Compulsory or Not

Today is the first in a series of two articles which will appear next week, with the theme of compulsory insurance. As the Editor pointed out in his article which appeared in the Freshman Handbook recently, the compulsory plan which is under consideration by the insurance committee has, in the past, been regarded as a matter of both practical and ethical consideration. The basic purpose of the plan is to provide a comprehensive insurance program for students at State College. However, it has been pointed out that such a plan would not only be advantageous to students but also to their families and State College as a whole. It is the purpose of this article to examine the merits and demerits of the compulsory plan and to discuss its implications for the future of education in general.

In recent years, the question of the desirability of a compulsory plan has been much debated. Some have argued that such a plan would be desirable because it would provide a comprehensive insurance program for students at State College. Others have argued that such a plan would be undesirable because it would undermine the principle of individual responsibility and personal choice. The question of the desirability of a compulsory plan is a complex one, and it is not easy to reach a definitive conclusion.

Today in Assembly, SA will be presented with two plans for compulsory insurance, which are essentially similar. For several weeks a committee appointed by Student Council has been working on the plan. The committee, which includes representatives of all the class councils, has been working on the plan. The system includes two plans to be presented to the council, one of which is a more comprehensive plan than the other.

One of the plans is a more comprehensive plan than the other. The system includes two plans to be presented to the council, one of which is a more comprehensive plan than the other.

It will be noted that, after last year's special appeal, many students have signed petitions against compulsory insurance. These students, however, have not expressed their opinions upon this plan, which is a much more comprehensive plan than the one which was presented last year.

We maintain that there is no student body which is entirely against compulsory insurance. The system includes two plans to be presented to the council, one of which is a more comprehensive plan than the other.

The vote on compulsory insurance, to be taken to-night, is a very important one. We are firmly convinced that the system includes two plans to be presented to the council, one of which is a more comprehensive plan than the other.

Hostel Groups To Give Prizes For Top Essays

Last Thursday (this page) the end of the four-week long Hostel Essay Contest came and those who had entered the essay competition went to meet up with the college officials and to be judged on their written pieces. They were to write about the two questions which appeared in the "News" on February 15th: "What is the current carryover of World War II to our college environment?" and "What are the problems of the college today?"

The judges were: Editor of the "Newspaper" (Mr. Casadesus), President of the Student Council (Mr. W. F. Krider), and President of the Junior and Senior Class (Mr. Laing). They interviewed the essay writers, who were chosen at random from the college, and decided on three winners. The prizes were $300 for the first place winner, $200 to the second place, and $100 for the third place. The essay writers were congratulated by the college officials, who said that the essay writers had given a delightful account of their thoughts and ideas. The suggestions are:

Carrino Reports Forensic Results of High Schools

The results of the High School Health Survey conducted by Dr. Elmore of the Department of Public Health were released this week. The survey included over 5,000 students from various high schools in the state. The results showed that smoking among high school students is on the rise, with over 30% of students surveyed admitting to smoking at least occasionally. The survey also found that there was a significant increase in the number of students using marijuana and other drugs. The survey recommends increased education and prevention programs to address this rising issue.

Industrial News

The factory has experienced a significant increase in production this month. The workers have been working overtime to meet the demand. The management has responded by implementing a new flexible work schedule that allows workers to work longer hours. This has led to a decrease in the number of work-related injuries and an increase in productivity.
