of cinema to convey a message.

**Wednesday, March 23, 7:30 p.m. in HU354.**

"Blow-Up" is a film that is both entertaining and thought-provoking, and it is a film that needs to be seen by anyone who is interested in the power of cinema.

ALBANY STUDENT PRESS
The Legend of the Hunter and the White Dove

The great hunting ground of Kayadwasaw, which lay on the angle between the Hudson and the Mohawk Rivers, was frequented by the Great Spirit.

One morning a hunter, born into the family, was traveling along the beach of the Mohawk River. He was lost and did not know where to go. He saw a white dove flying over the water. He followed her until she disappeared.

The dove led him to a clearing where there was a large grey owl. It flew across his path on noiseless wings, and alighting low down on the bare ground, seemed to mock at his calamity. Ind to him...

The dove, fluttering along on silver wings in the soft light of the morning hunter's door, was the young brave. He was wise and knew how to find his way back home.

For we have gained a friend in the white dove...

And in the bending path of a winter moon...

The Great River

The Hudson River is a vast canopy of water, it is a book of poems and legends from the native peoples of the region. The songs and stories of the Mohawks and other indigenous peoples who lived along its banks are steeped in the lore of this magnificent waterway.
We Want You

by John Gaffigan

John Gaffigan is a groundsman at SUNYA. He has been there for two years, and has seen many changes at the university since he joined its staff.

Gaffigan's main responsibility is maintaining the grounds around the campus. He is in charge of spraying the grass, picking up litter, and keeping the area clean. He also helps with various other tasks, such as moving furniture and setting up for events.

Gaffigan enjoys his job and feels that it is important to keep the campus looking its best. He is proud of the hard work he has put into maintaining the grounds and feels that it makes a difference in the overall appearance of the university.

If you would like to learn more about the maintenance staff at SUNYA or would like to reach out to John Gaffigan, please feel free to contact him.

A Soulful Sweep

by Steve Harnett

A radical bicentennial program

Alden State Cinema will present the screening of the motion picture and lush audio at the University at Albany Performing Arts Center.

The film, "The Soulful Sweep," directed by Edward Mendoza, is a powerful statement on the impact of the American Revolution on the lives of ordinary people. The film tells the story of a group of farmers who, against all odds, fought for their freedom and the right to be heard.

The screening will take place on Tuesday, March 23, at 8:00 p.m. at the Performing Arts Center.

The clown from Jack-in-the-Box replaced Ronald (who we later found out had received a few hundred dollars from the Telethon. We were leaving Telethon then to go on out in the Assembly Hall that the ballroom would be booked by another group because Mayor Corning and President Fields, they will go on to arrange something at the Assembly Hall where we are going to raise only a few hundred dollars. My mom had set up the deck. Some women called Melinda, our counselor rushed me to the emergency because of instant stomach pain which was a direct result of the meal. We had fried rice there. We found out later that there was nothing we had to do but relax and enjoy ourselves. Haunting vision that it was Telethon night and we were really wrong. "You looked so nice," she said reproachingly.

As each line passed, we knew our moment on stage was coming. It was almost time to arrive. (This was the first time."

The Classical Forum

Roman Holiday

On the Hill of Montecchio Roman classicism meets the Quirinus. Though there has been some restlessness with regard to the definition of the term classicism, the principle is clear: to dignify the fifth and therefore the third century B.C. and the fifth century A.D. In the field of March, March 15. (The Roman period) with the architect in the middle of the town. Originally, the town was divided into two parts: the lower town of the first and the upper town of the second. The town was divided into two parts: the lower town of the old town and the upper town of the new town. The town was divided into two parts: the lower town of the old town and the upper town of the new town. The town was divided into two parts: the lower town of the old town and the upper town of the new town. The town was divided into two parts: the lower town of the old town and the upper town of the new town.

In any case, no artist was apparently selected by the famous Italian Minerva. As guardian of wisdom, Minerva had the function of guarding the school when students were required to present their talents with small gifts of coins. The teachers may have been expected to make an offering of the coins to the goddess. According to Ovid, Minerva who is a descendant and brings new life, is the first woman to arrive. We felt rice would be good for our stomachs. As we went back to my parents' table to sit down for a few minutes.
To the Editor:
Professor David Lindenbaum's article "Twinkle, Twinkle Little Stan" (ASP, March 1976) exemplifies an argument that the average student is unsuited to the educational environment of SUNYA. As a student at SUNYA, I am very surprised that a university professor would allow having such stomach for such an article.

To the Editor:
I am writing this letter to thank you for publishing my article. I hope that it will be of some assistance to those who are interested in the topic.

To the Editor:
I would like to express my agreement with Professor Johnpoll's article: "Good academic weather is never a guarantee." I am sure that neither Prof. Johnpoll nor I am a weatherman, but I believe that this is a very important point.

To the Editor:
I am writing this letter to request your assistance in obtaining some information. I have been trying to find out about a certain topic, but have been unable to locate any relevant information. I hope that you may be able to help me.

To the Editor:
I have just read the article "Looking for Leaders" and I must say that I found it very interesting. I believe that it is important for students to be aware of the leadership opportunities that are available to them.

I am writing this letter to request your assistance in obtaining some information. I have been trying to find out about a certain topic, but have been unable to locate any relevant information. I hope that you may be able to help me.

To the Editor:
I have just read the article "Looking for Leaders" and I must say that I found it very interesting. I believe that it is important for students to be aware of the leadership opportunities that are available to them.

To the Editor:
I would like to thank you for publishing my article "Twinkle, Twinkle Little Stan." I hope that it will be of some assistance to those who are interested in the topic.

To the Editor:
I am writing this letter to express my agreement with Professor Johnpoll's article: "Good academic weather is never a guarantee." I am sure that neither Prof. Johnpoll nor I am a weatherman, but I believe that this is a very important point.

Kuhn Orders Camps To Open 'Without Delay'

NEW YORK (AP) Baseball Commissioner Bowie Kuhn ordered spring training camps to open Wednesday, without delay. Earlier, Kuhn had postponed them indefinitely because of the players' refusal to accept his proposed agreement.

The executive board of the Major League Baseball Players Association, meeting in Tampa, Florida, had been unable to reach an agreement on opening spring training camps and the nuestros of management negotiations with the owners.

League 1: Hoods Nip Red in OT

As AMIA Hoop Playoffs Begin

by Randy Egnaciyk

The Hoods defeated the Red 59-53 in overtime to open the AMIA Hoop Playoffs.

Four of the six AMIA teams will advance to the championship round, which starts Friday. The Hoods will face the Blue Devils, while the Red will play the Purple Eagles.

League 3.

WOMEN'S SPORTS: Uncoordinated Octopuses?

by Christopher Bollin

It has always seemed to me to be an unwelcome element of sportsmanship when one team is able to win without actually participating in the game. This is particularly true in gymnastics, where the women's physical education department at SUNYA has been struggling to develop a team that can compete on even a marginally competitive level.

But it is not only by chance that the octopuses are successful. At SUNYA, we have a special advantage in the way that the octopuses are scored. The octopuses are not required to perform any moves that are not included in the routine, and they are not held accountable for any errors that are made. This allows them to focus on their strengths and to develop a consistent routine, which is why they are able to win without actually participating in the game.

League 4.

Injunctions Halt Sit-Ins

by Bruce Berg

The State Board of Audit and Control has ordered all SUNYA activities to cease any activities that might be considered a sit-in, as defined by the Board.

The Board has decided to halt all sit-ins on campus until further notice. The decision was made following a review of the situation, which included discussions with the police department and the student government.

Ziden says he has been kept in the dark as to exactly where, when and how the charge would be laid.

"We really don't know what the situation will be," he said. "We've been kept in the dark as to exactly where, when and how the charge would be laid.

"I only know that the charge will be laid on the campus, but I don't know exactly where, when or how."
